AXYMN GROUP
MIDDLE EAST

AXYMN Group:
Pioneering the Future of Security with British Excellence

Rooted in the heritage of British innovation, AXYMN Group leads the global security landscape with state-of-the-art AI solutions. Operating primarily in the UAE and across the Middle East, our unwavering commitment to precision, resilience, and integrity reflects the finest traditions of British ingenuity. We safeguard what matters most, setting a gold standard in security trusted worldwide.

TABLE OF **CONTENTS**

CEO MESSAGE

Dear Valued Clients, Partners, and Stakeholders,

As the CEO of AXYMN Group, I am excited to share our vision for the future of security consultancy. In a rapidly evolving world, we are committed to delivering AI-driven solutions that redefine security standards.

Our mission is clear: to lead the transformation of security consultancy, starting in the UAE and expanding across the Middle East—and beyond.

AI at the Core of AXYMN Group

At AXYMN Group, AI is the foundation of our success. Our advanced AI capabilities allow organizations to:

- Anticipate and mitigate threats with predictive analytics.
- Respond in real-time to evolving risks.
- Integrate cyber and physical security seamlessly.
- Streamline security operations for greater efficiency.

Expanding Across the Region and Beyond

Starting in the UAE, we are driving innovation in security consultancy. As the region grows, we are expanding our AI-driven solutions across the Middle East and into global markets, providing tailored security strategies that meet both local and international needs.

Building Trust and a Safer Tomorrow

At AXYMN Group, security is the foundation of trust and growth. Our commitment to excellence ensures we deliver smarter, proactive solutions that allow our clients to innovate and thrive in an increasingly complex world.

Thank you for trusting AXYMN Group. We look forward to partnering with you to create a safer, smarter tomorrow.

Warm regards,
Aston Garrett
CEO, AXYMN Group
Redefining Security Through AI Innovation

ABOUT US

AXYMN Group Middle East: Pioneering the Future of Security

At AXYMN Group, we are revolutionising security by delivering innovative, bespoke solutions for high-net-worth individuals, global corporations, and government entities. Our mission is both ambitious and transformative: to redefine the limits of what is possible in the world of security.

This mission is driven by our elite team, composed of professionals with distinguished careers in the British military, police, and special forces, as well as world-class AI specialists and security system installation experts. Operating across the Middle East, our team combines operational excellence with cutting-edge technological expertise, ensuring that every solution is tailored to meet the unique challenges of our clients.

Our AI specialists are at the forefront of developing intelligent systems, including AXYMN ONE and NOAH, which integrate advanced analytics, real-time threat detection, and automated decision-making for unparalleled security management. Alongside them, our security system installation specialists ensure seamless implementation of state-of-the-art infrastructure, including AXYMN FORT barriers, surveillance systems, and advanced access control technologies.

Every frontline officer is FREC 3 certified, ensuring exceptional medical readiness and rapid response capabilities in even the most complex and dynamic environments. This combination of advanced technology and elite personnel sets us apart, enabling us to deliver results that consistently exceed expectations.

With AXYMN Group, you're not just investing in security, you're investing in the future.

MISSION

At AXYMN Group, we push the boundaries of innovation to deliver next-generation security, intelligence, and drone-based solutions. By harnessing advanced AI, state-of-the-art drone technology, and precision analytics, we empower clients to navigate the complexities of a rapidly evolving world. Our mission is to redefine safety, efficiency, and intelligence by providing forward-thinking, bespoke solutions that elevate protection and performance to unparalleled levels.

VISION

Our vision is to shape the future of security and intelligence, blending innovation with excellence to create a world where technology and safety are seamlessly integrated. From Dubai's iconic skyline to global frontiers, AXYMN Group is setting the standard for futuristic solutions, empowering industries, safeguarding assets, and driving progress through unmatched precision and revolutionary technology.

With AXYMN Group, the future is not merely imagined—it is delivered.

VALUES

At the heart of our company lies an unwavering commitment to delivering state-of-the-art security systems and protection that redefine safety standards for individuals, businesses, and communities. Our values underpin every aspect of our work, ensuring that we remain a trusted leader in advanced security solutions.

Innovation

We harness the power of technology to develop security solutions that are as forward-thinking as the threats they counter. Our commitment to cutting-edge advancements, including AI-driven systems, intelligent surveillance, and integrated access control, ensures our clients benefit from the most advanced tools available. We continuously innovate to stay ahead of emerging risks, providing proactive solutions that inspire confidence and peace of mind.

Integrity

Trust is the cornerstone of our business. We approach every project with transparency, honesty, and accountability, ensuring our clients can depend on us to protect what matters most. From our unwavering commitment to privacy and confidentiality to our ethical business practices, we uphold the highest standards of integrity in all our interactions.

Excellence

We strive for excellence in every service we deliver, from consultation to installation and ongoing support. Our team of highly skilled professionals ensures that each project is executed flawlessly and tailored to the unique needs of our clients. This dedication to quality, precision, and client satisfaction distinguishes us within the security industry.

Reliability

Security demands dependability, and we take pride in being a trusted partner to our clients. Our systems are designed for resilience and long-term performance, ensuring uninterrupted protection when it matters most. From advanced technology to rapid response capabilities, our clients know they can rely on us.

Adaptability

In a world where threats evolve rapidly, flexibility is essential. Our solutions are not only innovative but also scalable and adaptable, meeting the unique challenges faced by each client. Whether addressing the needs of a single residence, a multinational corporation, or critical infrastructure, we tailor our services to align seamlessly with specific requirements.

AXYMN ECOSYSTEM

Welcome to the AXYMN Eco-system, where cutting-edge technology meets a steadfast commitment to sustainability. This fully integrated suite of solutions does more than protect your world, it empowers it. By combining advanced robotics, artificial intelligence, renewable energy compatibility, and intuitive control systems like NOAH, the AXYMN Ecosystem delivers unmatched security while paving the way for individual net-zero operations.

A self-sustaining security system designed with sustainability at its core. Autonomous drones patrol the skies while multi-terrain robots safeguard the ground. Advanced barriers and bulletproof systems seamlessly integrate into your infrastructure, and an underground sanctuary shields your family, employees, or assets during any crisis.

WHAT IS IT?

The AXYMN Eco-system is an interconnected network of technologies, each playing a vital role in delivering comprehensive security and sustainability:

AXYMN ONE

The intelligence hub of the ecosystem. AI-driven coordination ensures seamless integration, predictive threat analysis, and real-time operational efficiency.

NOAH

The intuitive voice-controlled assistant that connects every component of the eco-system.

AXYMN EYE

A state-of-the-art surveillance system featuring HD cameras, thermal imaging, and autonomous drones for 360° situational awareness and precision surveying.

AXYMN FORT

Advanced barriers, bulletproof doors and windows, and under-vehicle recognition systems (UVRS) that provide robust, sustainable perimeter protection and access control for any site.

THE A-R-K

An adaptable, energy-efficient bunker offering ultimate safety and resilience during any crisis, tailored for individuals, corporations, or critical infrastructure.

AXYMN ROBOTICS

Multi-terrain quadruped robots designed for patrol, surveillance, emergency response, and operational support, powered by AI and renewable energy compatibility.

CARBON NEUTRAL VISION

At AXYMN, we don't just deliver world-class security, we offer you the opportunity to lead the way in sustainability. Imagine protecting your home, business, or infrastructure with cutting-edge technology while achieving carbon neutrality. With AXYMN's Carbon Cost and Sustainability Assessments, you can secure what matters most while making a measurable impact on the planet.

TRANSFORM YOUR ENVIRONMENT INTO A SUSTAINABILITY STATEMENT

Offset Installation & Operation Costs

We assess the carbon footprint of your AXYMN Eco-system, from installation to daily use, and provide seamless offset solutions. Whether through certified carbon credits or investment in renewable energy projects, we make neutrality achievable.

Sustainable Energy Integration

Power your AXYMN Eco-system with solar panels, wind turbines, or other renewable solutions to reduce emissions and operational costs. Why rely on the grid when you can generate clean energy on-site?

Carbon Neutral Living & Business

We don't stop at the AXYMN Eco-system. Our experts evaluate your entire carbon footprint, offering solutions to run a carbon-neutral business or create a carbon-neutral home. From energy efficiency upgrades to offset mechanisms, we tailor strategies that align with your goals.

WHY CHOOSE CARBON NEUTRALITY WITH AXYMN?

Lead with Purpose

Show the world your commitment to a sustainable future.

Save While You Sustain

Lower energy costs and boost efficiency with renewable energy.

Enhance Your Image

Achieve carbon neutrality certification for your home or business and lead the charge toward a greener tomorrow.

Global Impact, Local Results

Whether funding reforestation, renewable energy, or conservation, every choice you make drives change globally and benefits you locally.

Be Secure. Be Sustainable. Be a Leader.

INTRODU...
AXYMN ONE & NOAH

AXYMN ONE (AO): Redefining Security for the Modern World

In a rapidly evolving world where security demands are more complex than ever, AXYMN ONE (AO) stands as a revolutionary solution. Combining cutting-edge artificial intelligence with an intuitive voice-controlled interface named NOAH, AO transforms how we think about safety. Whether safeguarding a private residence, managing a business, or protecting high-risk facilities, AO delivers unrivalled precision, adaptability, and control.

NOAH: The Power of Your Voice

At the core of AXYMN ONE is NOAH, a sophisticated voice command interface that bridges advanced AI technology with effortless human interaction. Gone are the days of needing technical expertise—simply speak your commands, and NOAH does the rest.

WHY CHOOSE AXYMN-ONE?

Scalability
Perfect for homes, businesses, and enterprises of any size.

User-Friendly Interface
Operate the system effortlessly with NOAH, even without technical expertise.

Deep Learning Adaptability
Continuously evolving to address emerging threats.

Proactive Threat Management
Detect, analyse, and respond to risks before they escalate.

Security for the Future, Today

COMMAND EXAMPLES THAT SHOWCASE NOAH'S INTELLIGENCE

"Analyse anomalies from Camera 1 over the past 24 hours, cross-reference them with entry logs, and predict potential risks."
Response: NOAH processes the data, correlates information, and provides a detailed risk assessment.

"Provide a live feed from Gate 1, monitor the individual approaching, and assess their intent."
Response: NOAH retrieves live footage, analyses behaviour, and identifies potential threats in real time.

COMMAND EXAMPLES FOR REAL-WORLD SCENARIOS

Smart Surveillance
"Track the individual in a blue jacket from Gate 3 and provide their movement history."
Response: NOAH generates a complete timeline of the individual's activities.

Advanced Weapon Detection
"Run a weapon detection scan across all camera feeds and highlight areas of concern."
Response: NOAH identifies and flags threats, prioritising critical zones for attention.

Behavioural Intelligence
"Assess whether the visitor in Reception seems distressed or intimidated."
Response: NOAH analyses body language, facial expressions, and vocal tones to provide an emotional assessment.

Thermal Monitoring
"Scan Zone B for unusual heat signatures and confirm any hidden activity."
Response: AO uses thermal imaging to detect anomalies such as hidden individuals or overheating equipment.

Suspicious Activity Alerts
"Notify me if anyone stays in Zone C for more than 10 minutes."
Response: AO monitors the location, identifies lingering individuals, and flags the behaviour for attention.

Unattended Bag Detection
"Alert me if any bags are left unattended in the lobby for more than five minutes."
Response: AO uses object recognition to detect unattended items, assesses the potential risk, and notifies personnel immediately.

Drone Deployment on Demand
"Send a drone to patrol the perimeter and provide live video and thermal feedback."
Response: AO deploys drones to survey the area, combining visual and thermal imaging for comprehensive monitoring.

CUSTOMISABLE FOR HOMES AND ENTERPRISES

AXYMN ONE adapts seamlessly to a variety of environments, whether securing a private residence or managing a large-scale business operation.

For Homes
- Monitor and secure deliveries, track unusual activity, and protect sensitive areas like safes or home offices.
- Enhance safety with features like weapon detection, emotional distress analysis, and thermal imaging.
- Deploy drones to patrol the property, ensuring every angle is covered.

For Enterprises
- Manage access control for employees and visitors with ease.
- Safeguard assets with instant lockdown protocols, drone surveillance, and predictive threat analysis.
- Detect unattended bags and analyse crowd behaviour to optimise safety during events or peak hours.

OUTSTANDING FEATURES THAT DEFINE AXYMN ONE

Weapon Detection
Identify and flag weapons in video feeds before incidents occur.

Emotional Distress Analysis
Detect signs of fear, intimidation, or distress in real time.

Noise Monitoring
Recognise unusual sounds, such as breaking glass or raised voices.

Thermal Imaging
Spot hidden threats and anomalies, even in complete darkness.

Surveillance Drones
Extend your security coverage with live aerial and ground monitoring.

Suspicious Activity Alerts
Identify individuals lingering too long in one location for further investigation.

Unattended Bag Detection
Instantly flag unattended items and assess their potential risk.

Proactive Threat Predictions

Analyse historical and real-time data to anticipate risks.

Real-Time Biometric Alerts

Monitor security personnel for signs of stress or fatigue.

Seamless Integration

Effortlessly link AO with existing systems, IoT devices, and infrastructure.

Lockdown Mode

Instantly activate a full lockdown of your property, securing all access points and activating the alarm system with a simple voice command.

Automated System Activation

Before you leave your property, simply say, "Activate full security mode," and Noah will ensure all cameras, sensors, and alarms are ready.

Proactive Intelligence Beyond Traditional Security

AXYMN ONE doesn't just react—it predicts. By integrating data from surveillance cameras, sensors, logs, and predictive analytics, AO empowers users to stay one step ahead of potential risks.

More than a security system—it's a partner in protection. With NOAH's intuitive voice commands, drone capabilities, thermal imaging, and intelligent analytics, AO delivers a seamless blend of cutting-edge technology and simplicity for residential and commercial environments alike.

Whether you're looking to protect your home, business, or high-value assets, AXYMN ONE ensures peace of mind with unparalleled precision and adaptability.

Unmatched Features for Complete Security Control

CORE SERVICES

AXYMN ONE: Revolutionising Security with Intelligence and Innovation

At the heart of our solutions lies AXYMN ONE, powered by the state-of-the-art NOAH voice-controlled AI interface. Seamlessly integrating advanced analytics, real-time surveillance, and predictive threat detection, AXYMN ONE empowers you to stay ahead of evolving challenges. Complemented by THE A-R-K, and AXYMN FORT a fortified next-generation command centre, our solutions redefine resilience and control, ensuring unmatched security in every environment.

Artificial Intelligence

Our AI-driven solutions redefine security with real-time aerial surveillance featuring HD and thermal sensors for perimeter security, emergency response, and asset protection.

Security Systems

We offer unparalleled, AI-driven protection for residential and commercial properties in the Middle East. With tailored packages combining predictive threat intelligence, swarm drone surveillance, biometric access control, and comprehensive sensor networks, our systems provide real-time crisis response and immersive command centre capabilities. Supported by 24/7 concierge service, strategic consulting, and continuous monitoring, we deliver adaptive security to safeguard your assets, personnel, and reputation.

Business to Business (B2B)

Strategic Security Excellence – We deliver customised, reliable solutions that protect businesses and empower growth. From advanced red teaming exercises that test your defences to bespoke operational strategies, we ensure your systems are resilient against even the most sophisticated threats. Our innovation and dedication keep your operations, assets, and reputation secure in an ever-changing world.

AXYMN EYE

Revolutionising aerial surveillance and data analytics, we harness cutting-edge drone technology and AI-powered insights. From real-time property monitoring and precision agriculture to solar panel inspections, 3D construction mapping, and environmental assessments, our solutions ensure unparalleled accuracy and efficiency, empowering data-driven decisions.

Close & Executive Protection

True security is built on expertise, precision, and trust. With elite professionals from military, intelligence, and law enforcement backgrounds, we provide meticulous planning and advanced tactics to ensure your absolute safety. Your security isn't just our priority—it's our mission.

Monitoring & Response

Shaping the future of security in the Middle East, we deliver AI-driven monitoring and rapid-response keyholding services that are swift, intelligent, and unstoppable. Our solutions transform protection into a powerful force for peace of mind.

OUR SERVICES

Tailored Security Solutions for Every Need

At AXYMN Group, we specialise in delivering comprehensive security solutions tailored to meet the unique requirements of our clients. We recognise that safety is paramount in today's world, and our mission is to provide peace of mind through high-quality, reliable, and proactive security measures. Our team of experts is equipped with cutting-edge technology and specialised training, ensuring your assets, people, and property are always well-protected.

Physical Security Services

Our physical security services are designed to offer robust protection for both public and private spaces. We provide highly trained security personnel, prepared to handle a wide range of security needs, from front desk reception and visitor management to on-site patrolling and emergency response. Our personnel undergo rigorous background checks and receive ongoing training in risk assessment, crisis management, and conflict resolution. Whether it's securing corporate facilities, residential properties, or high-profile events, our guards provide a visible and vigilant line of defence.

Surveillance & Monitoring

We utilise state-of-the-art surveillance technology to deliver 24/7 monitoring and real-time response capabilities. Our electronic surveillance services include the installation of high-resolution CCTV cameras, motion sensors, and access control systems, all monitored by our dedicated control centre. Our surveillance systems are customised to integrate seamlessly into your existing infrastructure, giving you reliable, instant visibility across your facilities. Paired with our responsive team, this electronic surveillance adds an extra layer of security, deterring unauthorised access and enhancing overall safety.

Consulting & Risk Assessment

In addition to providing active security measures, we offer consulting and risk assessment services to identify potential vulnerabilities and develop effective mitigation strategies. Our expert consultants work closely with clients to evaluate existing security protocols, assess risk factors, and recommend improvements aligned with industry best practices. From compliance audits to bespoke security planning, we empower organisations to stay ahead of emerging threats, ensuring every aspect of their security is up to date, effective, and aligned with business goals.

AXYMN Group combines advanced technology with security intelligence to enable clients to achieve operational excellence, confident decision-making, and a safer, more sustainable future.

RESIDENTIAL

GOLD   *NOT COMPATIBLE* WITH AXYMN ONE & NOAH

HIGH END FOUNDATIONAL SYSTEM

Basic AI Analytics
Includes object recognition, behavioural monitoring, and real-time alerts for basic anomaly detection.

Static Cameras
High-definition, night-vision cameras with wide-angle coverage and app-controlled viewing.

Remote Control App
Limited interface to monitor CCTV

Perimeter Security Sensors
Strategically placed sensors around the property to detect intrusions or movement near boundary lines.

Environmental Scanning
Real-time monitoring for changes in temperature, smoke, or air quality within the premises.

Offering a robust entry-level security solution, perfect for individuals or businesses seeking reliable foundational protection. It incorporates Basic AI Analytics for object recognition, behavioural monitoring, and real-time alerts to notify users of basic anomalies, such as unauthorised access or unusual movement patterns.

Static Cameras provide crystal-clear, high-definition visuals with night-vision capabilities, ensuring comprehensive monitoring both day and night. These cameras feature wide-angle coverage, allowing users to monitor large areas effortlessly, and can be controlled remotely through an intuitive mobile app.

Perimeter Security Sensors are strategically placed around the property to detect intrusions or movements near boundary lines, offering an added layer of protection.

The package also includes Environmental Scanning capabilities, which monitor temperature, smoke, and air quality to detect potential hazards such as fires or gas leaks. Together, these features form an efficient and cost-effective security solution for basic needs.

ADVANCED AI-DRIVEN SURVEILLANCE
Contains all features from the previous packages.

