

SSB 333 -

This tyre is made specifically designed for skid steer loaders, commonly referred as skid steer. This machine is frequently employed in landscaping, excavations, moving supplies, and other types of construction work. SSB 333 tyres are typically designed to be robust and durable to withstand the rugged and often abrasive conditions on construction sites and other work environments. SSB 333 has traction, stability, and the ability to perform tasks such as digging, pushing, or lifting making it optimal for usage on hard and rough surfaces. The tyre has robust casing, that offers high durability and protection against punctures and damages. To protect rim flange area against flats and wheel damages SSB 333 has Rim Guard.
