

Safe performance | PFAS Free

Eco Care is presented as a safe “C0”, alternative to the traditionally used “C6” and “C8” finishes. These products contain a potentially **toxic** and **non-biodegradable** chemical compound, known as **PFA**, this substance accumulates in the body and can cause **serious problems for our health**.

Rioma applies PFAS-free finish to the fabrics of its Eco Care line, allowing the **responsible production of fabrics that respect the environment** and without harmful effects on people’s health.

**WATER
REPELLENT**

WATER REPELLENT

Our fabrics prevent water-based stains. The liquids slide, not passing through the fibers.

**HEALTH
CARE**

WE PROTECT YOUR HEALTH

Our products have Oekotex Standard 100 label, which guarantees that they are free of more than 300 substances harmful to the health of living beings, protecting you and yours.

Eco Care line offers water-repellent fabrics **100% PFAS free**

This technology improves fabric performance and its maintenance providing a longer and enjoyable product life. Its technical qualities meet the demands of domestic and professional use that eases your daily life.

**PFAS
FREE**

FREE OF PFAS

Our coating is PFAS free, improving the quality of our products while minimizing the impact on people's health and the environment.

**ECO
FRIENDLY**

RESPECTFUL FOR THE PLANET

Eco Care technology is environmentally friendly, guaranteeing the responsible production of waterproof fabrics, promoting sustainable products.