Enhanced AI Analytics
Advanced behavioural analysis, facial recognition, and predictive analytics that flag unusual activities.

Dynamic IP CCTV Network
Upgraded cameras with intelligent tracking, auto-focus, and the ability to capture finer details such as number plates and facial features, offering enhanced coverage and integration.

Limited Drone Patrols
Autonomous drones for scheduled patrols and real-time responses to triggered alarms.

Environmental and Audio Sensors
Sensors capable of detecting unusual sounds or hazardous substances, notifying users immediately.

Augmented Reality Features
Partial AR integration for visualising property layouts and camera feeds via the app.

Interactive 3D Map
Real-time property map with drone paths, sensor activity, and live security feeds.

The Enhanced AI Analytics provide facial recognition, behavioural analysis, and predictive anomaly detection to flag potential threats before they escalate. The CCTV system is upgraded to a Dynamic IP CCTV Network, featuring intelligent tracking cameras capable of auto-focusing on moving objects and capturing details such as number plates or facial features. These cameras integrate seamlessly with the system's Limited Drone Patrols, allowing for aerial and ground-level surveillance.

With Augmented Reality (AR) Integration, users can visualise property layouts and camera feeds for real-time threat assessment. The Interactive 3D Map offers a dynamic property overview, displaying drone paths, sensor activity, and live feeds for an immersive security experience.

DIAMOND

COMPATIBLE WITH AXYMN ONE & NOAH

The Diamond Package represents the pinnacle of advanced security, offering unrivalled intelligence and automation for comprehensive protection.

Contains all features from the previous packages.

The CCTV system is elevated to an Ultra-Smart AI CCTV Network, combining 4K resolution cameras with adaptive AI-powered features such as multi-angle tracking, real-time zoom, and panoramic recording. These cameras integrate seamlessly with other security components, such as the Autonomous Drone Surveillance, for a unified monitoring system. The CCTV network also employs edge computing, enabling faster threat detection and response by analysing video feeds locally before sending data to the cloud.

Additionally, Predictive Security Intelligence anticipates threats by analysing movement patterns and user-defined parameters. Sentiment and Gesture Recognition offers advanced threat profiling, identifying aggressive behaviours through tone and body language.

Multi-Modal Biometric Access provides layered security using advanced identifiers like voice, gait, and iris scans.

The AI-Connected Immersive Sensor Network includes LiDAR boundary monitoring, sound profiling, and environmental hazard detection for all-encompassing safety.

With the AR Command Centre, users can interact with virtual property models, deploy drones, and replay incidents for analysis.

Finally, Adaptive Protocols & Smart Scenarios automatically tailor security responses—such as lockdowns or isolation of specific zones—to current conditions. Coupled with Elite 24/7 Monitoring and Rapid Response, this package ensures peace of mind with world-class protection.

THE ULTIMATE AI SYSTEM

Predictive Security Intelligence
Uses AI to anticipate anomalies based on behaviour, movement patterns, and user-defined parameters.

Ultra-Smart AI CCTV Network
Cameras with 4K resolution, adaptive AI features like multi-angle tracking, real-time zoom, and panoramic recording. These cameras utilise edge computing for rapid detection and response.

Sentiment and Gesture Recognition
Detects tone, gestures, and body language, alerting security to potential threats.

Autonomous Drone Surveillance
Drones conduct routine patrols and follow detected targets in real time, acting as virtual guards.

Multi-Modal Biometric Access
Layered identification methods (e.g., voice, gait, iris scanning) for highly secure areas.

AI-Connected Immersive Sensor Network
Incorporates LiDAR boundary monitoring, motion radar, environmental hazards, and sound profiling.

AR Command Centre
Full augmented reality control for virtual monitoring, drone deployments, and interactive incident playback.

Adaptive Protocols & Smart Scenarios
Customisable scenarios (e.g., vacation mode, late-night mode) with automatic room isolation and lockdown features.

Elite 24/7 Monitoring and Rapid Response
Dedicated security professionals with AI support, offering immediate response capabilities.

> The upgraded CCTV system and integration of intelligent technologies make this the ultimate solution for the most demanding security needs.

ENTERPRISE

NOT COMPATIBLE WITH AXYMN ONE & NOAH

FOUNDATIONAL BUSINESS SECURITY SYSTEMS

Basic AI Analytics

Includes object detection, basic anomaly recognition, and real-time alerts for early risk identification.

Static Surveillance Cameras

High-definition, night-vision-enabled cameras with remote access through an app for live viewing.

Perimeter Intrusion Sensors

Monitors boundary areas, providing alerts for unauthorised entry attempts.

Remote Control App

Intuitive mobile interface allowing remote access to camera feeds, alerts, and system settings.

Environmental Sensors

Basic monitoring of temperature, smoke, and air quality, notifying for changes that could indicate fire or hazardous conditions.

Ideal for businesses requiring a strong, reliable foundation with remote monitoring and automated threat detection.

ENHANCED SURVEILLANCE AND ANALYTICS

Contains all features from the previous packages.

Predictive AI Analytics

Uses behavioural pattern analysis and movement tracking to predict unusual activity before it happens.

Incident-Triggered Drone Deployment

Autonomous drones are deployed only in response to detected incidents or triggered alarms. These drones provide rapid situational awareness, capturing real-time footage, offering a comprehensive view of the affected area.

Enhanced Environmental and Audio Sensors

Monitors for irregular sounds (e.g., breaking glass, distress calls) and airborne hazards, with immediate notifications.

Partial Augmented Reality (AR) Integration

Visualises property layouts and camera feeds in the app for easy management and situational awareness.

Interactive 3D Property Map

Live, real-time map showing drone paths, sensor activity, and current security status across the site.

An adaptive security system that integrates AI-driven analytics and drone surveillance, ideal for businesses needing proactive, smart security solutions.

FULL-SPECTRUM AUTONOMOUS SECURITY SOLUTION

Contains all features from the previous packages.

Autonomous Drone Surveillance

Drones conduct routine patrols and switch to 'pursuit mode' for tracking detected threats in real time.

Multi-Modal Biometric Access Control

Incorporates layered identification, including facial recognition, voice, and iris scanning for restricted areas.

AI-Connected Immersive Sensor Network

Incorporates LiDAR boundary monitoring, motion radar, and environmental hazard detection.

AR Command Centre

Full AR-enabled command centre for virtual monitoring, allowing control of drones, cameras, and access points.

Customisable Smart Protocols

Configurable response protocols (e.g., lockdown mode, emergency evacuation) triggered automatically based on specific threat levels.

Enhanced AI Analytics

Advanced behavioural analysis, anomaly detection, and predictive insights based on typical site patterns.

Provides extensive AI-driven protection with a multi-layered approach, ideal for high-security business environments.

VANGUARD *COMPATIBLE* WITH AXYMN ONE & NOAH

THE ULTIMATE ENTERPRISE SECURITY SYSTEM

An all-encompassing, elite security solution, designed for businesses with the highest security requirements and the need for rapid response.

INVITATION ONLY

THE A-R-K FOR RESIDENTIAL

AXYMN A-R-K: Your Advanced Resilient Keep

In a world of uncertainties, the AXYMN A-R-K (Advanced Resilient Keep) stands as the ultimate defence. More than a bunker, the A-R-K is a fortress of safety, comfort, and advanced technology, safeguarding what matters most—your family, your assets, and your peace of mind.

Certified in Europe for military use, these bunkers meet the highest standards of safety and durability, offering secure, reliable solutions for residential.

From shielding you against natural disasters and nuclear fallout to providing sanctuary during civil unrest or EMP attacks, the A-R-K empowers you to not just survive but thrive.

Live Without Limits: Comfort Meets Advanced Technology

The A-R-K combines unparalleled safety with luxurious living. Featuring state-of-the-art AV systems and AI-driven enhancements, every A-R-K is a haven where you can work, relax, and connect seamlessly.

- Command the Room with Advanced AV Systems

- Conduct presentations or virtual meetings with professional-grade audio-visual technology.

- Enjoy high-definition displays and cinema-quality sound for unparalleled entertainment.

- Redundant power systems ensure uninterrupted performance in any crisis.

- Stay Connected with Smart Technology

- Interactive display walls for planning, updates, or immersive entertainment.

- Advanced communication hubs keep you connected to the outside world.

- AI-driven soundproofing creates distraction-free spaces for focus, privacy, or strategic discussions.

Where the A-R-K Protects

The A-R-K adapts to your needs, offering seamless integration into a variety of settings.

Private Homes

- Discreetly installed and fully customisable to blend seamlessly into your property.

Luxury Estates

- Tailored designs that combine security with premium aesthetics.

Urban Residences

- Compact designs, perfect for apartments or city homes.

Holiday Properties

- Durable and weather-resistant, ideal for remote retreats and seasonal homes.

The A-R-K transforms any space into an impenetrable stronghold.

The A-R-K Difference: Strength, Adaptability, and Innovation

Each A-R-K is precision-engineered to tackle the challenges of an ever-changing world.

Underground

- Reinforced with concrete, steel plating, and EMP-resistant materials.
- Fully equipped interiors featuring luxurious living spaces and AV setups.

Above-Ground

- Blast-proof walls and impact-resistant doors, ideal for flood-prone areas.

Modular

- Pre-fabricated for rapid deployment and easily customised to specific needs.

Multi-Purpose Safe Rooms

- Functional spaces for daily use that double as secure shelters.

Compact Urban

- Designed for city living, offering maximum protection in minimal space.

At its core, every A-R-K is powered by AXYMN ONE, a revolutionary AI-driven security system. Equipped with NOAH, your voice-controlled interface, the A-R-K becomes an intelligent guardian, adapting to your needs in real time.

- Proactive Threat Detection
- Surveillance cameras, thermal imaging, and predictive analytics monitor for threats 24/7.
- Emergency Lockdowns
- Secure all access points, deploy surveillance drones, and isolate threats with a single command.
- Custom Voice Commands
- Example: "NOAH, activate presentation mode," to set up AV systems and optimise your environment instantly.

