HOME TEXTILES SINCE 1956

Creating sustainable recycled  
fabric collections

# WEAVING SUSTAINABLE FABRICS SINCE 1956

Designing and weaving in Barcelona

We are a leading B2B company of high-quality recycled fabrics for the textile industry.

Our production is 100% local and we implement strict environmental standards to ensure a highly sustainable manufacturing process.

We're committed to circular economy, recycling and reducing textile waste to minimize our environmental impact.

# A VERTICAL TEXTILE INDUSTRY

We are a vertical textile industry that focuses on the **production of woven fabrics, dyed and printed**. We develop several collections yearly to fulfill our customer needs, following market trends for all segments of home textiles.

We also focus on **technical fabrics, special finishing** and **supply production orders** to key accounts all over the world.

# EXPERTS IN RECYCLED FABRICS

90% of our production is made with pre-consumer cotton and recycled polyester from post-consumer plastic bottles.

Hispano Tex is led by a team of **experts on recycled materials, textiles, fashion and sustainability**. We have a high selection of fabrics made with recycled and sustainable fibers:

HISPANO TEX

# GREENER FABRICS

## Developing sustainable textiles

Hispano Tex works relentlessly to keep creating and developing new fabric collections that use **sustainable materials and low-impact fibers like linen and hemp.**

Furthermore, we are committed to establishing processes that are respectful to our environment and ecosystem.

# HOME TEXTILES

## What we do:

With a keen eye on the market, our team constantly scans current trends, creating new collections for our market and customer demands.

We make sure all our **fabrics are developed in a sustainable manner** without further contaminating the environment.

CURTAINS

TABLECLOTHS

CUSHIONS

UPHOLSTERY

BEDDING

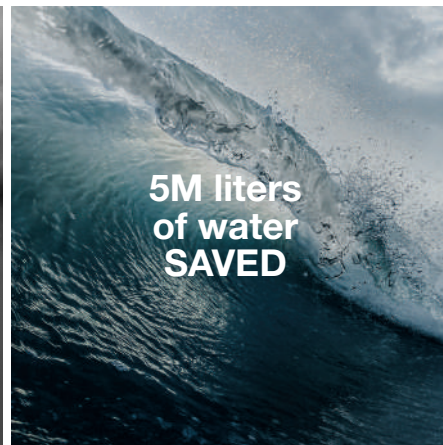

# COMMITTED TO OUR PLANET

## Moving towards a responsible and sustainable industry

Sustainability is a key strategic priority as we strive to offer our customers recycled and innovative eco-friendly products. Combining years of know-how and strategic alliances with key partners, we have become a leading expert in sustainable fabrics and processes.

Our main environmental contribution is **circularity, transforming our own textile waste into new high-end recycled yarn and reducing the consumption of water, energy and CO<sub>2</sub> emissions**, as well as avoiding waste accumulation in landfills and waste ending up in oceans and rivers.

## SINCE 2018 REDUCING THE CONSUMPTION OF NATURAL RESOURCES:
