AXYMN ONE
&
NOAH

An advanced AI-driven security platform unlike anything currently available on the market. What sets it apart is its seamless integration with NOAH, a state-of-the-art, voice-controlled interface that revolutionises how security systems are managed. Unlike conventional systems that rely on manual inputs or limited automation, AXYMN ONE combines deep-learning adaptability with real-time decision-making capabilities.

WHY IT'S DIFFERENT

Intuitive Voice Commands
NOAH allows users to operate the system entirely through natural language, simplifying complex tasks such as analysing surveillance data or activating lockdown protocols. Competitors typically require technical expertise or cumbersome control interfaces.

Proactive Threat Management
Unlike traditional reactive systems, AXYMN ONE predicts threats by analysing behavioural patterns, anomalies, and environmental changes. For example, it can detect emotional distress or anticipate security breaches before they occur.

Deep Integration
AXYMN ONE integrates effortlessly with existing IoT devices, offering unparalleled adaptability for residential, commercial, and high-security environments. Its scalability—from securing a family home to safeguarding a corporate facility—is unmatched in the industry.

Comprehensive Features
From unattended bag detection to AI-enhanced drone surveillance, the breadth of capabilities is unrivalled, offering clients peace of mind and cutting-edge functionality.

AXYMN ECOSYSTEM

Welcome to the AXYMN Eco-system, where cutting-edge technology meets a steadfast commitment to sustainability. This fully integrated suite of solutions does more than protect your world, it empowers it. By combining advanced robotics, artificial intelligence, renewable energy compatibility, and intuitive control systems like NOAH, the AXYMN Ecosystem delivers unmatched security while paving the way for individual net-zero operations.

A self-sustaining security system designed with sustainability at its core. Autonomous drones patrol the skies while multi-terrain robots safeguard the ground. Advanced barriers and bulletproof systems seamlessly integrate into your infrastructure, and an underground sanctuary shields your family, employees, or assets during any crisis.

WHAT IS IT?

The AXYMN Eco-system is an interconnected network of technologies, each playing a vital role in delivering comprehensive security and sustainability:

AXYMN ONE

The intelligence hub of the ecosystem. AI-driven coordination ensures seamless integration, predictive threat analysis, and real-time operational efficiency.

NOAH

The intuitive voice-controlled assistant that connects every component of the eco-system.

AXYMN EYE

A state-of-the-art surveillance system featuring HD cameras, thermal imaging, and autonomous drones for 360° situational awareness and precision surveying.

AXYMN FORT

Advanced barriers, bulletproof doors and windows, and under-vehicle recognition systems (UVRS) that provide robust, sustainable perimeter protection and access control for any site.

THE A-R-K

An adaptable, energy-efficient bunker offering ultimate safety and resilience during any crisis, tailored for individuals, corporations, or critical infrastructure.

AXYMN ROBOTICS

Multi-terrain quadruped robots designed for patrol, surveillance, emergency response, and operational support, powered by AI and renewable energy compatibility.

WHY CHOOSE THE AXYMN ECOSYSTEM?

INNOVATION MEETS SUSTAINABILITY

Combining state-of-the-art security with net-zero principles, the AXYMN Eco-system ensures a future-proof investment.

PROACTIVE, NOT REACTIVE

AI-powered threat detection, driven by NOAH, addresses risks before they escalate, providing peace of mind.

BUILT FOR THE FUTURE

Modular and upgradeable, the system evolves with your needs while supporting your sustainability goals.

DESIGNED FOR YOU

Customise every component to meet your operational, aesthetic, and environmental objectives.

KEY FEATURES

360° PROTECTION

Drones, Robotics, and surveillance systems work together for unparalleled security.

AI INTELLIGENCE

Real-time insights and predictive analytics optimise operations.

ENERGY EFFICIENCY

Renewable energy compatibility ensures low operational emissions.

INTUITIVE CONTROL

NOAH enables effortless, voice-activated management of the entire ecosystem.

DURABILITY

Industrial-grade materials ensure performance in any environment.

SUSTAINABLE SECURITY

Achieve net-zero operations while maintaining world-class protection.

GOLD: High-End Foundational System

A robust, entry-level security solution tailored for homes requiring reliable foundational protection.

Not Compatible With AXYMN ONE & NOAH

KEY FEATURES

Basic AI Analytics

Detects objects, monitors behaviour, and sends real-time alerts for anomalies.

