CVSS

Comprehensive Vehicle Screening System

An advanced inspection system to scrutinise for weapons, explosives, contrabands or suspicious items that hidden underneath as well as interior of vehicles.

CVSS is a seamless integrated system that is simple, easy to maintain, cost effective and scalable. It is designed to assist security officers to perform an efficient and effective inspection (underneath and interior of vehicle) at crucial checkpoints through a presentation of high-quality images on a single screen.

System Highlights & Features

- 

Intelligent Analysis
Automatic Detection Feature to detect any anomalies
- 

Simplifying Workflow
Remove complexity and repetitive task of operator by simplifying and normalizing the inspection process
- 

Safe Screening
Incorporated with unique Passive Filter Technology and designed in accordance with international safety requirement
- 

Scalability
Accommodate changing demand without compromising performance and quality
- 

High Quality Images
High resolution X-Ray image and true colour UVSS image for detailed inspection
- 

Cost Effective
Compact design with multiple systems, small footprint, minimal workspace and manpower
