

BOSS BH 30 -

BOSS BH 30 with unique XAD pattern provides improved traction, resulting in reduced tyre slippage. These tyres are designed for backhoe loaders, an essential machinery for Industrial & construction Segment. uniform load distribution ensures better wear, and it helps to maximize the tyre life and maintain consistent performance. BOSS BH 30 has Specially designed CCR (Cut & Chip Resistance) Compound to resist cuts and chips when the tyre encounters sharp objects or abrasive surface on various terrains. BOSS BH 30 ensures the machine's stability, mobility, and overall performance.