Static Cameras

High-definition, night-vision cameras with wide-angle coverage and app-based remote viewing.

Remote Control App

Intuitive interface for monitoring and controlling CCTV systems.

Perimeter Security Sensors

Detects intrusions or movement near property boundaries.

Environmental Scanning

Monitors temperature, smoke, and air quality for hazards like fires or gas leaks.

PLATINUM: Advanced AI-Driven Surveillance

An advanced security solution offering enhanced protection through AI and integrated technologies.

Compatible With AXYMN ONE -- Not Compatible WITH NOAH

KEY FEATURES

Enhanced AI Analytics

Includes facial recognition, behavioural analysis, and predictive anomaly detection.

Dynamic IP CCTV Network

Intelligent tracking cameras with auto-focus, capturing fine details like number plates and facial features.

Limited Drone Patrols

Autonomous drones for scheduled patrols and real-time alarm responses.

Environmental and Audio Sensors

Detects unusual sounds or hazardous substances with instant alerts.

Augmented Reality Integration

Visualise property layouts and camera feeds for real-time threat assessment.

Interactive 3D Map

Displays live drone paths, sensor activity, and security feeds for comprehensive monitoring.

DIAMOND: Ultimate AI Security System
Unmatched security with advanced AI and automation.
Compatible With AXYMN ONE & NOAH

KEY FEATURES

Predictive AI
Anticipates threats via behaviour and movement analysis.

Ultra-Smart CCTV
4K cameras with multi-angle tracking, real-time zoom, and edge computing.

Sentiment & Gesture Recognition
Detects aggression via tone and body language.

Drone Surveillance
Autonomous patrols and real-time target tracking.

Biometric Access
Voice, gait, and iris-based multi-modal security.

Immersive Sensor Network
LiDAR, motion radar, and hazard detection.

AR Command Centre
Augmented reality for monitoring and incident playback.

Adaptive Protocols
Auto-adjusts lockdowns and security scenarios.

24/7 Monitoring
Elite AI-supported rapid response.

The ultimate protection for high-demand security needs.

ENTERPRISE

ESSENTIAL: Foundational Business Security Systems

A reliable security solution designed for businesses needing strong foundational protection and remote monitoring.

Not Compatible With AXYMN ONE & NOAH

KEY FEATURES

Basic AI Analytics

Object detection, anomaly recognition, and real-time alerts for early risk detection.

Static Surveillance Cameras

High-definition, night-vision cameras with app-based live access.

Perimeter Intrusion Sensors

Alerts for unauthorised boundary entry attempts.

Remote Control App

Manage cameras, alerts, and settings via an intuitive mobile interface.

Environmental Sensors

Monitors temperature, smoke, and air quality for potential hazards.

ADVANCED: Enhanced Surveillance and Analytics

An adaptive, AI-driven security system for businesses requiring proactive solutions.

Compatible With AXYMN ONE -- Not Compatible WITH NOAH

KEY FEATURES

Predictive AI Analytics

Tracks behavioural patterns and movement to predict unusual activity.

Incident-Triggered Drone Deployment

Autonomous drones respond to alarms, providing real-time aerial footage.

Enhanced Environmental and Audio Sensors

Detects irregular sounds (e.g., breaking glass) and airborne hazards, sending immediate alerts.

Partial AR Integration

Visualises property layouts and camera feeds within the app for situational awareness.

Interactive 3D Map

Displays live drone paths, sensor activity, and site security status.

ELITE: Full-Spectrum Autonomous Security Solution

The ultimate AI-driven security system for high-security business environments.

Compatible With AXYMN ONE & NOAH

KEY FEATURES

Autonomous Drone Surveillance

Routine patrols with real-time threat tracking in "pursuit mode."

Multi-Modal Biometric Access

Layered security with facial, voice, and iris recognition for restricted areas.

AI-Connected Sensor Network

LiDAR monitoring, motion radar, and environmental hazard detection.

AR Command Centre

Full AR-enabled control for drones, cameras, and access points.

Customisable Smart Protocols

Automatic lockdowns, evacuations, and other responses based on threat levels.

Enhanced AI Analytics

Advanced behavioural analysis and predictive insights for anomaly detection.

Comprehensive and autonomous, this package offers unparalleled security for critical business needs.

VANGUARD

The Ultimate Enterprise Security System

An all-encompassing, elite security solution, designed for businesses with the highest security requirements and the need for rapid response.

