

Kent Automatic Accordion Curtain

Kent Automatic Accordion Curtain

Kent Automatic Accordion Fire Curtain serves as an architectural solution by creation of versatile partitions for closed and open, even in miter corners, enhancing the aesthetics of your space planning without the requirement of supporting columns at corners. Featuring a fire-resistant fiberglass fabric stacked inside a headbox installed above the ceiling, this system remains virtually invisible until activated. With a remarkable fire resistance of up to 240 minutes. Its compact and lightweight design sets it apart from equivalent products, offering unparalleled convenience.