WHY CHOOSE THE A-R-K?

Uncompromising Strength

EMP shielding, blast-proof materials, and advanced engineering.

Ultimate Comfort

Ergonomic interiors and immersive entertainment for refined living.

Seamless Customisation

Adaptable designs for any property or lifestyle.

Advanced Technology Integration

Smart systems keep you secure, connected, and entertained.

Unshakable Peace of Mind

Built for emergencies and long-term crises, protecting your family, assets, and future.

A Legacy of Strength

The A-R-K isn't just a shelter—it's a symbol of resilience and a safer future. With unmatched protection, cutting-edge technology, and uncompromising comfort, the A-R-K transforms your home into a fortress of power.

When the world tests its limits, you'll be ready—inside your A-R-K.

Protect your legacy. Live secure. Thrive in comfort.
Contact us today to design your A-R-K.

THE A-R-K FOR ENTERPRISES

Our underground bunkers and panic rooms are available for purchase with or without AXYMN ONE, NOAH, and additional packages.

The A-R-K by AXYMN Group: Dominate the Unexpected
In a world where uncertainty reigns, the A-R-K (Advanced Resilient Keep) by AXYMN Group stands as the ultimate stronghold for organisations that demand uncompromising security, resilience, and operational continuity. Engineered to safeguard critical infrastructure, protect key personnel, and ensure seamless operations, the A-R-K is more than a shelter—it's a fortified command centre built to withstand the unthinkable.

Certified in Europe for military use, these bunkers meet the highest standards of safety and durability, offering secure, reliable solutions for government agencies.

Whether combating EMP attacks, natural disasters, or civil unrest, the A-R-K empowers corporations and institutions to thrive amidst adversity.

WHERE CAN THE A-R-K STRENGTHEN YOUR ORGANISATION?

The A-R-K is designed to excel in high-risk environments, protecting personnel, assets, and operations across industries:

- Corporate Headquarters & Commercial Facilities

- Protect intellectual property, personnel, and operations to maintain business continuity.

- Government and Defence Sites

- Safeguard classified information, essential operations, and top officials with advanced security.

- Oil, Gas, and Energy Facilities

- Fortify critical infrastructure such as refineries, offshore rigs, and pipelines to ensure uninterrupted production.

- Transportation Hubs

- Defend airports, ports, and rail terminals to maintain passenger safety and operational flow.

- Event Centres and Public Spaces

- Secure high-traffic venues, including stadiums and convention centres, with cutting-edge protection.

Wherever critical operations are at stake, the A-R-K ensures seamless functionality and unmatched security.

Tailored A-R-K Configurations for Every Business Need

The A-R-K is purpose-built for diverse applications, offering unparalleled adaptability and performance.

Hardened Underground A-R-K

- Maximum protection against nuclear fallout, EMP strikes, and catastrophic events.
- Reinforced concrete, steel plating, and self-sustaining systems for resilience.

Above-Ground A-R-K

- Ideal for regions where underground construction isn't feasible.
- Blast-proof walls, impact-resistant doors, and advanced ventilation systems.

Modular A-R-K

- Pre-fabricated, scalable solutions for rapid deployment and flexible expansion.
- Perfect for industries such as oil, gas, and manufacturing.

Command Centre A-R-K

- Advanced communication systems, operational workspaces, and strategic planning tools.

Subterranean Conference A-R-K

- Hidden retreats for executives with high-definition AV systems, soundproofing, and redundant power.

Beyond Shelter: The A-R-K Advantage

The A-R-K is not just a refuge—it's a powerhouse designed to enhance productivity and protect against every threat:

- Crisis Management Hubs
- Maintain decision-making and command capabilities during disruptions.
- Personnel Safe Havens
- Provide secure, comfortable environments for extended lockdowns or emergencies.
- Data Continuity Zones
- Protect IT infrastructure and sensitive data from physical and electronic attacks.
- Emergency Healthcare Facilities
- Convert into bio-secure zones for pandemic response or critical care.
- Secure Asset Storage
- Safeguard financial reserves, proprietary data, and high-value equipment in fortified zones.

- Protect IT infrastructure and sensitive data from physical and electronic attacks.
- Emergency Healthcare Facilities
- Convert into bio-secure zones for pandemic response or critical care.
- Secure Asset Storage
- Safeguard financial reserves, proprietary data, and high-value equipment in fortified zones.

AXYMN ONE: The Intelligence Behind the A-R-K

The A-R-K is powered by AXYMN ONE, an AI-driven system featuring NOAH, your intelligent voice-controlled partner. NOAH transforms the A-R-K into a proactive defence system.

- Proactive Threat Detection
- Real-time surveillance, predictive analytics, and thermal imaging keep threats at bay.
- Instant Lockdowns
- Secure access points, deploy surveillance drones, and activate defence protocols with a single command.
- Custom Voice Commands
- Example: "NOAH, activate conference mode."
- NOAH powers AV systems, encrypts communications, and secures access points.

Why Choose the A-R-K for Your Organisation?
- Unmatched Engineering
- Built to withstand EMP strikes, natural disasters, and man-made threats with absolute resilience.
- Operational Continuity
- Designed for seamless functionality, from boardrooms to command centres, even in extreme conditions.
- Customisable to Your Mission
- Tailored solutions meet the specific demands of your business, facility, or institution.
- Advanced Technology Integration
- AXYMN ONE and NOAH make your A-R-K a smart, self-sustaining hub for communication and strategy.
- Total Peace of Mind
- Protect your people, assets, and legacy with the ultimate assurance of safety and readiness.

The A-R-K: Leading the Future of Resilience

Testament to your strength and foresight, offering unmatched protection and operational excellence. It's not just about preparing for the unexpected—it's about thriving in the face of it.

The world changes. The A-R-K endures.
Contact AXYMN Group today to design your ultimate organisational stronghold.

BUSINESS TO BUSINESS

Our B2B security services allow organizations to leverage our expertise, resources, and advanced methodologies to strengthen their security postures without overextending internal resources. By incorporating Red Teaming and other specialized testing into your security program, we offer a valuable perspective that goes beyond traditional security assessments. Our services provide realistic, intelligence-led insights that empower your business to anticipate and counteract advanced threats before they materialize.

Security Consulting and Risk Assessment

Our consulting team provides in-depth security audits, comprehensive risk assessments, and actionable insights to help businesses understand and address potential vulnerabilities. Tailored to each partner's operational environment, our risk assessments analyse physical, cyber, and procedural weaknesses, with recommendations that integrate seamlessly into existing security frameworks.

Red Teaming Services

As part of our advanced security offerings, our Red Teaming service delivers a realistic, adversary-simulation approach to identifying and addressing vulnerabilities. Our highly trained security professionals simulate sophisticated attacks to test and evaluate your systems, processes, and personnel under real-world conditions. This rigorous testing provides invaluable insights into the strengths and weaknesses of your security measures, helping your business improve its defences proactively.

Penetration Testing and Vulnerability Assessment

In addition to Red Teaming, we conduct thorough penetration testing to evaluate digital and physical vulnerabilities. Our specialists work to identify and rectify weaknesses across networks, applications, and access points, ensuring comprehensive protection from external threats. Vulnerability assessments include reports and actionable steps to strengthen security controls, meeting regulatory requirements and industry best practices.

Personnel Augmentation and Training

For clients needing additional security support, we provide skilled personnel to fill temporary or long-term gaps or to support large-scale projects. Our team also offers specialised training in areas like emergency response, threat detection, and cyber resilience, equipping your staff with the skills necessary to respond to evolving threats. Red Team awareness training is also available to prepare personnel for realistic threat scenarios.

With a team of experts from law enforcement, military, and cybersecurity backgrounds, we bring practical experience and technical knowledge to every engagement. Our commitment to excellence, professionalism, and confidentiality ensures that we operate seamlessly as an extension of your team, delivering customized solutions that are proactive, scalable, and effective.

Advanced Monitoring and Incident Response

We offer around-the-clock monitoring solutions to supplement your internal security efforts. Our team integrates with your systems to deliver real-time monitoring, immediate alerting, and rapid incident response, protecting assets and personnel without disruption to daily operations. In the event of an incident, we coordinate closely with your team to mitigate threats, minimise impact, and restore normal operations swiftly.

Secure Asset Management and Logistics Support

From high-value goods to sensitive data in transit, our asset protection and logistics services ensure security throughout the supply chain. Using secure transportation, GPS tracking, and risk-based route planning, we help businesses move assets safely and manage logistical challenges effectively, reducing risk and maintaining confidentiality.

Technology Integration and Cybersecurity Support

With experience in the latest security technologies, our team offers assistance with system integration, technical support, and cybersecurity solutions. We work with businesses to implement advanced surveillance, access control, and cyber protection measures that align with industry standards, enhancing overall resilience and operational efficiency.

For security firms looking to expand capabilities, corporate entities aiming to optimise security, or facilities management teams striving for comprehensive protection, our B2B services offer trusted, industry-leading support. Partner with us to elevate your security strategy, reduce risk, and build a resilient defence framework that can withstand today's most complex challenges.

AXYMN EYE

AXMYN Group, through its strategic partnerships with Eye in the Skies (EITS) and DataWyse AI, is leading the way in the future of high-resolution drone-based surveillance, surveying, and data analytics. These collaborations have enabled the rapid deployment of cutting-edge technology, allowing AXMYN Group to provide unprecedented services and infrastructure solutions that are scaling globally.

Eye in the Skies has played a key role in designing, researching, and supplying innovative products that continuously evolve in real-time as they mature. Combining drone insights with artificial intelligence, DataWyse AI contributes to this transformation, offering predictive analytics that reshape industries and provide actionable insights with long-lasting, real-world applications.

PROPERTY SURVEILLANCE AND MONITORING

Real-Time Surveillance

High-definition drones, equipped with thermal imaging sensors, provide live-feed surveillance of properties, enhancing security while reducing the need for on-site personnel.