INVITATION ONLY

COMING SOON

AXYMN EYE

Taking drone-based surveillance to the next level, combining it with AI-powered analytics to deliver unmatched efficiency and precision. Unlike other drone systems that focus solely on surveillance, AXYMN EYE is designed as a multi-purpose tool for industries such as security, agriculture, construction, and environmental conservation.

WHY IT'S DIFFERENT

Integrated AI Insights
The system doesn't just provide raw data but interprets it, offering actionable recommendations in real-time. For example, in agriculture, it identifies plant health anomalies and suggests optimised resource allocation.

All-Weather Versatility
Equipped with thermal imaging and LiDAR sensors, AXYMN EYE operates in all conditions, day or night, offering superior reliability compared to traditional drones.

3D Mapping and Modelling
Unlike competitors, AXYMN EYE generates detailed topographic maps and 3D models for applications such as construction planning and environmental monitoring.

Customisation for Unique Needs
Whether monitoring wildlife in remote areas or securing high-risk perimeters, AXYMN EYE adapts to a wide variety of use cases with tailored solutions.

AXYMN FORT

Delivering high-impact physical security systems engineered for resilience against the most severe threats. This includes barriers, bulletproof doors and windows, and advanced vehicle recognition systems. While competitors offer similar infrastructure, AXYMN FORT sets itself apart with its integration capabilities and design precision.

WHY IT'S DIFFERENT

Seamless Integration with AXYMN ONE and NOAH
Unlike standalone products, AXYMN FORT works as part of a larger ecosystem, allowing real-time control and monitoring.

EMP Resistance
These systems are built to withstand electromagnetic pulses, ensuring functionality even during cyber warfare scenarios.

Advanced Vehicle Recognition Systems
Unlike basic license plate readers, these systems utilise AI to analyse vehicle behaviours, identify anomalies, and alert security teams instantly.

Tailored Aesthetics
Security measures are often perceived as obtrusive, but AXYMN FORT customises designs to blend seamlessly with architectural aesthetics, meeting both functional and visual requirements.

THE A-R-K

The Advanced Resilient Keep

The A-R-K isn't just a panic room or bunker; it's a fully customisable, next-generation fortress combining unmatched safety with advanced technology. Designed to protect against everything from EMP attacks to natural disasters, the A-R-K offers unparalleled features that are non-existent in traditional market solutions.

WHY IT'S DIFFERENT

Luxury Meets Security

Unlike standard shelters, the A-R-K offers high-end finishes, AV systems, and ergonomic interiors to ensure comfort during extended stays.

Multi-Scenario Adaptability

From above-ground blast-proof structures to subterranean bunkers, the A-R-K can be tailored to specific geographic and environmental challenges.

AI Integration

Powered by AXYMN ONE and NOAH, the A-R-K becomes an intelligent system capable of monitoring threats, activating drones, and even customising settings for entertainment or presentations.

Crisis-Ready Features

The A-R-K doubles as a command centre for corporate or government use, ensuring operational continuity during the most challenging scenarios.

AXYMN **ROBOTICS**

AXYMN Robotics combines adaptability, precision, and innovation to set a new standard in modern security. Designed for individuals, corporations, and governments, these advanced quadruped robotic systems deliver cutting-edge solutions to meet diverse operational needs.

WHY IT'S DIFFERENT

LIDAR and 3D Mapping

High-performance LIDAR systems provide detailed scanning capabilities for terrain analysis, infrastructure mapping, and enhanced situational awareness.
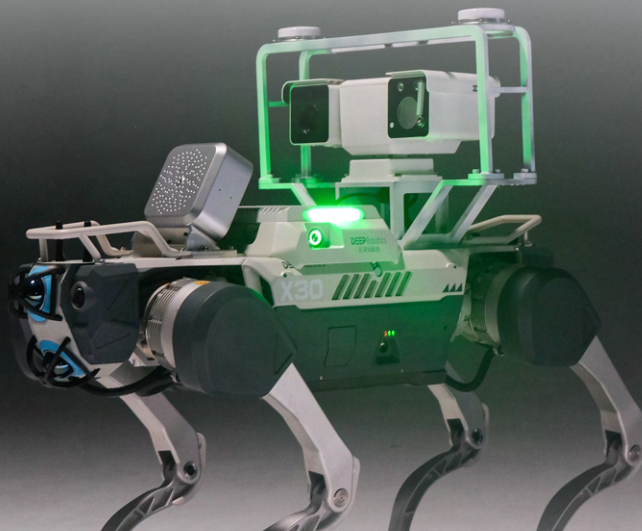

Public Safety

Monitor large crowds and provide real-time updates during events or emergencies.

