WINSO®

professional

PROFESSIONAL CAR CARE PRODUCT

MULTIPURPOSE LUBRICANT WS-40

PROFESSIONAL

Multipurpose agent for lubrication, protection and care of moving surfaces. Thanks by high penetrating properties quickly and qualitatively dissolves a strong film of rust and protects against corrosion of metal surfaces. Removes wet and improves electrical conductivity. Removes dirt and lubricates moving mechanisms. Not damages rubber, wooden, plastic, paintwork, chrome-plated surfaces. Using by professionals and use at home.

Usage: shake the bottle before use. Spray agent on surfaces at distance 10-15 cm. Wait a few minutes for activation. Repeat the process if that will be need.

SILICONE LUBRICANT

PROFESSIONAL

Effective agent for lubrication and long-term protection against wet and corrosion. Made on silicone base. Does not contain mineral oils and fats. Protects metal, plastic, rubber and another surfaces from dirt and rust. Provides surface water repellent and antistatic properties. Also it using for lubrications of door, locks, hinges, chains, is used as a universal lubricant for motorcycle, bicycle equipment, used in everyday life, at service stations, at work, at a professional and amateur level.

Usage: shake the bottle before use. Apply the agent on surface in distance 10-15 cm. Wait a few minutes for activations. Repeat the process if that will be need.

ANTI-RUST LUBRICANT

Professional penetrating agent for quick disengagement of rusty, hooked or threaded threaded and cylindrical connections. Thanks by active components its provide quick and effective disengagement of metal parts like bolts, nuts, battery terminals, etc. It has active components that's help reduce friction, increase corrosion resistance of the metal. Using for lubricate, protect and care for moving surfaces: door hinges, locks, etc.

Usage: shake the bottle before use. Apply the agent on surface in distance 10-15 cm. Wait a few minutes for activations. Repeat the process if that will be need.

CARBURETOR CLEANER

High effective agent for quick cleaning of carbon contaminants, carbon, resin, oil film: throttle, air and fuel jets, idle system, carburetor channels, intake valves and piston bottoms. Restore factory specifications carburetor. Neutralizes the consequences of using low-quality gasoline. Removes detonation and makes start of engine more easy. Makes tuning carburetor more easy and meet the minimum level of exhaust emissions and the consumption of gasoline. Safe for catalytic neutralizers. Recommended to clean the carburetor every 5000-7000 km. Prevents the formation of ferrocene on spark plugs and extends their service life.

Usage: shake the bottle before use. Switch off the engine. Remove the air filter cover and apply agent from outside. Switch on the engine and hold the switch of throttle. Carefully apply agent on the top of inside parts carburetor during 10 seconds. Switch off the engine. Repeat the process on the top parts of carburetor. Switch on the engine. "Gassing", not of more than 2000-2500 rpm. After that the work of engine will be better.

820 110

Volume: **400 ml**

EAN: **4820214535169**

Packaging: **24 psc**

CONTACT CLEANER

Is a professional cleaner for contacts, plug connections, terminals, plinths, relays, generators, antennas, cable switches, etc. It is used to remove rust, dirt, oxidation, old protective coating elements, oil film. The cleaner contains additives and solvents that are harmless to rubber and plastic parts, paintwork. The product does not contain silicone and other elements that leave an oil film on the surface.

Usage: disconnect the contacts from the power supply. Spray on the element to be cleaned and leave for 5-10 minutes, depending on the degree of contamination. Remove dirt and residues with a dry cloth, brush or compressed air. If the product comes into contact with lacquer or plastic surfaces, it is recommended to wipe them with a damp cloth. Note: connect the cleaned electrical elements to the power supply 10 minutes after cleaning.

820 380

Volume: **450 ml**

Packaging: **24 psc**

CHAIN LUBE

Is intended for lubrication of chain drive systems. Prevents galling, seizure, wear of hinges, etc. Has hydrophobic and heat-resistant properties, high penetrating ability. The agent forms a thin film on the chain links which prevents the penetration of abrasive particles. Convenient packaging makes it easy to apply lubricant without disassembling the chain.