Perimeter Security Monitoring

Drones patrol large perimeters, detecting unauthorised access and monitoring potential security risks, ensuring comprehensive protection.

AGRICULTURAL SURVEYING

Crop Health Monitoring

Drones with multispectral and thermal sensors provide in-depth images of crops, enabling precise assessment of plant health, stress levels, and early detection of disease or pests.

Soil Analysis

Advanced infrared and spectral imaging gather crucial data on soil moisture, nutrient levels, and pH, helping farmers optimise irrigation and fertilisation for improved crop yield.

Yield Prediction and Optimisation

By analysing plant health and soil conditions, drones can forecast yield, allowing farmers to allocate resources more effectively and boost profitability.

SOLAR PANEL INSPECTION

Thermal Imaging for Fault Detection

Drones equipped with thermal cameras conduct thorough solar panel inspections, identifying hotspots, faults, or malfunctioning cells, ensuring optimal energy efficiency.

Preventive Maintenance Analysis

Drones help set up regular inspection schedules to detect potential issues early, reducing repair costs and extending the lifespan of solar installations.

CONSTRUCTION AND LAND SURVEYING

3D Mapping and Modelling

Equipped with high-resolution cameras and LiDAR sensors, drones produce accurate 3D models and topographic maps of construction sites, assisting with planning, earthworks, and project tracking.

Volume and Distance Calculations

Drone surveys are used to calculate material volumes and measure distances, making construction project management—such as mining, civil construction, and road building—more efficient and cost-effective.

Safety Monitoring

Drones inspect difficult-to-reach or hazardous areas, improving site safety by reducing the need for human intervention in dangerous zones.

ENVIRONMENTAL AND WILDLIFE MONITORING

Ecosystem Health Assessment

Drones monitor forest density, plant health, and invasive species, providing valuable data to help conservationists maintain ecosystem balance and biodiversity.

Wildlife Tracking and Conservation

Equipped with infrared and thermal sensors, drones track animal movements and monitor habitats, supporting conservation efforts without disturbing wildlife.

Coastal and Wetland Monitoring

Drones provide crucial data on coastal erosion, wetland health, and water quality, aiding agencies in monitoring and protecting sensitive environmental areas.

INSURANCE INSPECTION AND CLAIMS ASSESSMENT

Property Damage Assessment

Drones quickly survey damage in post-disaster scenarios, allowing insurance companies to process claims faster and assess damages with greater accuracy.

Risk Analysis

Drone surveillance assists with risk assessment for properties and construction sites, ensuring more accurate policy pricing and reducing liability.

AXYMN FORT

Advanced Security Barriers, Bulletproof Doors & Windows, and Vehicle Recognition Systems in the Middle East

AXYMN Group is a trusted leader in high-performance security systems, offering advanced barriers, integrated technologies, and premium-grade security solutions tailored to meet the region's highest safety standards. Our innovative solutions are ideal for military, industrial, governmental, commercial sites, residential compounds, or even individual residences, providing superior protection and enhanced access control for any requirement.

OUR PREMIUM PRODUCTS

Road Blockers, Bollards, and Barriers
- Impact-Tested: Designed to withstand lorry attacks and extreme force.
- Seamless Operation: Easily controlled via the proprietary AXYMN ONE & NOAH systems.

High-Security Gates and Tyre Killers
- Durability Guaranteed: Built to ensure reliable vehicular access control.
- Perfect for high-risk environments, adaptable for residential entryways or even private homes.

Surface Mount Under Vehicle Recognition Systems (UVRS)
- Advanced Scanning Technology: Scans, inspects, and records the underside of vehicles.
- High-Resolution Monitoring: Equipped with digital scanning cameras for precise, real-time imaging.
- Ideal for facilities, residential compounds, and individual residences requiring strict security protocols.

Bulletproof Doors and Windows
- Certified Protection: Built with advanced materials to withstand ballistic and forced entry threats.
- Customised Designs: Tailored to match architectural requirements without compromising security.
- Fully compatible with AXYMN ONE & NOAH systems for seamless access control and real-time monitoring integration.

Integrated Smart Security Features
- Suspicious Object Detection
- Automatically flags suspicious items during under-vehicle scans.
- Displays potential threats in real time on monitoring screens.
- Advanced Monitoring & Compatibility
- Integrates seamlessly with road blockers, bollards, barriers, bulletproof doors, and Automatic Licence Plate Recognition (ALPR) systems.
- Enables centralised control for comprehensive security coverage.
- Face Image Capture
- Captures and records driver images alongside vehicle plate details.
- LED-enhanced cameras ensure clear imaging, even in low-light conditions.

- AXYMN ONE & NOAH Integration
- Centralises the management of all security devices, including barriers, UVRS, and bulletproof infrastructure.
- Allows real-time data sharing and advanced automation for unmatched operational efficiency.

EXPANDED FUNCTIONALITY FOR ALL APPLICATIONS

Our systems are versatile and can be customised to suit a variety of security needs, from large-scale facilities to residential compounds or even individual homes.

ACCESS CONTROL OPTIONS

Card Readers
Simple, secure access for residents or authorised individuals.

Biometric Readers
Advanced fingerprint or hand-shape recognition for enhanced security.

Radio Control & On/Off Key Switches
Ideal for gated communities or individual residences.

SAFETY ACCESSORIES

Dual Vehicle Safety Loop Detectors
Prevents accidental operation and ensures safety at entrances.

Red/Green Traffic Lights
Provides clear guidance for vehicles entering or exiting.

WHY CHOOSE AXYMN GROUP?

Unmatched Expertise
Leaders in advanced security systems.

Tailored Solutions

Designed to meet the Middle East's most stringent security requirements, whether for large facilities, gated communities, or individual homes.

Comprehensive Protection
Built to safeguard critical infrastructure, private communities, and single residences with robust measures like bulletproof doors and windows.

Seamless Integration
Fully compatible with existing security systems and controlled via the proprietary AXYMN ONE & NOAH platform.

Safeguard What Matters Most
Whether for high-security facilities, residential compounds, or even a single residence, AXYMN Group offers robust, reliable, and state-of-the-art security solutions tailored to meet your needs.

AXYMN ROBOTICS

Redefining Security, Intelligence, and Operational Resilience

AXYMN Robotics combines adaptability, precision, and innovation to set a new standard in modern security. Designed for individuals, corporations, and governments, these advanced quadruped robotic systems deliver cutting-edge solutions to meet diverse operational needs.

WHAT MAKES AXYMN ROBOTICS UNIQUE

Customisable Solutions

Modular designs tailored to residential, commercial, and industrial applications. Payloads and sensors can be configured to meet specific requirements.

Advanced AI Integration

AI-driven analytics enable predictive threat detection, real-time decision-making, and actionable intelligence

LIDAR and 3D Mapping

High-performance LIDAR systems provide detailed scanning capabilities for terrain analysis, infrastructure mapping, and enhanced situational awareness.

Uninterrupted Operations

Auto-charging systems and rugged durability ensure continuous performance, even in extreme conditions.

Rapid Deployment

Pre-fabricated designs make installation quick, enabling immediate operational readiness.

CORE CAPABILITIES

Multi-Terrain Mobility

Navigate stairs, rubble, and waterlogged areas effortlessly across diverse environments.

LIDAR and 3D Modelling

Generate precise models of properties, disaster zones, or infrastructure for planning and recovery.

High-Performance Sensors

Detect intrusions, hazardous materials, and anomalies with HD imaging, thermal sensors, and gas detectors.

Covert Operations

Silent and discreet operation makes these robots ideal for sensitive missions.

Modular Payloads

Add robotic arms, surveillance tools, or specialised equipment to handle diverse tasks, from inspections to emergency support.

APPLICATIONS ACROSS INDUSTRIES

Residential Security
Autonomous patrols and advanced threat detection for estates and urban residences.

Corporate Facilities
Monitor warehouses, industrial plants, and data centres with precision.

Critical Infrastructure
Inspect pipelines, tunnels, and power plants while ensuring operational integrity.

Disaster Recovery
Use LIDAR and advanced mobility to navigate hazardous zones and support evacuations.

Public Safety
Monitor large crowds and provide real-time updates during events or emergencies.

WHY CHOOSE AXYMN ROBOTICS?

Adaptability
Performs seamlessly in urban, rugged, and industrial environments.

Efficiency
Reduces manpower while enhancing accuracy and operational speed.

Reliability
Trusted in global deployments, designed for high-pressure scenarios.

Future-Proof Design
Modular systems and continuous upgrades ensure long-term value.

Innovative Technology
Advanced AI, LIDAR scanning, and high-performance sensors redefine modern security.

KEY FEATURES

AI-Driven Insights
Predictive analytics enable smarter, proactive responses.

LIDAR Precision
High-resolution scanning enhances planning and situational awareness.

Durable Build
Built to perform in extreme conditions with EMP shielding and waterproofing.

Seamless Integration
Functions autonomously or as part of a broader security network.

The Future of Robotics and Security
AXYMN Robotics transforms how we approach security, surveillance, and operational efficiency. With AI-driven intelligence, LIDAR scanning, and unparalleled adaptability, these systems empower you to tackle modern challenges with precision and confidence.

Designed for resilience, built for the future.

SECURITY SYSTEMS

Our Security Systems service provides cutting-edge solutions to safeguard residential, commercial, and industrial properties. We specialise in the installation of state-of-the-art CCTV systems and advanced access control solutions, delivering unparalleled protection through seamless integration of modern technology. Leveraging the power of AI-driven innovation, our systems offer smart, efficient, and reliable security tailored to meet the unique needs of each client.

Advanced CCTV Surveillance

Our CCTV systems incorporate the latest in surveillance technology, offering high-definition video recording, night-vision capabilities, and wide-area coverage. With AI-powered analytics, our systems can detect unusual activities, recognise faces, track movements, and send real-time alerts. This ensures proactive security management and reduces the likelihood of breaches. Remote access via mobile devices or computers allows clients to monitor their properties from anywhere in the world.

