## 3D MAPPING

# Need an easy tool to see your artworks in a real life situation ?

---

With Pointcarre 3D Mapping, make realistic presentations of your seasonal collections in dynamic ways in a few clicks : just drag and drop your fabric designs on photographs. Mapping can be used for apparel, upholstery, or home furnishings markets.

### **User friendly**

Very easy to learn in only a few hours : All you need to do is select your fabric design, then drag and drop it on the picture, and adjust the fabric on the model with a simple grid. The mapping is done automatically, each design is at the right scale, no calculations to make.

### **Realistic rendering**

Pointcarre automatically extracts the shadows out of the photograph. Applied on the fabrics, they give a powerful depth effect.

### **Image compatibility**

Mapping is compatible with Pro Design and Pro Weave and also with all graphics solutions, so you can import designs created with Photoshop® and drop them on the photograph.

The image created in Pointcarre can be saved in several industry standard file formats, including: JPEG, TIFF, PNG, BMP. Which guaranty you a full compatibility with Adobe solutions.

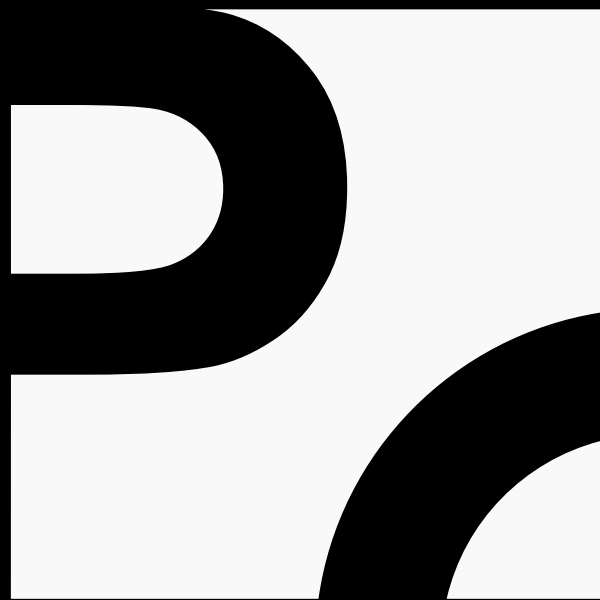

### **Color variations**

3D Mapping is optimized to work with high resolutions textures, and offers professional-quality tools to help you create and change a texture's color, scale, rotate, stretch and position.

3D Mapping accepts .aco files to import color libraries from Photoshop, Pantone Also embedded CSI Colorwall™ library. Everything is possible with Pointcarre Mapping 3D !
