Many believe that textile trimmings are always colourful, shiny, rich in form and opulent in ornamentation. However, decorations come in all shapes and sizes and can also be more toned-down and modest. This is useful when trying to highlight simple forms designed for everyday use.

Fringes are made in a variety of widths and can either be plain or come with decorative weaves. They can be used as furniture trim or as decorative elements for windows and various textile items.

CORD WITH TAPE CT.0087

Fringes and gimps of various shapes and widths can be used in conjunction with tassels to form a coherent, attractive whole, with individual items complimenting each other. Even when all such decorations come in a single colour, they offer an entire array of different subtle finishes for accessories, window curtains and upholstered furniture.

The rules for combining different elements of identical colours can be applied e.g. to table textiles. A table cloth, a table runner and napkins will form a cohesive collection when used with a colourful item binding them together.

All patterns in the Naturals collection are reminiscent of mind calmness, gentleness, and bliss characteristic of places ideal for rest and relaxation. Depending on how many patterns you use, the end result can produce associations with an idyllic provincial home or an urban villa lit up by midday sunlight.

Each of the Naturals products is a humble unsung hero of indoor decorations. Thanks to their unique character, they subtly highlight and adorn other interior design elements.

They do not stand out but still grab your attention in an intriguing way. They produce the sense of calmness and peace, offering cosiness and closeness to nature in the spirit of new comfort.

CORD WITH TAPE CT.0087

The use of cords with tapes is a perfect solution when you need to enhance the shape of a piece of upholstered furniture. They produce soft, clear lines that highlight the textile form.

GIMP G.1398

The rules for selecting appropriate sizes and colours of cords with tapes apply not only to soft cushions, bedspreads and covers, but also to seats, backrests and armrests used in upholstered furniture.

DEKOMA NATURALS TRIMMING COLLECTION

Naturals is a collection of 18 trimmings created from natural flax and cotton fibres blended with viscose. The predominant features of the decorative tiebacks, fringes, cords and gimps are the simplicity of form, the use of natural fibres and the subdued colour palette. Naturals boasts simple forms and patterns associated with everyday life in its blissful and calming version. The items can be easily combined with natural textiles which are becoming increasingly popular in interior design. They endow interiors with a new dimension of eye-pleasing harmony, and balance between luxury, simplicity and intimacy. The effect produced by the Naturals trimmings is discreet and subtle, but at the same time it significantly changes the character of the interior. Products from the Natu-

als collection are made predominantly from flax and cotton fibres and semi-synthetic viscose. Therefore, they go perfectly well with natural decorative and upholstery fabrics. Their common feature is the matte finish of the fibres and subdued colours. The Naturals collection offers a full range of products for interior and furniture decoration. Tiebacks are simple, yet elegant accessories for window and drape treatment. Fringes are available in 3 forms (classic, with pom-poms or with tassels). Cords - mainly for upholstered furniture - emphasise shapes and facilitate perfect finishing.

Gimps are available in different widths; they can be plain or with more decorative braids. They are a great solution for furniture finishing or decoration of windows and various textile accessories. The Naturals collection is a perfect choice for enthusiasts of cottage core aesthetics, who would love to leave the city and surround themselves with nature, and for aficionados of classic rustic interiors e.g. in the Provençal and English style.