Access Control Solutions

Our access control systems provide secure and efficient management of entry points for residential and commercial properties. Using technologies such as biometric readers, keycard systems, and PIN codes, we ensure that only authorised personnel can access restricted areas. AI integration enhances these solutions by enabling intelligent monitoring of access patterns, detecting anomalies, and providing actionable insights to optimise security protocols.

Remote Monitoring and Management

Our systems are equipped with remote monitoring capabilities, enabling clients to access live feeds, manage access permissions, and receive instant notifications of suspicious activity. Whether at home or on the go, our user-friendly interfaces ensure that clients are always in control of their security.

AI Integration for Smarter Security

AI is at the heart of our security systems, transforming them into intelligent solutions that adapt and respond to your unique requirements. Features such as behavioural analysis, licence plate recognition, and real-time data processing empower clients to stay ahead of potential risks. Our AI-powered systems can distinguish between threats and harmless events, reducing false alarms and streamlining security operations.

Custom Design and Installation

Every property is unique, and so are its security needs. Our team conducts thorough site assessments to design a bespoke security system tailored to your layout, risk profile, and objectives. From planning optimal camera placement to integrating access control points, our installation process ensures full coverage and maximum effectiveness.

Scalability and Upgradability

Our systems are designed to grow with your needs. Whether expanding coverage, adding new access points, or upgrading to the latest AI features, our solutions are built to be future-proof, ensuring long-term value and adaptability.

Our Security Systems service offers more than just technology—it delivers peace of mind through reliability, innovation, and tailored solutions. By incorporating AI, we provide a level of efficiency and intelligence that transforms traditional surveillance and access control into proactive security measures. Our systems not only protect your property but also empower you with insights and tools to manage risks effectively.

MONITORING, RESPONSE & KEY HOLDING

Our Monitoring, Response, and Keyholding service offers a dependable, all-inclusive security solution to ensure round-the-clock protection, rapid incident response, and secure property access management. Tailored for residential and commercial properties, this service combines cutting-edge technology with professional expertise to prioritise safety, reliability, and efficiency. Whether securing a home, office, or large estate, we deliver unmatched peace of mind.

24/7 Monitoring and Surveillance

Our dedicated security team provides continuous, real-time monitoring of your property using advanced surveillance systems and alarm technology. Immediate alerts for irregularities, such as break-ins or unauthorised access, ensure that potential threats are swiftly identified and addressed. We can integrate with your existing systems or design bespoke solutions to meet your needs.

Rapid Incident Response

In the event of a security breach or emergency, our highly trained response team is dispatched immediately—day or night. From managing intrusions to resolving technical security issues, our rapid response minimises risks, reduces property damage, and reinforces the safety of occupants and assets.

Professional Keyholding Services

As trusted keyholders, we securely manage your property keys, enabling on-site responses whenever necessary. We handle access for authorised personnel, manage emergencies, and conduct regular security checks with utmost discretion and care, ensuring the highest level of privacy and confidentiality.

Alarm Response and Verification

When an alarm is triggered, our team promptly verifies the cause, distinguishing between false alarms and genuine threats. Through thorough property inspections, we ensure swift intervention when required while minimising unnecessary disruptions, delivering precision in every response.

Incident Reporting with Full Audit

In the event of an incident, our officers provide a comprehensive audit report detailing the situation, findings, and actions taken. Reports include timestamped photos and are promptly uploaded to the customer portal on the app, giving clients instant access to critical updates and full visibility of their property's security.

Routine Security Inspections

We conduct regular on-site inspections to ensure all doors, windows, locks, and security equipment are secure and operational. These proactive checks identify potential vulnerabilities and maintenance needs, enhancing overall property safety and performance. Following each inspection, detailed reports, including findings and recommendations, are promptly uploaded to the customer portal on our app interface. This ensures clients have instant access to real-time updates, fostering transparency and effective security management.

Comprehensive Full Site Surveys

Our monitoring and response team conducts comprehensive full site surveys to evaluate potential vulnerabilities and design tailored security solutions for each client's unique needs. These in-depth surveys examine access points, existing systems, and overall site layout, ensuring the optimal placement of monitoring equipment and rapid response capabilities. By proactively identifying and mitigating risks, our full site surveys provide clients with enhanced protection and greater confidence in the strength of their security infrastructure.

Emergency Coordination and Support

In major incidents, we coordinate directly with local authorities, emergency services, and other relevant personnel to ensure a safe and efficient resolution. From police and fire brigade involvement to emergency repairs, we handle all communications and logistics for a stress-free outcome.

Our Monitoring, Response, and Keyholding services are designed to provide a seamless, full-service security solution for homeowners and businesses. With our expert team, you gain 24/7 security coverage, efficient access management, and comprehensive reporting, all available via the app. Whether responding to emergencies or delivering proactive security measures, we ensure your property remains secure every day of the year. Let us be your trusted partner in property protection, delivering safety and peace of mind at every step.

Our team is trained to handle all security situations with professionalism and precision, responding to emergencies and ensuring secure access management without disrupting your daily routine. With our services, you have the peace of mind of knowing that your property is always secure, regardless of your location. Let us be your trusted partner in property protection, delivering a comprehensive, responsive solution that keeps you safe and secure every day of the year.

CLOSE / EXECUTIVE
PROTECTION

In a world where threats can arise at any moment, only the most elite protection will do. Our Close Protection services are built for those who demand absolute security. With operatives drawn from the highest levels of military, intelligence, and law enforcement, we bring unmatched expertise, tactical precision, and an unrelenting commitment to your safety.

Personal Security Detail (PSD)

Our highly trained Close Protection Officers (CPOs) provide direct personal security, maintaining a secure perimeter around clients at all times. Our officers are skilled in risk assessment, defensive tactics, and emergency response, ensuring they can act swiftly and effectively in any situation. PSD services are tailored to the client's needs, whether for high-profile events, business travel, or daily routines.

Advance Security Planning and Risk Assessment

Prior to any engagement, we conduct an extensive risk assessment, analysing locations, schedules, and any potential threat factors. Our team meticulously plans every detail of a client's itinerary to identify potential risks, ensuring that all environments are secure and any vulnerabilities are addressed proactively.

Route Planning and Secure Transportation

For clients on the move, our Close Protection services include secure transportation with expertly trained drivers and meticulously planned routes to avoid risk-prone areas. Our team leverages advanced technology to monitor routes in real time, ensuring clients are always transported safely and efficiently.

Residential and Corporate Security

We extend our Close Protection services to provide continuous security in residential or corporate environments. Our team conducts thorough checks of premises, ensuring secure access control, surveillance, and safe zones. Whether for short stays or permanent residences, we offer round-the-clock protection that gives clients peace of mind at home or at work.

Event and Public Appearance Security

When attending high-profile events or making public appearances, our Close Protection Officers implement layered security protocols to manage crowds, control access, and ensure client safety in dynamic, often unpredictable, environments. Our officers are trained to operate discreetly, minimising disruption while maintaining an impenetrable security perimeter around clients.

Emergency Response and Crisis Management

In the case of emergencies, our Close Protection team is prepared with contingency plans and rapid response protocols. Each officer is trained in crisis management, medical response, and evacuation procedures, ensuring the highest level of client safety and security in unforeseen situations. Our team operates with precision under pressure, safeguarding clients through even the most critical incidents.

Discreet and Adaptable Protection

We understand that each client's needs and environment vary significantly, which is why our Close Protection services are designed to be adaptable. Our officers can provide either a visible security presence to deter potential threats or operate in a more discreet, low-profile manner as required by the situation or the client's preference.

Royals and Heads of State

Providing discreet and unparalleled protection for global leaders and dignitaries.

Executives and Business Leaders

Shielding key decision-makers from targeted threats in public and private settings.

Diplomats and Government Officials

Maintaining absolute security in volatile or high-risk environments.

High-Net-Worth Individuals and Families

Guarding your privacy and legacy with precision and discretion.

Celebrities and Public Figures

Preventing breaches of security while allowing you to maintain focus and presence.

Athletes and Sports Teams

Protecting professionals and teams in high-visibility situations.

Journalists and Media Personnel

Delivering protection in conflict zones and during sensitive assignments.
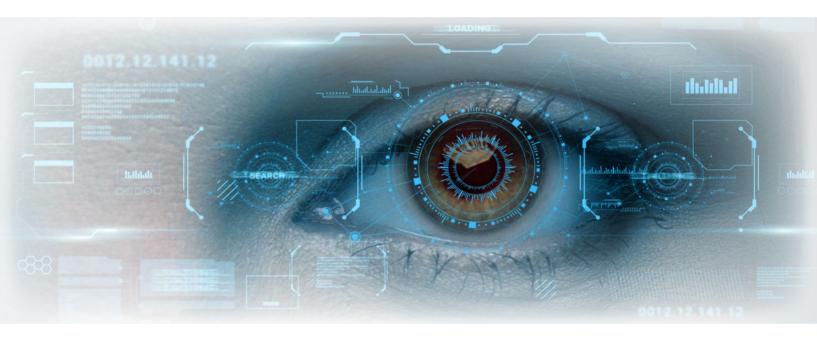

Event Attendees and Speakers

Securing venues and attendees during public engagements.

Tourists and Visitors

Ensuring peace of mind in unfamiliar territories.

CYBER SECURITY
AUDITING

Our cybersecurity audits provide more than just a checklist approach; they deliver a strategic roadmap for improving your security framework. Our team of certified cybersecurity professionals combines years of industry experience with deep technical knowledge, ensuring that every audit is both thorough and tailored to your specific environment. We work collaboratively with your team to develop realistic, actionable recommendations that enhance security without disrupting operations.