Usage: shake well before use. Spray the agent onto the chain from a distance of 10-15 cm. If necessary, spray the chain a second time.

820 360

Volume: **200 ml**

EAN: **4820214536883**

Packaging: **24 psc**

TAR REMOVER

Professional stain remover from Winso TAR REMOVER vehicles. Thanks to the unique formula, it quickly removes bitumen stains, tar traces and resins of coniferous trees. After application to the stain, the cleaner quickly and effectively penetrates into the structure of the contamination, destroying it from within. Forms an antistatic and hydrophobic layer on the surface, so the coating stays shiny and clean longer.

Usage: before applying the cleaner, wash the treated surface and wait for it to dry completely! Shake the contents of the vial and apply to the stain from a distance of 15-20 cm. Wait 1-2 minutes to activate the active substance. Remove dirt with artificial suede or other clean, soft, lint-free cloth.

820 100

Volume: **450 ml**

EAN: **4820214537279**

Packaging: **24 psc**

FOAM TIRE SHINE

Is an effective professional tire care product. Used to quickly give the effect of «wet rubber». Restores bright and intense color of the processed surface. Forms an antistatic film and protects against road reagents, salt, ultraviolet light. Thanks to the silicone formula, it penetrates into microcracks and prevents premature cracking and aging of rubber. The spray is convenient and economical to apply.

Usage: apply at a temperature of +10°C. Clean the tires thoroughly, wait for them to dry completely. Shake the aerosol can well for 2-3 minutes. Apply the foam evenly on the surface from a distance of 10-20 cm from the treated surface. Remove stains with a dry cloth or rag. Wait a few minutes for the product to absorb.

850 100

Volume: **500 ml**

EAN: **4820214537057**

Packaging: **24 psc**

LONG LASTING

ROYAL BLACK

SUPER SHINE

INTERIOR FOAM CLEANER

Universal effective agent for cleaning different kind of dirt on fabric, leather, vinyl elements, carpet surfaces and artificial leather products. Quickly and effectively removes such types of dirt's as: road dirt, food stains, drinks, traces of motor oil, tobacco plaque, etc. Restores natural color and look of fabric and carpet surfaces. Thanks by unique formula, surface remains practically dry. The product includes natural citrus solvent «d-limonen», which eliminates unpleasant smells, leaving freshness and retaining a lasting aroma for a long time. Interior Foam Cleaner can using for cleaning furniture, carpets and covers.

Usage: carefully vacuum clean the surface. Shake the aerosol can. Check the action of agent on invisible area (some fabrics may lose color). Apply the foam to the work surface. Made foam by brush. Wait 2-4 minutes for activation surface-active substances. Softly pressing. Wipe the treated area with a clean, soft, wet cloth. After full drying, vacuum clean surface again.

820 160

Volume: **650 ml**

EAN: **4820214535176**

Packaging: **24 psc**

Convenient brush-cap for healthy cleaners

Easy removal of dirt from fabric, leather, vinyl elements of the car interior

Provides a lasting citrus aroma in the car

MOTOR STARTER

Effective agent for quick start petrol and diesel engines in the winter at extreme low temperatures, high humidity, wet spark plugs, low battery level and bad fuel quality. It has special lubricating components and anti-corrosive, anti-slip additions that protect the upper part of engine cylinders during an emergency start. Increase starter and spark plugs lifetime, reduces the load on the battery and the engine at start. Increase battery lifetime. Using for all types of petrol and diesel engines on cars and trucks. (carburetor, injector), including two-stroke (scooter, gasoline generators, trimers, etc.).

820 170

Volume: **450 ml**

EAN: **5902310820178**

Packaging: **12 psc**

MOTOR DOCTOR

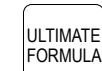

Engine oil additive using for increasing compression and oil pressure and reducing its costs in worn engines. Prevents ingress of oil in the combustion chamber, formation of soot. Restores compression and returns lost power. Provides protection of engine in moments of high load on it. It has good temperature resistance. Reduces noise during work of hydraulic compensators, valves, pistons. Reduces worn of new engines. Increases their service life. Forms a reliable film on the surfaces of parts that provide good work of engine in hard conditions and guarantee start of engine in cold conditions.

