AP 1100

SINCE 1949

Right from the early beginning, craftsmanship, design and attention to detail has been the backbone of Stilling. Our heritage dates back to 1949, when our founder, Preben Stilling, made his first venetian blind in the basement of his home. A venetian blind which started our journey towards becoming the biggest drapery hardware provider in Scandinavia, with exports all over the world.

RESPONSIBLE AT HEART

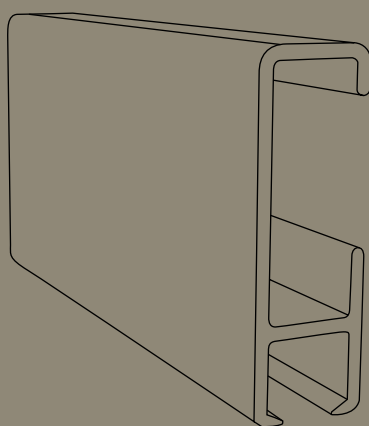

We are pioneers in the field of drapery hardware made from responsible materials, and produce many of our most beloved curtain tracks from min. 75% recycled post-consumer aluminium and some components from 100% recycled nylon. A single but significant step towards securing worthy living conditions for future generations.

SHAPED BY HERITAGE

With techniques perfected through decades, we are able to bend our curtain tracks to almost any shape imaginable, following the geometrical curves of a bay window, or the organic shapes of a creative installation.

CRAFTED IN DENMARK

We are proud to cooperate with some of the most talented curtain experts, seamstresses, designers, stylists and architects in Denmark and throughout the rest of the world. Every day we make it possible to master the light, style, divide and frame rooms.

AP 1905 Piet Hein / Snow

PIET HEIN SUPERELIPSE®

AP 1905 Piet Hein is a curtain track with a remarkably cohesive aesthetic, guided by a rigorous focus on materiality, proportion and colour in a harmonious geometric figure. A beautiful curtain track drawn from the mathematical formula of the Piet Hein Superellipse®, telling the tale of a design icon and legacy.

The Superellipse® curtain track is cross-sectionally shaped like Piet Hein's geometric figure, adorned with his logo. The exclusive lighting feature is created in the spirit of Piet Hein, as he himself had a great love of lighting

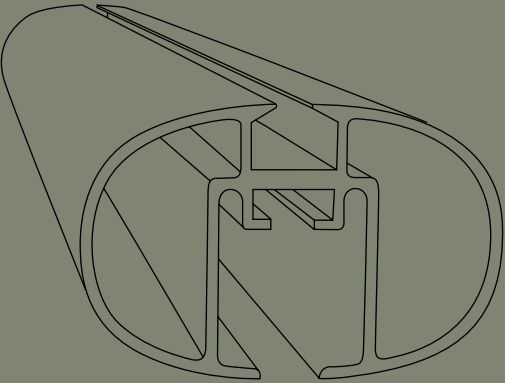

The curtain track is the first in the world to have a built-in LED groove for ambient lighting, allowing smooth and beautiful illumination of the curtain fabric at night. Exclusively from Stilling.

DISCRETELY DECORATIVE

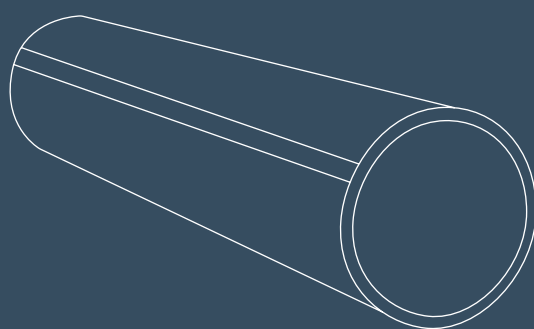

Whether styled to be a distinct installation, boldly framing the windows, or matched tone-on-tone with the ceiling to create the illusion of a freely hanging drapery, we offer the right tracks. All with amazingly smooth and silent functionality. Choose electric operation for ultimate comfort.

HORISONT DECO

Through an exceptional selection of decorative finishes, combined with classic architectural shapes, we have curated a collection of exclusive deco curtain tracks and rods that add an extra decorative detail to the finished installation.

A PIECE OF ART

Based on decades of craftsmanship traditions, we design, develop and deliver curtain tracks for projects of any size; whether it be a custom coloured curtain track for the living room or a 150 meter long bespoke track for an art installation. All created with the same minute attention to detail.

COLOUR ME BOLD

While curtain tracks are often made in subtle and dampened colours to blend with the interior and discretely promote the curtain fabric, we also adore the powerful contrasts of choosing a bold and vivid colour for the curtain track.

Simply specified as any standard RAL or NCS colour, you can choose between thousands of colours and nuances, making the curtain track a tailored and personalized part of the interior.

To us, curtain tracks are design objects as important as any other part of the interior. The right curtain track makes a difference.

CHOOSE ANY COLOUR
FOR YOUR CURTAIN TRACK

CHOOSE ANY RAL OR NCS COLOUR

We are able to powder colour most of our curtain tracks in all colours imaginable to create either a discrete tone-on-tone match with your wall paint or a stunning colour contrast. Simply specify any standard RAL or NCS colour of your choosing.

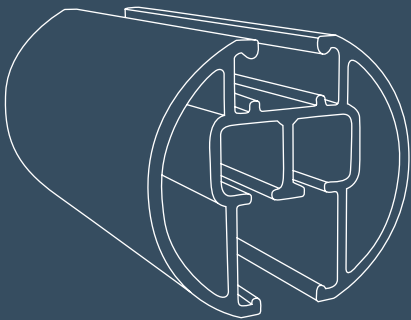

The RAL & NCS colour systems are real-world colour systems, which means that they are not accurate for depiction in print. Always consult an official RAL or NCS colour booklet.

ROOM DIVISION

By using specially designed ceiling supports, the curtain tracks can be lowered from the ceiling, changing the aesthetic of the installation, and bypassing potential obstacles. Perfect for dividing and framing larger rooms, and an ideal fit with the AP 5001 track.