With our Cybersecurity Auditing service, you gain confidence knowing that your organisation's digital assets are protected against the latest threats. By identifying vulnerabilities, enhancing compliance, and strengthening defences, we help you build a resilient cybersecurity foundation that supports sustainable growth and protects your reputation. Let us partner with you to elevate your cybersecurity posture and safeguard your business in today's ever-evolving threat landscape.

Our Cybersecurity Auditing services provide a comprehensive, in-depth evaluation of your organisation's digital defences to ensure robust protection against cyber threats. With cyber risks evolving rapidly, our auditing services are designed to identify vulnerabilities, assess compliance, and offer actionable recommendations to strengthen your cybersecurity posture. Our experienced team uses industry-leading methodologies and cutting-edge tools to deliver customised audits that suit your specific security needs and regulatory requirements.

Penetration Testing

Our expert auditors conduct controlled penetration tests to simulate real-world cyberattacks, assessing how well your systems can withstand potential breaches. This hands-on approach allows us to evaluate your defences against sophisticated cyber threats and provide a realistic view of your security capabilities.

Access Control and User Permissions Audit

Our auditors review user access levels, permissions, and authentication methods across your organisation, ensuring that only authorised personnel have access to sensitive systems and data. We help implement multi-factor authentication, role-based access, and other security measures to prevent unauthorised access.

Compliance and Regulatory Review

Cybersecurity regulations and standards such as GDPR, HIPAA, and PCI-DSS have stringent requirements. Our audit service includes a thorough review of your organisation's compliance status, highlighting gaps and providing guidance on achieving full regulatory compliance to avoid fines and enhance trust with stakeholders.

Data Protection and Privacy Audit

Protecting customer and internal data is paramount in today's business landscape. We audit your data handling practices, encryption measures, and privacy policies to ensure they align with industry standards and safeguard sensitive information against unauthorised access or leaks.

Incident Response Readiness

We assess your organisation's readiness to respond to a cybersecurity incident, examining your existing response protocols, backup solutions, and recovery plans. Our audit identifies areas for improvement, ensuring your team is prepared to minimise downtime and data loss in the event of an attack.

Network Security Audits

We evaluate the security of your network architecture, including firewalls, routers, and access points, to ensure data flow is well-protected. Our audit reviews access controls, encryption protocols, and network segmentation to safeguard sensitive data and limit unauthorised access.

GLOBAL ASSET PROTECTION

Our Global Asset Protection services, including Secure Moving Asset solutions, are tailored to safeguard high-value items, sensitive documents, and priceless artefacts—whether they are located across the Middle East or transported globally to and from the region. Recognising the unique requirements of these assets, we provide specialised handling and security with an emphasis on confidentiality, comprehensive risk assessment, and expert logistics. From fine art and luxury items to confidential data and high-value equipment, our trusted services minimise exposure to theft, damage, and unauthorised access, ensuring your most prized and sensitive possessions are fully protected.

Risk Assessment and Security Planning

Each asset presents distinct vulnerabilities, and our first step is to conduct a thorough risk assessment. We evaluate factors such as the asset's location, value, transportation route, and specific security risks to devise a bespoke protection plan. These plans include tailored protocols to address the unique needs of each asset, ensuring the highest level of security whether in storage or in transit.

On-Site Asset Security

For assets remaining on-site, we implement cutting-edge protection measures to safeguard against unauthorised access, theft, and environmental risks. This includes high-grade surveillance systems, access control mechanisms, and alarm response solutions. Our team conducts routine inspections and monitoring to ensure assets are secure around the clock, with advanced systems designed to provide 24/7 protection.

Secure Global Asset Transportation

When assets need to be transported, our Secure Moving Asset solutions provide unparalleled security and care for both local moves across the Middle East and international transit. Our secure transportation service uses armoured vehicles, GPS tracking, and secure routing to minimise risks during the journey. Each route is meticulously planned, taking into account optimal paths, real-time monitoring, and risk mitigation strategies to ensure smooth and secure transit.

Highly Trained Security Escorts

Our Secure Moving Asset service includes an escort team of experienced professionals trained in close protection and global transport logistics. These personnel accompany valuable assets throughout the journey, ensuring they remain protected at every stage. With expertise in handling a variety of security scenarios and equipped with advanced tools and technology, our escorts are prepared for immediate response to any potential threats.

Environmental Protection and Packaging Solutions

Delicate and sensitive assets such as fine art, antiques, or specialised equipment require customised packaging and environmental controls. We offer solutions like climate-controlled vehicles, shock-resistant cases, and advanced packaging techniques to safeguard assets from temperature changes, vibration, and other potential hazards during transit or storage.

Real-Time Monitoring and Incident Response

All assets in transit are monitored in real-time, enabling immediate response to potential security incidents. Using GPS tracking and secure communication systems, our team remains updated on the asset's location and condition. In the event of disruptions, our rapid-response protocols are activated to ensure the security and integrity of your assets.

Confidentiality and Discretion

We understand the sensitive nature of asset protection and ensure the highest levels of confidentiality across all services. Operating with discretion, our team avoids drawing unnecessary attention to high-value items, prioritising professionalism and respect for client privacy. From the Middle East to global destinations—or vice versa—our processes are designed to protect your assets securely and discreetly.

Whether your assets are stored locally, transported across the Middle East, or moved internationally, our Global Asset Protection services provide comprehensive, secure solutions to meet your needs.

RESIDENTIAL
SECURITY TEAM

Our Residential Security Team (RST) service offers a comprehensive, high-level security solution tailored to protect residential properties and estates while ensuring peace of mind for residents. Designed for private estates, family homes, and high-profile residences, our RST service provides 24/7 protection, combining advanced technology with expert security personnel. With a proactive approach to threat detection, prevention, and emergency response, our team seamlessly integrates into the residential environment, delivering a secure, safe atmosphere for occupants without disrupting their lifestyle.

24/7 On-Site Security Presence
Our highly trained Residential Security Officers provide a constant security presence on-site, monitoring the property, managing access, and responding instantly to any incidents. Available around the clock, our officers are skilled in handling diverse security scenarios, from routine checks to high-stakes emergencies, ensuring the property remains safe at all times.

Perimeter Surveillance and Monitoring
Equipped with advanced surveillance technology, our RST actively monitors the property perimeter to detect and deter unauthorised access. Using high-definition cameras, motion sensors, and night-vision capabilities, we maintain a secure boundary, giving clients a visible deterrent against potential intrusions.

Access Control and Visitor Management
Our RST team manages all entry and exit points on the property, ensuring that only authorised individuals gain access. We implement strict access protocols, verifying the identity of all visitors, contractors, and service providers. This not only safeguards the property but also preserves the privacy and security of the residents.

Patrols and Security Inspections
Regular patrols and security inspections are conducted throughout the property to identify any unusual activity or vulnerabilities. Our team maintains constant vigilance, thoroughly checking every corner of the residence and property grounds to ensure comprehensive coverage and early threat detection.

Our Residential Security Team offers an unparalleled level of security that combines professional expertise, advanced technology, and a customised approach tailored to each client's unique lifestyle and property layout. Each RST member is rigorously trained in residential security, with extensive experience in protective services, ensuring they are prepared to handle any situation with professionalism and poise.

Emergency Response and Crisis Management

In case of an emergency, our Residential Security Team is trained to respond immediately and effectively, coordinating evacuation routes, medical support, and crisis containment as necessary. Each team member is certified in emergency response, from first aid to fire safety, and operates under a well-defined crisis management protocol to protect residents during critical situations.

Discreet, Family-Focused Security

Our RST is designed to integrate seamlessly into the residential environment, maintaining discretion while delivering top-notch security. Our team is trained to provide a reassuring yet unobtrusive presence, prioritising client comfort and privacy, especially in family settings. We understand the importance of security that supports a peaceful home life, and our personnel are skilled in blending into family dynamics without disruption.

Alarm System Integration and Rapid Response

We work with the latest in security alarm technology, integrating with existing systems or installing custom solutions as needed. In the event of an alarm activation, our team initiates immediate protocols to assess and respond to the situation, ensuring rapid action and effective containment of any potential threat.

Regular Security Audits and Risk Assessments

As part of our service, we conduct regular security audits and risk assessments to stay ahead of potential threats. By evaluating the property's security measures, identifying vulnerabilities, and adapting to changing needs, we ensure that the property remains a fortified environment, prepared to counter evolving risks.

By choosing our RST services, clients receive a highly personalised and proactive security solution that protects not just their residence, but also the people, assets, and sense of privacy that matter most to them. We go beyond basic security, building a trustworthy presence that you and your family can rely on, day and night. Let us safeguard your home and peace of mind with a dedicated Residential Security Team that is as committed to your safety as you are.

vehicle, utilising high-definition cameras, motion detection, and thermal imaging where applicable. Our surveillance solutions help detect and deter potential threats in real-time, providing clients with a layer of invisible protection.

Counter-Surveillance Tactics

We employ counter-surveillance measures to identify and neutralise any covert monitoring or tracking efforts. By continuously analysing surroundings, routes, and patterns, our team detects and disrupts potential attempts to surveil or follow our clients, adding an extra layer of discretion and security.

Electronic Countermeasures (ECM)

Our countermeasure services include the use of electronic countermeasures to detect and block potential eavesdropping devices or hacking attempts. For private jets, vehicles, or buildings, our ECM solutions prevent unauthorised interception of communications, safeguarding client privacy and sensitive information.

Secure Transportation and Escort Services

We offer secure ground and air transportation, ensuring safe transit from one location to another. Our team of highly trained security drivers and personnel is equipped with tactical training and defensive driving skills to handle any potential threats en route. In addition, we provide discreet escort services for added security during high-profile or high-risk travel.

Entry and Access Control

For buildings or any occupied space, we implement strict access control measures, including biometric verification, controlled entry points, and layered security zones. These controls prevent unauthorised access and ensure that only trusted individuals can approach sensitive areas.

