

INTRODUCTION

For almost 75 years, Ekkelboom B.V. has been a Dutch family business specialized in the development, import and sales of bed linen and bath textiles. Our head office is located in Borne, the beating heart of Twente in the Netherlands. Twente has a very rich textile history. It is therefore not surprising that our products are woven in the Ekkelboom DNA.

Besides our head office in Borne, we have our own offices in Bangladesh, Pakistan and Turkey. We also have very close contacts with all the other important 'textile countries'. With the typical Dutch merchant spirit as well as good contacts throughout the chain, we can fulfil almost any wish. Welcome to the Ekkelboom family!

WHAT WE DO

We are wide awake so that you can have a good night's sleep. We have been in business since 1949 and have been developing the most beautiful bed linen and bathroom textiles ever since. Not only do we know exactly what we are talking about from a technical point of view, but our market knowledge in almost all European countries makes us a valuable business partner. Our customers are very diverse: European concerns, wholesale companies, retail chains, supermarkets, hotels, holiday parks and laundries. Ekkelboom produces under 'private label', but we also supply our own strong brands from stock. You are free to choose from our own collection designs, but we are also happy to develop special designs on request or produce your own designs.

VALUES

We are in close contact with our customers and keep our promises. We do this openly and honestly, transparently and with full attention.

SUSTAINABILITY

Socially responsible entrepreneurship is an important element of our business. This applies to the way we manage our relationship with our partners, but also to how and where we produce our products.

Our manufacturers are without exception affiliated with BSCI and have the Oekotex Standard 100 certification. Ekkelboom B.V. is a partner of the BCI (Better Cotton Initiative). Together with all members, we ensure that already 25% of all cotton worldwide is processed responsibly and traceably.
