LABYRINTH

ventilation like nature intended

ENKEV'S LABYRINTH IN A NUTSHELL:

- Labyrinth has outstanding ventilation characteristics that encourage a deep and rejuvenating sleep.

- There is hardly any deformation (<4%) after 72.000 cycles of 140 kg's

- The material is point elastic which gives it a big advantage over 3D-Knittings

- Labyrinth is amazingly comfortable

- Labyrinth is anti-allergic and is easily washable

- The material is very recyclable, and is therefore a perfect fit in our range of very sustainable products. We strongly believe in doing things in a way that is harmless to mother nature. The raw material that we use in Labyrinth 100 has a 'cradle to cradle' silver certificate

Clearly, when it comes to ventilation, resilience, flexibility and durability, there is nothing better than Enkev's Labyrinth.

If you have any questions, please feel free to contact us.

LABYRINTH

washable, recyclable, elastic, comfortable

ENKEV’S LABYRINTH IS THE LATEST INNOVATION FROM THE PEOPLE WHO BRING YOU NATURAL VENTILATION.

Enkev has a long history of making products that create the best possible sleeping environment, and most comfortable sitting experience. Comfort, resilience and creating the most natural micro-climate have always been the driving forces behind our innovations.

Humidity and air flows freely through the open layers of Labyrinth. Horizontal air movement caused by natural body movement during the hours of sleep gives you the most comfortable micro-climate, which leads to the most restful and relaxing conditions.

Adding Labyrinth to a quality mattress creates the most comfortable sleep for the consumer, in the most hygienic environment imaginable. Labyrinth is an easily washable, anti-bacterial, hypo-allergenic, dust-free, contaminant-free and non-toxic product. Labyrinth helps to live clean, feel clean and sleep clean.

Clearly, when it comes to ventilation, resilience, flexibility and durability, there is nothing better than Enkev’s Labyrinth.

LABYRINTH

ventilating, responsible, resilient, hygienic

ENKEV’S LABYRINTH IS THE LATEST INNOVATION FROM THE PEOPLE WHO BRING YOU NATURAL VENTILATION.

Enkev’s Labyrinth blends the characteristics of carefully chosen, fully recyclable, synthetic fibres and nature’s finest design patterns. The result is an unmatched combination of elasticity, pressure division and ventilation, giving you the highest level of comfort.

Labyrinth can be used in many forms in mattresses or upholstery:

- As a comfort layer close to the body below the ticking.
Or as core of a top mattress.
- As an insulation layer; on top of springs it has an excellent function to divide the springs unique individual pressure and to protect the comfort layer above.
- As a full core; a Labyrinth layer (or two glued layers) is very suitable as a core for an adult or children’s mattress in the current trend of metal-free bedding.

Please get in touch with us for all specific details about the Labyrinth version that suit your purpose.
