Why us?

Compliance

All our production units are compliant and audited for all sectors

The statutory laws are as follows –

SEDEX

The intent of SA8000 is to provide an auditable, voluntary standard, based on the UN Declaration of Human Rights, ILO and other international human rights and labour norms and national labour laws, to empower and protect all personnel within an organisation’s control .

Factories act of state

Covers health and safety and license to run

Provident Fund

Employee saving benefits

Employee state insurance

Employee medical benefits

Labor law

Covering all labor audits relating to labor hours, minimum wages, child labor, bonus etc.

BSCI

a program of the [Foreign Trade Association](#) of Europe, is designed to improve working conditions for the suppliers of BSCI's participating member companies..

ISO 9001:2015

Certified means an organization has met the requirements in ISO 9001. It defines an ISO 9000 Quality Management System (QMS). ISO 9001:2015 is focused on meeting customer expectations and delivering customer satisfaction so you must pay attention to the customer.

Security awareness program

Compliance of security requirements also laid down by US government.

Fire & accident safety

Covers fire fighting equipment's

- Bathmats & Rugs

Why us?

Quality

All our units function on AQL 2.5

Our quality assurance comes from a constant process improvement driven by a team of 35 people, constantly making efforts in that direction

Our Quality Compliance

- EDDR – Every Day Different Rejection
- DPRR- Daily Percentage Improvement on Rejection and Rework
- Monitoring Major defects and there causes
- Eliminating causes for major defects

Our Quality Checks

Source	Receiving	Interim	Final
Incoming Raw material is checked at the ancillary who themselves work on AQL 2.5. Vendors constantly delivering quality are allowed to send material with self inspection certificates.	Once the material is received at the production unit it is tested for the parameters and specification created by the product development and quality department while designing the product.	At every stage of production the product as well as the process is monitored for satisfactory results.	The shipment is finally checked and approved for all specs before it leaves the factory, and certified on basis of AQL 2.5