820 200

Volume: **300 ml**

EAN: **5902310820208**

Packaging: **12 psc**

RADIATOR LEAK STOP

Effective agent for elimination of leakage in radiators, connections in radiator, cylinder head gaskets, pumps and thermostats. Seal and prevents new leakage. Penetrating into microcracks under the influence of temperature fluctuations, the sealant is polymerized and forms a solid coating that stops leakage. Use for petrol and diesel engines. Does not contain acids, non-toxic. Safe for steel, cast iron, plastic, aluminum, rubber and polymetallic parts. It has effective lubricants additives for water pumps and corrosion inhibitors. Used in cooling systems, filled with antifreeze, tesol or wate. Volume of agent is designed for cooling system volume up to 12l.

820 180

Volume: **325 ml**

EAN: **5902310820185**

Packaging: **24 psc**

RADIATOR FLUSH

Professional effective agent for cleaning cooling system from scum, products of corrosion and dirt. It has acid-neutralizing component. Clears radiator, heating pipes, water channels of block of cylinders and a head of a block of cylinders. Workable with all types of cooling liquids. Does not contain aggressive acids and alkalis. Usin with all types of cooling system of cars, trucks and bus. Increase efficiency cooling system of engine. Neutral in relation to all types of structural materials of the cooling system: alloys (including aluminum), plastics and sealing materials.

ANTIFREEZE & COOLANT

G12+
ETHYLENEGLYCOL

RED

ANTIFREEZE CONCENTRATE
G12+ RED

Cooling liquid and premium quality concentrate antifreeze produced on the basis of technology OAT (Organic Acid Technology). It is used as a cooling liquid for engines of cars and trucks which correspond to the standard EURO 0-6. Protects radiator from corrosion and cavitation, prevents foaming, lubricates moving parts of the pump. Increases boiling temperature. Special improved additives, that are part of the antifreeze, lubricate the cooling system securely, prevent the drying and changing of the structure of rubber and plastic elements (sealers, etc.), which extend their shell life. Does not contain silicates, borates, amines, phosphates. DOES NOT contain methanol.

Application: Use in accordance with the vehicle's operating instructions. Before that it is necessary to dilute antifreeze concentrate with distilled water according to the table "Freeze protection". This type of antifreeze is recommended to be replaced once in 5 years. Do not mix with other antifreeze (eg., G11)!

ANTIFREEZE & COOLANT

ANTIFREEZE G13 YELLOW -42°C

Cooling liquid and premium quality antifreeze produced on the basis of «Lobrid coolants». It is used as a cooling liquid for engines of cars and trucks which correspond to the standard EURO 0-6.

Protects radiator from corrosion and cavitation, prevents foaming, lubricates moving parts of the pump. Increases boiling temperature. Engine operating temperature is up to **-42°C**. Special improved additives, that are part of the antifreeze, lubricate the cooling system securely, prevent the drying and changing of the structure of rubber and plastic elements (sealers, etc.), which extend their shell life. Does not contain silicates, borates, amines, phosphates. **DOES NOT contain methanol.**

Application: Use in accordance with the vehicle's operating instructions. This type of antifreeze is recommended to be replaced once in 5 years. Do not mix with other antifreeze (eg., G11)!

WINSO[®]

professional

PROFESSIONAL COMPOUNDS

X-TRON+ ACTIVE FOAM

Professional premium alkaline agent for non-contact car and truck cleaning with high level of foaming. Effectively clean the ingrained dirt, oil stains, bugs and other heavy-duty dirt. It successful working on car discs, cleaning all ingrained dirt and film of brake pads. Provides shining of car paintwork. Does not harm aluminum, chrome, rubber, and other surfaces of the vehicle. Thanks to special components works perfectly with hard water and in the winter season.

Mode of application: Prepare a work solution.

- For set foam - dilute with water in a ratio of from 1:9 to 1:7.
- For generator foam - Low pressure manual pump (sprayer) - dilute with water in a ratio of from 1:50 to 1:40 according of level dirty and hardness water. Apply the work solution to dry car to down - up, do not let to drying. Leave for 1-2 minutes for activation. Wash off with water under high pressure. If the car is very dirty or heated on sun need to wash off with water and then apply work solution.

