

for a safer world!

ENABLING INNOVATION TOGETHER.

COMPANY PROFILE

www.olympia-electronics.com

Our company since 1979

OLYMPIA ELECTRONICS S.A. was founded in 1979 by Nikolaos Lakasas and Panagiotis Arvanitidis. It is the largest purely Greek production unit of electronic security systems in Greece and one of the ten largest in Europe.

The activity of the company is the development of electronic security systems. OLYMPIA ELECTRONICS S.A. places special emphasis on cutting-edge technologies, innovation, quality and the value for money of the products it produces. The company relies on the know-how of its experienced staff, with 25% of its human resources consisting of a very dynamic team of experienced Electrical - Engineers working in the crucial department of R&D and constantly developing new innovative products.

OLYMPIA ELECTRONICS S.A. produces the following product categories:

- Emergency lighting systems
- Fire detection systems
- Gas detection systems
- Intrusion alarm systems
- Electronic room thermostats
- Hotel Access

The headquarters of OLYMPIA ELECTRONICS S.A. is located in Methoni, Pieria, while maintaining a privately owned sales branch in Athens and employs 215+ employees. Recently, the company, in order to achieve its strategic goals, proceeded with the purchase and staffing of new facilities at the Western entrance of Thessaloniki in the building of PORTO CENTER. The new facilities concern Research & Development infrastructures for programmers (software developers) and electronics (embedded engineers).

Our philosophy

- To produce high quality products, top technology & innovation at competitive price levels.
- We Are Easy To Do Business With Company.
- Our orientation is human-centered

Our mission

To be the best Greek company and to belong to the most developing European companies in the field of Electronic Security Systems industry.

Our production

- Fully verticalized and automated production process
- 5 state-of-the-art Fuji SMD production lines using AOI
- Industry 4.0 certified

Our staff

Our staff is our real strength as:

- They are professionals
- They work as a team
- They have strong motivations to complete their work
- They are committed to fulfilling the corporate mission

R & D

- Well-trained and trained R&D staff
- Ability to quickly and efficiently develop a new product
- Emphasis and orientation on innovation
- Complete equipment in Software and Hardware.

Certifications

Olympia Electronics A.E. aiming at quality, in recent years has adopted operating, production and control processes, which result in the marketing of products fully compliant with European (EN) and global quality and manufacturing standards.

For its production the company implements advanced systems "world class manufacturing" such as lean systems, TQM, 6 sigma etc. that gives a competitive advantage. The company implements an integrated management system IQMS "oly q" which integrates quality management systems, environmental management, health and safety staff and other management systems. It is also, since 2011, holder of the bee bronze award of the EBEN of the European Network of Business Ethics. Its products have certificates from bodies such as BSI, EVPU, CNBOP, DEDAL, UL etc.

Corporate Social Responsibility

OLYMPIA ELECTRONICS A.E. In recent years, through social corporate responsibility, it has strongly promoted responsibility, social conscientiousness, sensitivity, conscience and business ethics of the company, contributing to the support of society and the protection of the environment.

A key aspect is the management of environmental impact and natural resources. The company has taken all the measures and managed to reduce the consumption of resources, pollutant emissions and waste achieving double benefit for the company itself and for the environment.

An additional aspect is the external social responsibility, which concerns the extension of the company's responsibility to the local community, which includes public authorities, non-governmental organizations, etc. dealing with the environment and local communities. It contributes to the local community by providing jobs, social benefits as well as direct and indirect taxes, since its viability depends on the health, stability and prosperity of the community in which it operates.

With a strong emphasis on corporate social responsibility and achieving sustainable development, Olympia Electronics produces high quality products with a long service life.

An important part of sustainable development are the practices of the circular economy where the product is designed from the beginning in such a way that it can be easily and economically reconstructed or made from scratch from recycled material.

So we adopt the idea of Think Green aiming at the development of sustainability by integrating the circular economy in all levels of our operation!

Demonstrating its awareness of social responsibility issues, Olympia Electronics decided to donate we4all, an environmental NGO.

This sponsorship will be used to educate the students of a school on environmental issues and the need for the contribution of each of us to the protection of our planet.

We4all is an NGO founded to help the earth heal and to remind people that this planet is our home.

Environmental Friendly Company

Olympia Electronics SA highlights its commitment to support and promote sustainable development and the principles of Corporate Social Responsibility through a global strategy. The company operates in the field of production of integrated security systems and implements practices aimed at protecting the environment, the addition of social value and the development of corporate social responsibility.

Environmental Sustainability

Olympia Electronics SA undertakes actions to reduce the effects of climate change and protect the environment. In this context, the company has set strategic goals that include:

Recycling: The company recycled significant amounts of materials in 2022, helping to reduce waste and recycle resources. Specifically, it recycled plastic (33,900kg), paper (15,180kg), iron (3,450kg), aluminum (2,230kg), finished products (1,055kg), welding metals (500kg for 3 years), boards (144kg) and lamps (54kg).

Development of a sustainable development strategy: The company has developed a sustainable development strategy that includes circular economy practices and ESG approaches at all levels of its production. This strategy forms the basis for achieving the company's environmental goals.

Use of supercapacitors & LiFePO4: The company has invested in the use of supercapacitors and LiFePO4 in its emergency lights instead of conventional batteries. This technology offers a long life (up to 10 years) and reduces the amount of waste produced by battery production.

Social Value and Responsible Operation

The company has prioritized the creation of social value and responsible operation. This includes the definition of ESG criteria to monitor and improve its performance.

ESG Criteria: The company has identified and adopted a set of ESG indicators to measure its performance and set its goals. These indicators form the basis for making development decisions and increasing efficiency.

Olympia Electronics SA demonstrates its continued commitment to creating a greener and more sustainable business world. By adopting sustainable development practices, circular economy and ESG indicators, the company seeks to reduce its impact on the environment and add value to society. In 2022, the company demonstrated concrete successes in recycling, battery replacement and the use of ECO friendly packaging, strengthening its position as a pioneer in the field of sustainable development. Olympia Electronics, with these initiatives, is contributing towards a safer and greener world.

for a safer world!
