

Introducing the iCode 3.2

January 2025

The Latest in Access Control Technology for Outdoor Use

iTEC, a leader in advanced access control solutions, is excited to announce the launch of the **iCode 3.2**, the newest model in the popular iCode product line.

Building on the trusted features of its predecessor, the iCode 3.2 is designed to meet the evolving needs of modern access control with increased durability and enhanced functionality.

The **iCode 3.2** combines the convenient **PIN Code opening** feature from previous versions with the addition of **RFID** technology, offering flexible access options for users.

What sets this model apart is its robust design, making it ideal for outdoor environments with its **IP65 rating**, ensuring protection against dust and water.

The **iCode 3.2** is now available and will be featured at Intersec 2025 - Dubai.