ALPHA NANO ACTIVE FOAM

Professional premium class alkaline agent for non-contact washing cars and trucks with high level foaming. Thanks by a unique formula, which includes nano detergents, it easily removes strong dirt from road dust, static film, bugs residues and fatty contaminants. Ideal for self-service car washes. Excellent for car disks, washing away persistent dirt and plaque from brake pads. Provides perfect shine. Does not harm aluminum, chrome, rubber and other car surfaces. Thanks by special components, it works perfectly with water hard in winter season.

Mode of application: Prepare a work solution.

- For foam - it is recommended to dilute with water in a proportion from 1:12 to 1:6.
- For a foam generator - a low-pressure hand pump (nebulizer) - it is recommended to dilute with water in the proportion of 1:60 to 1:40, depending on the level of contamination and water hardness. Apply the work solution to the dry car from the bottom to the top, avoiding drying. Leave for 1-2 minutes to activate. Rinse with water under high pressure. In case of high level contaminations on car or if car sun-warmed, rinse it with water and then apply work solutions.

SPIDER ACTIVE FOAM

Super concentrated professional agent for cars and trucks contactless cleaning with a high level of foaming. Intended to remove stubborn dirt, road dust, static film, insect residue and grease. Excellent work on the car rims, washing stubborn dirt and scurf from the brake pads. It provides a good gloss paint coating. It does not harm aluminum, chrome, rubber, and other surfaces of the vehicle. Thanks to special components works perfectly with hard water and in the winter season. Mode of application: Prepare a work solution.

- For set foam: dilute with water in a ratio of from 1:12 to 1:10.
- For foam generator, manual low pressure pump (nebulizer): dilute with water in a ratio of from 1:50 to 1:25, depending on the level of contamination and water hardness. Apply the work solution to dry car upward, preventing drying and leave for 2-3 minutes to activate. Wash off with a jet of water under high pressure. In the case when the vehicle is heavily contaminated or heated in the sun, must be washed with water, and then apply the work solution.

CROSS+ ACTIVE FOAM

Professional premium class alkaline agent for non-contact washing cars and trucks with high level foaming. Specially designed for for dosage system. Thanks by a unique formula, which includes nano detergents, it easily removes strong dirt from road dust, static film, bugs residues and fatty contaminants. Ideal for self-service car washes. Excellent for car disks, washing away persistent dirt and plaque from brake pads. Provides perfect shine of surface. Does not harm aluminum, chrome, rubber and other car surfaces. Does not leave a siege in the pipelines and capacities of the dosing system. Mode of application: Prepare a work solution.

- For dispenser - the recommended concentration index of 2-3%.
- For foam - it is recommended to dilute with water in a proportion from 1:9 to 1:7.
- For a foam generator - a low-pressure hand pump (nebulizer) - it is recommended to dilute with water in the proportion of 1:1000 to 1:80, depending on the level of contamination and water hardness. The optimal proportion of dilution it's depending from the car's pollution, type of equipment and water hardness. Apply the work solution to the dry car from the bottom to the top, avoiding drying. Leave for 1-2 minutes to activate. Rinse with water under high pressure. In case of high level contaminations on car or if car sun-warmed, rinse it with water and then apply work solutions.

FANTOM ACTIVE FOAM

Professional premium alkaline agent for non-contact car and truck wash with high level of foaming. Designed to remove heavy contaminants, road dust, static film, insect debris and grease. Ideal for self-service car washes. Works perfectly on car wheel discs, washing away dirt and blast from brake pads. Provides paint and varnish coating with excellent gloss. Does not harm aluminum, chrome, rubber and other car surfaces. Thanks to special components, works well with hard water and in the winter season. Mode of application: Prepare working solution.

- For foam set - dilute with water in the ratio from 1:10 to 1:7.
- For foam generator - manual low pressure pump (sprayer) - dilute with water in the ratio from 1:50 to 1:40 depending on the level of contamination and hardness of water. Apply the working solution on a dry car from bottom to top preventing drying and leave for 1-2 minutes to activate. Wash off with water under high pressure. If the car is very dirty or heated in sun, need to wash off with water and then apply working solution.