Multi-Terrain Mobility

Navigate stairs, rubble, and waterlogged areas effortlessly across diverse environments.

Durable Build

Built to perform in extreme conditions with EMP shielding and waterproofing.

SPECIALISED SECURITY SOLUTIONS

Business to Business (B2B)

security services help organizations enhance their security posture using advanced methodologies, expert insights, and specialized testing. We provide tailored risk assessments, Red Teaming simulations, and penetration testing to identify and address vulnerabilities across physical and cyber domains. Our solutions include skilled personnel augmentation and training to strengthen your team's ability to counter evolving threats, ensuring proactive and comprehensive protection.

Close & Executive Protection

Highly skilled professionals deliver discreet and reliable personal security. These operatives, trained in risk assessment, defensive tactics, and crisis management, safeguard high-profile clients during events, daily routines, or high-risk scenarios, with meticulous planning and advanced technology integration.

Monitoring, Response, and Keyholding

Delivering 24/7 security for homes and businesses, combining advanced technology with expert support. We provide real-time surveillance to detect and address threats, immediate response to emergencies, and secure key management for on-site access. Our team verifies alarms to distinguish genuine threats, conducts regular security inspections to ensure all systems are operational, and coordinates with authorities during major incidents. We also conduct comprehensive full site surveys to identify vulnerabilities, assess site layouts, and ensure security systems are tailored for maximum efficiency. With comprehensive reporting available via our app, we ensure reliable, year-round protection and peace of mind.

Security Systems

We offer unparalleled, AI-driven protection for residential and commercial properties in the Middle East. With tailored packages combining predictive threat intelligence, swarm drone surveillance, biometric access control, and comprehensive sensor networks, our systems provide real-time crisis response and immersive command centre capabilities. Supported by 24/7 concierge service, strategic consulting, and continuous monitoring, we deliver adaptive security to safeguard your assets, personnel, and reputation.

Cyber Security Auditing

Comprehensive assessments to protect critical infrastructure and sensitive data. Services include penetration testing, compliance reviews, and tailored strategies to mitigate cyber threats, ensuring data integrity and operational continuity while adhering to regulatory standards.

Global Asset Protection

This service secures high-value assets, including fine art, luxury items, and sensitive documents. Using AI-powered tracking, risk-based route planning, and climate-controlled transport, AXYMN ensures safe handling and transit for valuable items, whether stored locally or transported internationally.

Residential Security Teams

Specialised on-site personnel provide 24/7 protection for private estates and high-profile residences. Combining advanced surveillance systems, strict access controls, and proactive threat management, this service ensures a seamless security presence without disrupting daily life.

Tactical Surveillance Countermeasures

Using advanced techniques and technologies, AXYMN identifies and neutralises hostile surveillance efforts. Services include electronic countermeasures, secure transportation, and reinforced physical defences for vehicles, jets, and premises, ensuring comprehensive protection in sensitive environments.

Bespoke Specialised Personal and Family Protection Dog

AXYMN Group's protection dogs offer unrivalled security and companionship. Sourced from Europe's finest bloodlines, these dogs are trained beyond military and police standards, ensuring precision and reliability in real-world scenarios. Raised in family environments, they are calm, adaptable, and socially elegant, seamlessly fitting into personal or professional settings. Fully compliant with international regulations, they come with health certifications and global travel readiness. Combining elite protection with loyalty and affection, AXYMN's elite dogs are tailored to meet your unique security needs.

CARBON NEUTRAL VISION

At AXYMN, we don't just deliver world-class security, we offer you the opportunity to lead the way in sustainability. Imagine protecting your home, business, or infrastructure with cutting-edge technology while achieving carbon neutrality. With AXYMN's Carbon Cost and Sustainability Assessments, you can secure what matters most while making a measurable impact on the planet.

TRANSFORM YOUR ENVIRONMENT INTO A SUSTAINABILITY STATEMENT

Offset Installation & Operation Costs

We assess the carbon footprint of your AXYMN Eco-system, from installation to daily use, and provide seamless offset solutions. Whether through certified carbon credits or investment in renewable energy projects, we make neutrality achievable.

