

Skyworth Stuns at Secutech Vietnam: Unveiling the Future of Technology

Vietnam, Aug 14rd: Skyworth, a global pioneer in eco-smart connected home solutions and green energy products, is making a remarkable impact at Secutech Vietnam, the premier international trade fair for safety and fire technology. From August 14 to 16, 2024, at Hall A, Booth C14, Skyworth is presenting an extensive lineup of cutting-edge IP Camera products. Join us to explore how we are shaping the future of smart security.

Skyworth is unveiling a series of innovative, self-developed products that highlight efficiency and technological advancement. Key highlights include our Outdoor CAM, Indoor CAM, and advanced Night Vision technology. Stealing the spotlight are the world's first 5MP Smart Screen Home Camera and the 5MP Super Dark Bullet Camera, which are capturing the attention of attendees.

5MP Super Dark Bullet Camera

The 5MP Super Dark Bullet Camera, featuring Skyworth's next-generation true-color night vision technology, delivers vivid color details even in the darkest environments. With its ultra-large F1.0 aperture and proprietary image algorithm, it guarantees unparalleled nighttime footage. Equipped with a built-in microphone, this camera is ideal for various applications.

AI-powered 5MP Smart Screen Home Camera

Making its industry debut, the 5MP Smart Screen Home Camera has illuminated the exhibition with its revolutionary design. Featuring a vibrant, colorful smart screen integrated with a high-definition camera, it enables two-way visual calls with a crystal-clear 5MP (2880*1620) resolution. More than just a camera, it serves as an intelligent guardian, offering advanced features such as human detection, pet monitoring, fall detection, and abnormal sound alerts for comprehensive security. The innovative super dark vision ensures vivid imaging even in challenging lighting conditions.

Skyworth has been adhering to independent research and technological innovation and continues to increase investment in AI artificial intelligence, cloud platforms, intelligent manufacturing, and other fields. Strong has launched a variety of cost-effective products and application solutions for different scenes which have earned wide recognition in the market.