WAX 1000 NANO WATERLESS WAX

Super concentrated professional agent for car drying that was made on nano technologies. It has a high water repellent ability. The wax is acting on the molecular level. Nano particles provide accelerating the process of body drying after washing. The wax is used to protect the car paint coating from external factors. It forms a protective film that saves the car body from small defects such as scratches and cracks. It prevents the penetration of water, salts and other chemically active substances, which cause corrosion by acting on the unprotected metal. It also provides the protection against UV. The special components work perfectly with hard water and in winter.

Mode of application: Prepare a work solution.

- For foam generator, manual low pressure pump (nebulizer): dilute with water in a ratio of from 1:150 to 1:100, depending on the level of water hardness. Apply the work solution to clean and wet car. Wipe the car using artificial suede for cleaning and polishing.

HIGH TEMPERATURE ACRYLIC SPRAY PAINT +600°C Volume: 450 ml

High-quality elastic paint based on organosilicon resins. Developed specifically for painting surfaces exposed to high temperatures - calipers, engines, exhaust pipes, production equipment, and others. The maximum temperature depends on short-term or long-term heating. Up to 4 hours, the temperature can be up to +600°C, prolonged heating up to +400°C. Quick-drying and resistant to mechanical and atmospheric impacts. Used for both partial and complete painting. For external and internal work. Prevents corrosion and oxidation.

Application: thoroughly clean the surface to be painted, remove rust, grease and other contaminants. Shake the bottle for 2-3 minutes before use. The recommended distance to the painted surface is 25-30 cm. Spray the paint with a thin layer. The second layer can be applied in 2-3 minutes. After finishing work with aerosol can, in order to use it without problems next time, as well as to clean the spray head, turn the spray bottle upside down, pushing it until clean gas goes out of the spray nozzle. Spray paint should be applied at room temperature.

ACRYLIC SPRAY PAINT

Quick-drying acrylic paint, resistant to mechanical and atmospheric impacts. It is characterized by increased elasticity due to the high content of plasticizers. Specially designed for painting and restoration of objects made of metal, wood, glass, plastic, fabric, ceramics and other materials. Spray paint is suitable for cars, motorcycles, bicycles, various equipment (including kitchen), decorative elements, can be used in household. Suitable for indoor and outdoor work. The color of the coated surface corresponds to the color of the spray paint. Used for both partial and complete painting. Prevents corrosion and oxidation.

Application: thoroughly clean the surface to be painted, remove rust, grease and other contaminants. Shake the bottle for 2-3 minutes before painting. The recommended distance to the painted surface is 25-30 cm. Spray the paint with a thin layer. The second layer can be applied in 2-3 minutes. After finishing work with aerosol can, in order to use it without problems next time, as well as to clean the spray head, turn the spray bottle upside down, pushing it until clean gas goes out of the spray nozzle. Spray paint should be applied at room temperature. To increase the solidity of the paint coating, it's recommended to use a primer spray paint and varnish spray Winso Fly Color on an acrylic basis.

ACRYLLIC PRIMER SPRAY PAINT

Quick-drying acrylic primer paint is used to prepare the surface before painting various objects made of metal, wood, glass, plastic, fabric, ceramics and other materials. The color of the coated surface corresponds to the color of the primer paint from the spray. Primer spray paint is suitable for cars, motorcycles, bicycles, various equipment (including kitchen), decorative elements, can be used in household. Suitable for indoor and outdoor work. Weatherproof: does not crack, does not burn out, does not turn yellow. Lead and mercury free. Prevents corrosion and oxidation.

Application: thoroughly clean the surface to be treated, remove rust, grease and other contaminants. Shake the bottle for 2-3 minutes before use. The recommended distance to the painted surface is 25-30 cm. Spray the primer paint with a thin layer. The second layer can be applied in 2-3 minutes. After finishing work with aerosol can, in order to use it without problems next time, as well as to clean the spray head, turn the spray bottle upside down, pushing it until clean gas goes out of the spray nozzle. Primer spray paint should be applied at room temperature. To increase the solidity of the paint coating, it's recommended to use the spray paint and varnish spray Winso Fly Color on an acrylic basis.