Sustainable Energy Integration

Power your AXYMN Eco-system with solar panels, wind turbines, or other renewable solutions to reduce emissions and operational costs. Why rely on the grid when you can generate clean energy on-site?

Carbon Neutral Living & Business

We don't stop at the AXYMN Eco-system. Our experts evaluate your entire carbon footprint, offering solutions to run a carbon-neutral business or create a carbon-neutral home. From energy efficiency upgrades to offset mechanisms, we tailor strategies that align with your goals.

WHY CHOOSE CARBON NEUTRALITY WITH AXYMN?

Lead with Purpose

Show the world your commitment to a sustainable future.

Save While You Sustain

Lower energy costs and boost efficiency with renewable energy.

Enhance Your Image

Achieve carbon neutrality certification for your home or business and lead the charge toward a greener tomorrow.

Global Impact, Local Results

Whether funding reforestation, renewable energy, or conservation, every choice you make drives change globally and benefits you locally.

Be Secure. Be Sustainable. Be a Leader.

OUR PARTNERS

Eye in the Skies (UK)

Eye in the Skies (EITS) delivers cutting-edge drone and AI solutions with unmatched precision and reliability. Their ultralight drones and advanced AI systems excel in challenging environments, producing flawless 3D models, identifying vulnerabilities in roofs, solar panels, and agricultural land, and more. Together, we provide clients with tools to reduce risk, strengthen operations, and set new global standards—ready to tackle the challenges of tomorrow.

DataWyse AI (UK)

In partnership with DataWyse AI, we deliver AI-powered security and intelligence with precision and resilience. DataWyse's advanced machine learning identifies vulnerabilities, strengthens operations, and produces regulation-compliant reports with unmatched speed and accuracy. Together, we provide fortified, reliable solutions that safeguard our clients' futures and elevate industry standards.

Hawk Shelters (TR)

Hawk Shelters Turkey is a world leader in military-grade bunkers, offering the highest standards in safety and durability. Since 2008, they have specialised in premium steel constructions and advanced steel facade and wall systems. There products are trusted worldwide, transforming into secure structures that safeguard lives and assets in the most critical situations.

Ulgen Industrial Group (TR)

Ulgen Industrial Group, established in 1994, is a global provider of Security Systems and Mobile Solutions, specializing in engineering, design, manufacturing, R&D, installation, and support. Serving public and private sectors with key solutions including Physical Security, Mobile Field Systems, Safe City Systems, and Building Automation.

Viggo K9 (UK)

AXYMN Group partners with Viggo K9 UK to deliver bespoke, highly trained protection dogs across the Middle East. Combining Viggo K9's expertise with AXYMN's luxury service, providing tailored solutions that set a new standard for excellence and reliability.

Expanding our market presence across the Middle East and beyond offers a unique opportunity for potential partnerships to grow together in a rapidly evolving landscape. By collaborating with strategic partners, we can leverage local expertise and resources to strengthen our position in the Middle East while also scaling to neighboring regions and international markets. Through tailored solutions, co-branded initiatives, and joint marketing efforts, we aim to create value for both parties and expand our collective reach. We are eager to explore synergies with partners who share our vision for growth and innovation, and we believe that together, we can unlock new opportunities and drive success in the Middle East and beyond.
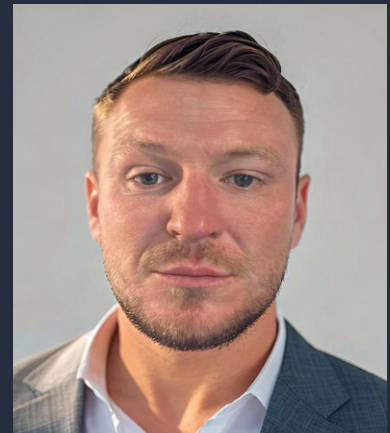

OUR TEAM

The eight visionaries at the helm of AXYMN—our senior management and directors who lead with unwavering determination and strategic expertise. They oversee a team of over 15 dedicated professionals across various departments, driving innovation, precision, and exceptional outcomes in all that we do. With a clear focus on excellence, they ensure every project is executed to the highest standard. Their collaborative approach fosters a culture of growth, empowering the team to continually push boundaries and deliver groundbreaking solutions.
