Mattress and Pillow Protectors

Sleeping is a physiological need, that most of the human beings spent one third of their life time. Or in other words, if we assume our life time as 75 years, we spend approximately 25 years of this time asleep. Experts recommend that sleeping quality is essential for healthier life.

Even a single sleepless night, can cause nervous mood, restlessness, and lack of concentration that leads to inefficiency on the next day. During sleeping, we are completely refreshed physically and spiritually.

As important as choosing the right mattress and pillows for a healthy and comfortable sleep, it is significant to keep the mattress and pillows as clean as possible.

Although the colorful and well-designed duvet covers, sheets and pillow cases beautify your bed room and contribute to a pleasant sleep, unfortunately, they are incapable of protecting your mattress and pillows against invisible dangers that harm you and your loved ones.

It is in your discretion to prolong the life of your mattress and pillows as new and clean as on their first day, with **wellbed**® Mattress and Pillow Protectors.

wellbed® Waterproof Mattress Protectors keep the mattress clean by securing it from absorbing body excretions (such as sweat, urine and blood) or other liquids or moisture resulting from spills. Back surface with Polyurethane membrane coating enables wellbed® Elastic Mattress Protectors 100 % water resistant and breathable.

Why should you use
a wellbed® Mattress
Protector?

**Protects the bed from moisture and liquid spills
such as urine, blood and sweat!**

People tend to lose an average of a glass of water through sweating during sleep. An unprotected mattress can become marked or stained quite quickly, as perspiration produced throughout the night easily passes through a standard cloth sheet, odor and creates a characteristic yellowish-brown tidemark, where it's absorbed into the upper surface of the mattress.

During the toilet training of infants, bed-wetting is irresistible or even sometimes adults may also experience urinary incontinence at night due to old age or illness.

Severe bleeding experienced by women during their menstrual or postpartum period can cause stains on the bed that are difficult to clean.

The lovely members of our family, our cats and dogs, often go to our bed and even sleep with us. Unfortunately, sometimes reactively and sometimes accidentally, a nasty surprise may be waiting for us in our bed. In such cases, cat and dog urine passing through sheet to mattress; can cause bacteria formation and a persistent and sharp odor.

Prevents all stains!

Do you some days enjoy having breakfast or reading a book while lying in bed with your coffee? Or, might you be one as most of the people who are required working from home with the new era (due to the pandemic conditions), pleasantly choose to work by sitting on bed with computer on their lap and tea cup in their hand, when tired of sitting at the desk for hours?

Or are you the one who is afraid of spilling your tea or coffee on your bed to leave a permanent stain? **wellbed®** Mattress Protectors, with its 100% waterproof and breathable polyurethane back surface, prevents the formation of stains by preventing the contact of your mattress with liquid spills, and protects your mattress from permanent stains!

Noiseless, Phthalate-free and PVC-free

wellbed® Fitted Mattress Protectors contain no harm substances such they are phthalate-free and PVC- free.

Not only preserving the life of your mattress, but also **wellbed®** Mattress Protectors are so lightweight to be noticed that they are noiseless to provide comfortable sleeping environment

Machine Washable

wellbed® Mattress Protectors are durable up to 100 washes at 90 degrees in the washing machine and it does not require ironing. Considering the mattress preferences **wellbed®** Mattress Protectors preserves the features of a mattress chosen while experiencing comfort and hygiene.

Prevents dust mites and bed bugs in your bed

House dust mites; proliferate in large numbers mostly in humid and hot environments can only be selected with microscopes. While we are sleeping, the dust mites, which feed on the skin remnants shed from our body live in our mattresses and multiply rapidly. Without a mattress protector, even two-year bed may contain 2 to 3 million of dust mites, which cause almost 70% of respiratory ailments. These ailments triggers some allergic symptoms such as itching eyes, running noses ,coughing, wheezing and even shortness of breath that leads to asthma attacks.