Our Tactical Countermeasure services are designed to provide elite-level security for clients in private jets, vehicles, and occupied buildings. With a focus on proactive risk management and advanced protection strategies, we ensure that clients remain safe, secure, and at ease in high-risk or sensitive environments. Utilising state-of-the-art technology, expert personnel, and discreet tactics, our countermeasure solutions are customised for each client and situation, offering unparalleled safety assurance.

Emergency Response and Evacuation Planning

In the event of an immediate threat or crisis, our tactical countermeasures include rapid response and evacuation protocols. We conduct drills, assess escape routes, and prepare contingency plans so that our clients are prepared for any situation. Our security personnel are trained to act swiftly and decisively, ensuring clients' safe extraction to secure locations.

Physical Protection and Reinforcement

Our countermeasure solutions also involve physical reinforcements, such as ballistic protection in vehicles, armoured doors in buildings, and secure zones within private jets, creating a safe space that protects clients in the event of a direct threat.

Our Tactical Countermeasure services prioritise discretion, adaptability, and state-of-the-art technology to provide comprehensive protection across any environment. Our team of security specialists brings extensive experience from military, intelligence, and private security backgrounds, ensuring that every plan is executed with precision and care. We tailor each countermeasure solution to meet the unique needs of each client, adapting to the specific risks of their location or travel scenario.

With 24/7 support and a commitment to seamless, invisible protection, we deliver peace of mind and security that goes beyond traditional protective services. Our solutions are designed to create a shield around our clients, ensuring their safety in any setting—from private jets and vehicles to corporate offices and residences. Let us provide the highest standard of tactical countermeasures, so you can focus on your journey or stay with absolute confidence.

BESPOKE SPECIALISED PERSONAL & FAMILY PROTECTION DOGS

At AXYMN Group, we redefine the meaning of security, loyalty, and sophistication with our world-class protection dogs. These are not just trained animals—they are the ultimate standard in elite protection, surpassing even the capabilities of military and police K9 units.

Our dogs are hand-selected from Europe's most prestigious breeders, where we secure first pick of every elite litter—before even law enforcement agencies such as the UK police force have access. These breeders are globally renowned for producing world champion title-holding dogs with impeccable genetics. Only the most exceptional bloodlines, characterised by unrivalled intelligence, physical prowess, and temperament, are chosen for our programme. This exclusivity ensures that every AXYMN dog represents the pinnacle of canine potential.

Raised in family environments and exposed to real-world conditions from birth, AXYMN dogs are developed to thrive in household settings. Surrounded by children, families, and livestock. They grow into calm, confident, and highly adaptable companions. These are not simply protection dogs; they are deeply loyal family members with an unwavering commitment to their owners.

Trained at the UK's most advanced facility, our dogs undergo an unparalleled training process that exceeds any standard seen in the military or police. Every AXYMN dog is forged through an intensive and rigorous programme designed to deliver unmatched protection, flawless behaviour, and effortless integration into your lifestyle.

Each dog undergoes comprehensive health screenings, including genetic evaluations and veterinary assessments, to guarantee they are in peak physical and mental condition. Every dog is also microchipped for secure identification, giving you total confidence in their safety and traceability.

Unmatched Standards in Personal and Family Protection

Imagine owning a protection dog so advanced that it instinctively differentiates between genuine threats and routine situations, protects your loved ones without hesitation, and maintains impeccable behaviour—whether in a bustling home, high-stakes business setting, or among society's elite.

Each AXYMN Protection Dog is

- **Custom-Built for You:** Every dog's training programme is tailored to your specific lifestyle, home, and security needs. Whether you seek discreet personal protection or complete family safeguarding, your dog will be uniquely suited to your environment.

- **Raised for Real-World Compatibility:** Every AXYMN dog is raised in family homes, surrounded by children, to ensure they are calm, affectionate, and trustworthy companions. Their early exposure to livestock—including horses—makes them adaptable and ideal for diverse settings.

- **Sophisticated and Socially Elegant:** Trained to seamlessly navigate high-society environments, your dog will respond to multilingual commands, exhibit flawless public behaviour, and integrate smoothly into private or professional settings.

- **Beyond Elite:** Trained to standards far beyond military and police K9 units, AXYMN dogs deliver a level of protection, loyalty, and precision that is simply unmatched.

- **Handpicked from Excellence:** Our partnership with Europe's most renowned breeders guarantees first access to the finest litters, ahead of law enforcement agencies, ensuring every dog we select represents the pinnacle of the world's best bloodlines.

A Companion for Life

With AXYMN, you are not just acquiring a dog—you are bringing home a loyal companion, an unshakable protector, and a lifelong best friend. Raised with children and loved as part of a family, our dogs form profound, unbreakable bonds with their owners. They offer unwavering protection while providing unconditional love and affection. They are more than guardians—they are family.

A Luxury Service Designed Around You

At AXYMN Group, we understand that acquiring a protection dog is a significant, life-changing investment. We ensure that your experience is seamless, sophisticated, and tailored to meet your exact needs.

Our Premium Service Includes

Prepared for UAE Living

Every dog is fully compliant with UAE import regulations, undergoes exhaustive health checks, and comes with an international passport for global travel. Each dog is also microchipped for secure ownership and peace of mind.

Exclusive 14-Day Handover Training

To ensure a seamless transition, we provide up to 14 days of intensive, in-home handover training at your UAE residence. Our experts work closely with you and your family, guiding you through every aspect of your dog's commands, capabilities, and unique personality, ensuring the bond begins immediately.

Ongoing World-Class Support

- Complimentary video review two weeks after delivery.
- Three in-person reviews to refine and strengthen your bond.
- Continued support with no additional fees to ensure long-term success and satisfaction.
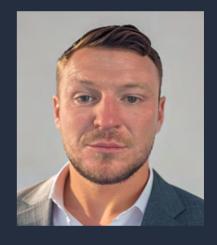

OUR TEAM

The eight visionaries at the helm of AXYMN—our senior management and directors who lead with unwavering determination and strategic expertise. They oversee a team of over 15 dedicated professionals across various departments, driving innovation, precision, and exceptional outcomes in all that we do. With a clear focus on excellence, they ensure every project is executed to the highest standard. Their collaborative approach fosters a culture of growth, empowering the team to continually push boundaries and deliver groundbreaking solutions.

NATURE OF THE THREATS

1.   Indiscriminate Targets

The UK Foreign, Commonwealth & Development Office warns that terrorist groups may target crowded public areas, tourist destinations, transport hubs, and infrastructure. These attacks are likely to be aimed at places frequented by foreign nationals, including hotels, shopping centres, beaches, restaurants, and places of worship.

2.   Historical Incidents

The UAE experienced missile and drone attacks in 2022, attributed to Houthi rebels from Yemen. While these attacks were largely intercepted, some caused civilian casualties and property damage, particularly in Abu Dhabi. Although no recent incidents have occurred in Dubai, the regional instability underscores ongoing risks.

3.   Potential Perpetrators

Threats are associated with regional conflicts involving militant groups such as the Houthi rebels and others operating in the Middle East. Additionally, global terrorist organisations have mentioned Western targets in their rhetoric, which could include UAE locations due to its high-profile international presence.

PRECAUTIONS FOR TRAVELERS

1.   Maintain Awareness

Travellers are advised to remain vigilant, especially in crowded areas. Monitoring local news and following guidance from UAE authorities is critical during your visit.

2.   Avoid Sensitive Areas

Restrict travel near government facilities, military sites, and high-profile infrastructure, which may be more likely to be targeted.

3.   Emergency Preparedness

Familiarise yourself with emergency procedures and locate exits and shelters in public areas. Keeping travel insurance that covers terrorism-related disruptions is also strongly recommended.

1 Exercise normal precautions

2 Exercise increased caution

3 Reconsider travel

4 Do not travel

OUR PARTNERS

DataWyse AI (UK)

In partnership with DataWyse AI, we deliver AI-powered security and intelligence with precision and resilience. DataWyse's advanced machine learning identifies vulnerabilities, strengthens operations, and produces regulation-compliant reports with unmatched speed and accuracy. Together, we provide fortified, reliable solutions that safeguard our clients' futures and elevate industry standards.

Deep Robotics (CN)

In partnership with DEEPRobotics, we deliver AI-powered security and robotics with precision and resilience. DEEPRobotics' autonomous quadruped robots excel in navigation, hazard detection, and real-time data reporting, transforming operations across industries. Together, we integrate cutting-edge robotics with advanced AI, providing reliable, scalable solutions tailored to client needs. Our collaboration elevates operational standards, enhances safety, and fortifies the future of intelligent security systems.

Eye in the Skies (UK)

Delivering cutting-edge drone and AI solutions with unmatched precision and reliability. Their ultralight drones and advanced AI systems excel in challenging environments, producing flawless 3D models, identifying vulnerabilities in roofs, solar panels, and agricultural land, and more. Together, we provide clients with tools to reduce risk, strengthen operations, and set new global standards—ready to tackle the challenges of tomorrow.

Hawk Shelters (TR)

Hawk Shelters Turkey is a world leader in military-grade bunkers, offering the highest standards of safety and durability. Since 2008, they have specialised in premium steel constructions and advanced steel façade and wall systems. Their products are trusted worldwide, transforming into secure structures that safeguard lives and assets in the most critical situations.

Ulgen Industrial Group (TR)

Ulgen Industrial Group, established in 1994, is a global provider of Security Systems and Mobile Solutions, specialising in engineering, design, manufacturing, R&D, installation, and support. Serving public and private sectors with key solutions including Physical Security, Mobile Field Systems, Safe City Systems, and Building Automation.

Viggo K9 (UK)

AXYMN Group partners with Viggo K9 UK to deliver bespoke, highly trained protection dogs across the Middle East. Combining Viggo K9's expertise with AXYMN's luxury service, providing tailored solutions that set a new standard for excellence and reliability.

Expanding our market presence across the Middle East and beyond offers a unique opportunity for potential partnerships to grow together in a rapidly evolving landscape.