GAS CYLINDER FOR THE BURNER

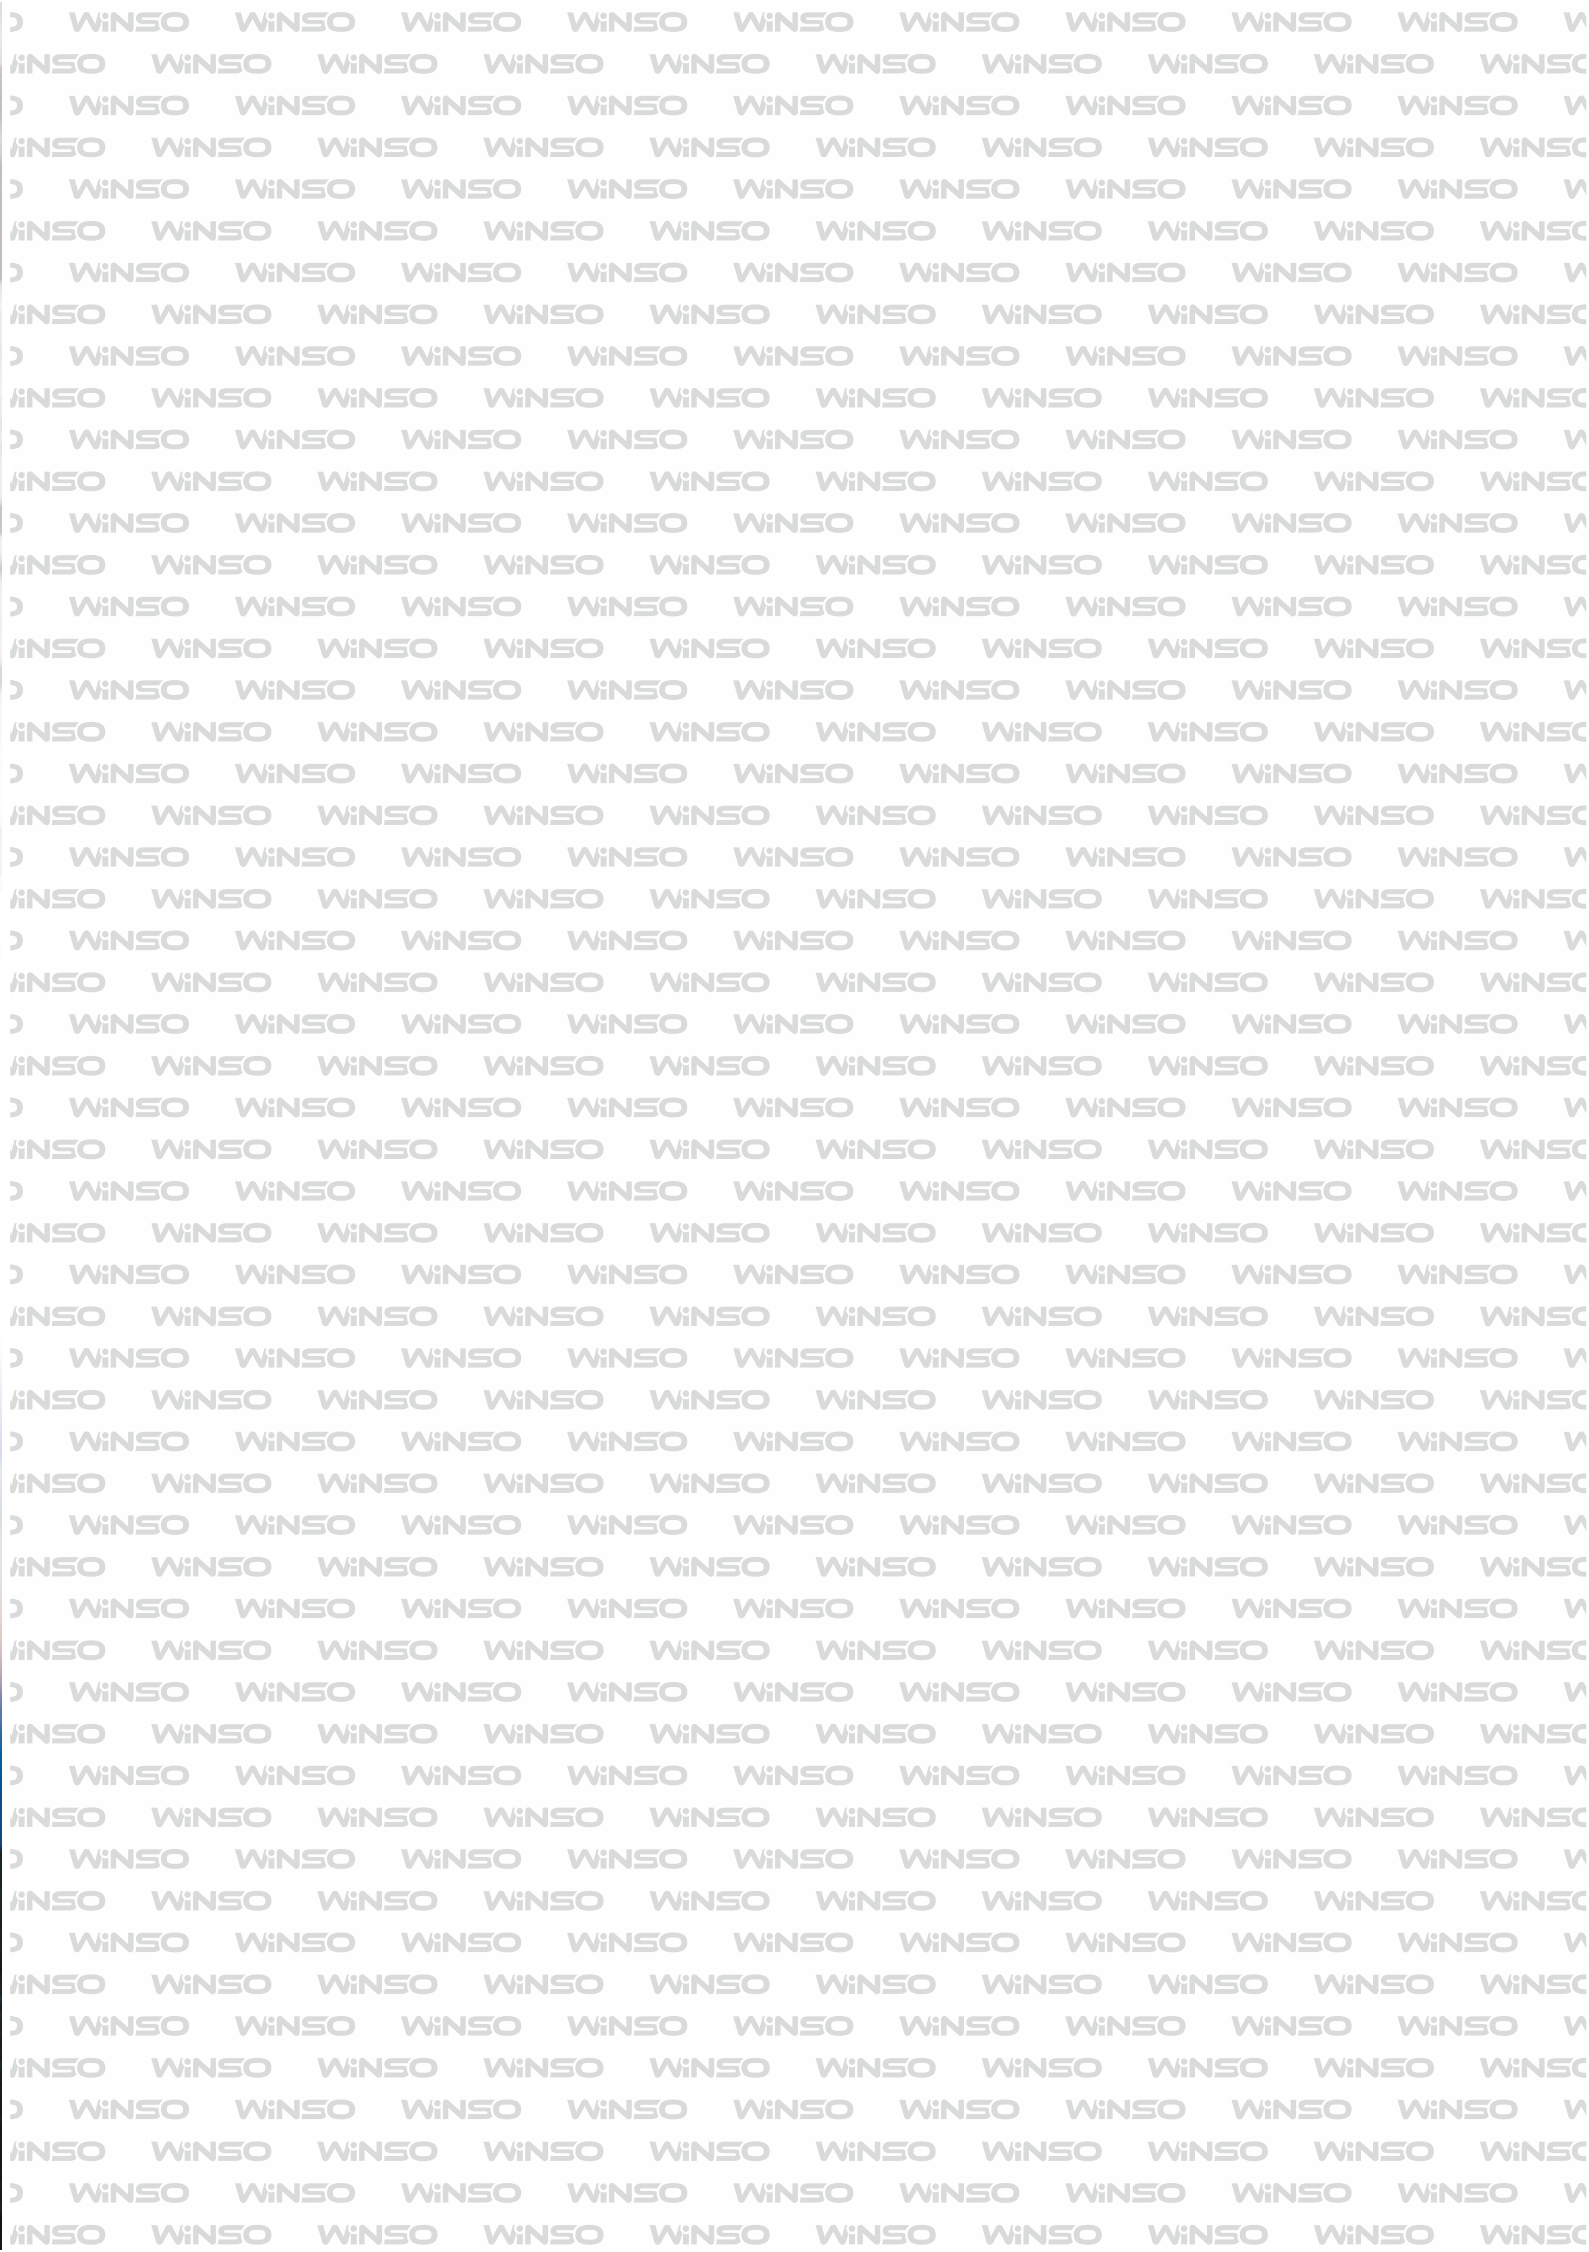

Winso gas cylinder-cartridge for burner is an essential equipment for hiking. Due to its convenient and compact shape, the cylinder does not take up much space. The high-performance propane-butane gas mixture is suitable for use in any season. The cylinder is compatible with burners, which has a collet chuck mount and is compatible with adapters on other types of mounting. The CRV system guarantees explosion safety when the pressure in the cylinder changes due to high temperatures.
