WEAVING

Weaving comprises latest Sulzer looms which enable to weave different widths in a diverse variety of fabrics such as Percale, Twills, Drills, Jacquards, Sateens, Dobby etc.

We are capable to produce one million meters monthly in required constructions and widths. We are also exporting Power, Auto, Sulzer, Air jet and Water jet fabrics.

Our Company uses state-of-the-art "Loom monitoring system" for improved productivity and quality of the weaving unit.

PROCESSING

The company carries out quality dyeing in direct, pigment, VAT, reactive Colors with different finishing like: Soil Release, water resist finish Peach skin effect finish, Fire retardant finish, water proofing, anti crease, easy care finish, anti-bacterial finish.

The company has engaged an integrated plant having most modern dyeing and printing machines. Design and Engraving computerized systems are working to perform these sensitive jobs.

BLEACHING

We have the facility of bleaching on either the state of the art open and narrow width bleaching plant and the traditional keir bleaching system. We consider having both these options very important as this gives us choice of bleaching method depending on the quality of fabric and client requirements.

PRINTING

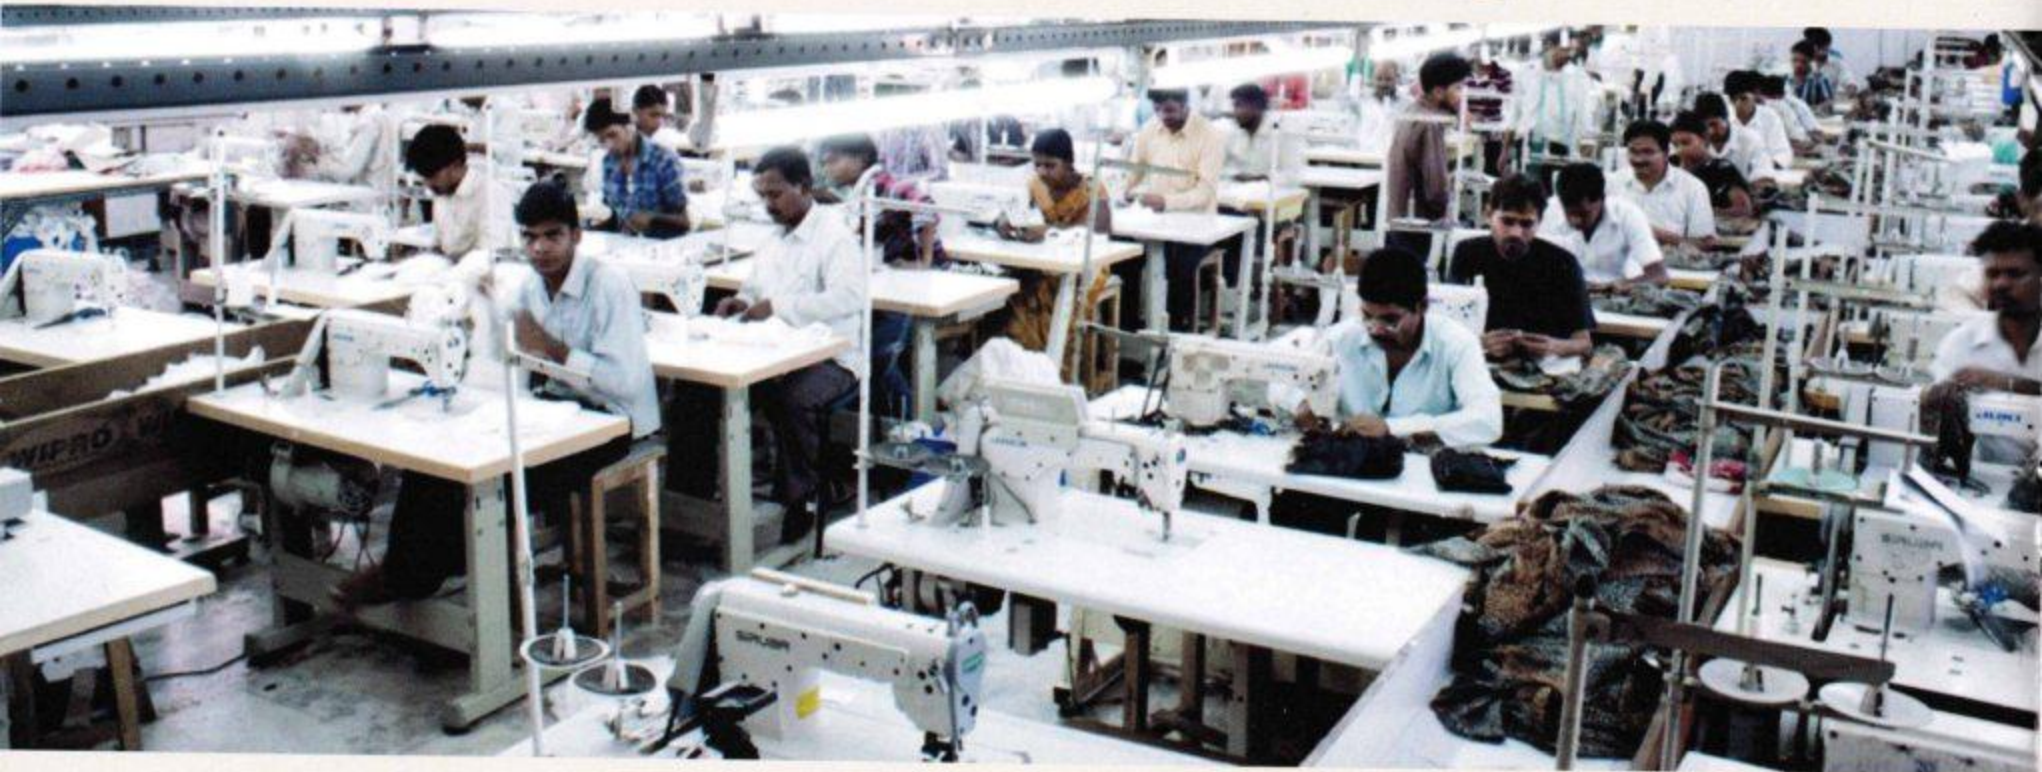

PRINTING

We have the facility of printing upto 20 colors with 4 different repeats. Our print quality has been highly appreciated by our valued clients all over the world.

STITCHING

Our Stitching unit is well equipped with modern machines. The product line is customized to manufacture products of various styles and sized according to the requirement of our customers. The dust proof environment facilitate our staff in maintaining quality standards and achieving the high level of perfection.
