

Introducing the Tornado Max

Task Force Tips proudly announces the launch of the **Tornado Max**, the latest advancement in our Tornado monitor line. Designed with feedback from OEMs worldwide, the Tornado Max is engineered to meet the demanding needs of firefighters across the globe.

Unmatched Performance and Precision

The Tornado Max delivers superior firefighting capability with an impressive flow rate of up to **3000 liters per minute (LPM)**. Built for efficiency and control, it integrates **CANbus electronics** based on the proven technology from our Flex monitor. This system enhances communication between components, improves diagnostic capabilities, and delivers reliable performance even in the harshest conditions.

Key Features of the Tornado Max:

- **High-Flow Capacity:** Up to 3000 LPM for maximum firefighting power.
- **CANbus Electronics:** Enhanced controls with industry standard CANbus J1939 technology.
- **Absolute Positioning:** Integrated absolute positioning capabilities
- **Simplified Horizontal Travel Stops:** Easier to set and adjust, enhancing operational flexibility.
- **Compact Footprint:** Space-saving design without compromising performance.

Designed with Global Insights

The Tornado Max was developed through extensive collaboration with firefighting professionals and OEM partners around the world. This global feedback has shaped a monitor that meets the operation needs of municipal, industrial, wildland, and robotic firefighting applications.
