

iKeypad 04 FR with Advanced Recognition Technologies

January 2025

Revolutionizing Access Control

iTEC is proud to unveil the **iKeypad 04 FR**, a groundbreaking access control reader that combines state-of-the-art recognition methods to ensure secure and convenient access. With a focus on versatility, the iKeypad 04 FR allows for **facial recognition**, **fingerprint scanning**, **PIN code entry**, and **mobile device unlocking**, providing users with a range of entry options.

Equipped with **iTEC OnAccess** software, the iKeypad 04 FR operates via **WiFi**, enabling seamless remote access management. This makes it an ideal solution for both commercial and residential spaces, offering enhanced security with the flexibility of real-time control.

“The iKeypad 04 FR is designed to redefine what users expect from access control systems,” said *Alcides Castro*, CEO at iTEC. “By integrating multiple authentication methods and remote management capabilities, we’ve created a solution that adapts to modern security needs.”

The **iKeypad 04 FR** is now available and will be featured at Intersec 2025 - Dubai.
