

WEFRAME

adding value to premium (e)-bikes

Why WEFAME by WE-FORM?

The DNA of WE-FORM is born by racing and high-performance applications. This DNA paired with the focus on highest quality brings (e)-bike frames to the next level via WEFAME:

WE do hydroformed components and complete welded frames for (e)-bikes under one roof.
WE promise high-engineered and manufactured aluminum alloy (e)-bike frames in Europe.
WE provide unique automated smooth welds.
WE put our focus on light weight and robust solutions.
WE implement CO₂ reduced materials and production processes (<<20kg CO₂ / frame).

The advantages of WEFAME are:

- Engineering and production “ad-fontes” in Europe (Austria and Bosnia).
- (E)-bike hydroformed and components from premium (e)-bike applications:
 - robust & lightweight.
 - automated produced and smooth welds.
 - innovation and special product features that stand-out.
 - best surface quality.
- Fast and stable delivery through Supply Chain in Europe.
- Sustainable philosophy via CO₂ reduced materials and production processes.
- Robust private ownership structure with best reputation.
- Long-term Partnership.

→ **best Quality @ best TCO in Europe!**
