SEEMEE R300NEWFTRPLF

The SEEMEE R300 radar taillight is an advanced safety device for cyclists, combining radar technology with a taillight. It detects approaching vehicles from up to 140 meters away, providing early warnings.

It supports ANT+ connectivity for pairing with compatible bike computers, allowing real-time display of vehicle information directly on the screen, enhancing convenience and safety.

AIRRO MINI INFLATORNEW

AIRRO is equipped with a powerful brushless motor and advanced pressure control, capable of inflating tires up to 120 PSI. With a fast 45-minute charge time, it's the ideal companion for both everyday rides and travel adventures.

User-friendly "+" and "-" buttons make pressure adjustments quick and easy, while the auto-off function prevents over-inflation for consistently accurate results. A clear LED display provides real-time updates on both tire pressure and battery status—so you're always informed and in control.

HORI SERIAL LIGHTSNEWFTR

The HORI Serial Lights feature a sleek, lightweight horizontal design that reduces wind resistance for a smoother ride. With a dual mounting option, it can be installed above or below the handlebar—whichever best suits your setup.

The HORI 900 delivers up to 900 lumens of output with a cut-off low beam and a premium daytime running light, providing reliable visibility and safety around the clock.

The HORI 1300 takes performance even further with a Dual-zone optic system, combining a wide-angle low beam with a far-reaching high beam. With FTR LightSync Control technology, you can switch between modes effortlessly at the touch of a finger.