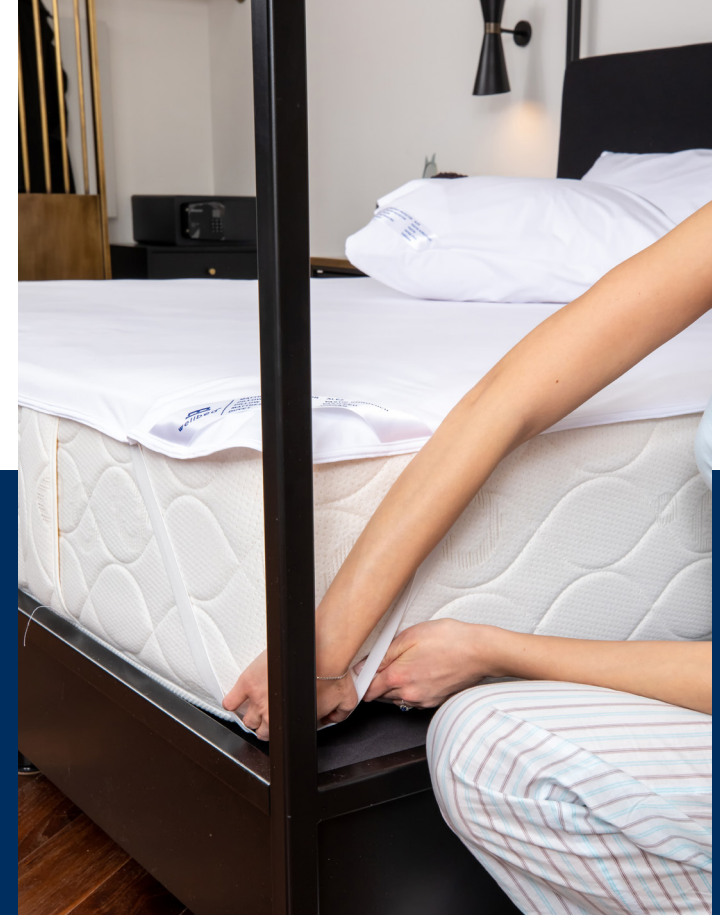

On the other hand, bed bugs, which can even be seen with the naked eye, are small insects that feed on the blood of humans and animals. We usually carry these flightless, slow-moving insects to our bed sometimes with our clothes or sometimes with the things we bring home from outside. Bed bugs, which can live for a long time by breeding in the bed, emit a mold-like odor to the room and cause itchy rashes.

Especially the zippered **wellbed®** mattress protector, which covers the entire mattress, prevents with its anti-allergic structure, skin rashes transferring from sheet to the mattress to form dust mites and bed bugs. **wellbed®** Mattress Protectors are ideal for allergy sufferers.

Products

wellbed® Elastic Banded (with elastic straps) Mattress Protector

Mattress Protector can practically be adjustable and can be fixed from the four edge corners of the bed with four slip free elastic straps which is easily to be used at homes, hotels and hospital beds. **wellbed®** Elastic Mattress Protector provides you a practical solution for a hygienic and safe sleep during your travels. You can carry the **wellbed®** Elastic Mattress Protector with you for your vacations or your outdoor accommodations (hostels, hotels, camps and caravans), which can be folded easily and does not take up space.

wellbed® Fitted Mattress Protector

The **wellbed®** Fitted Mattress Protector, which completely covers the bed sides and completely surrounds the bed is suitable for homes and hotels.

wellbed® Fitted Mattress Protectors, wraps the entire visible surface of top, sides and partial bottom of your mattress (five-sided mattress protection) like a fitted sheet and prevents sheets crumpling, gathering and slipping as well as helping your bed look proper and neat. Most people tend to use **wellbed®** Fitted Mattress Protectors because it is easy to get on and off the mattress and can simply be pulled it off like a fitted sheet and can be thrown in the washing machine. **wellbed®** Fitted Mattress Protectors tends to be good for those who need to wash their protectors frequently.

wellbed® Encasement Mattress Protector

The **wellbed®** Encasement (bed bug) Mattress Protector, have six-sided protection and completely surrounds the entire mattress including bottom side, and can be preferred to be used at home and in hotel beds. **wellbed®** Encasement Mattress Protectors are zippered shut and sealed off to provide full protection against skin rashes from entering the mattress to create mite and bacteria formation. Being fully enclosed style of cover, **wellbed®** Encasement Mattress Protectors, offers you 360-degree protection instead of protecting just the upper surface of the mattress. **wellbed®** Encasement Mattress Protectors are great for people, who suffer from allergens or are concerned about bed bugs. It provides easy use for double- sided beds.

By wrapping the mattress completely, it does not wrinkle, gather or slip under the sheets.

wellbed® Pillow Protector

wellbed® Pillow Protector, provide comfortable sleeping environment to ensure a healthy night rest. Thanks to its anti-allergic structure, a **wellbed®** Pillow Protector lengthen the lifespan of your pillows by shielding them from bed bugs, dust, dirt and bacteria, and also prevents skin rashes to enter the pillow for mite formation.

wellbed® Pillow Protectors, 100 % water-proof and breathable which enhance the cleanliness of your pillow. It prevents pillows to become stained (yellow spots) and odor that may occur over the course of time.

wellbed® Pillow Protectors, which are produced with various fabric options and can be applied to different pillow sizes.

wellbed® Pillow Protectors contains no harm substances such they are phthalate-free and PVC- free.

It is durable up to 100 washes at 90 degrees in the washing machine and it does not require ironing.

Protect yourself against all kinds of allergic diseases-by avoiding direct contact with bacteria, dust mites, and bed bugs!

wellbed® Pillow Protectors cover your pillow and provide a barrier against pillow fiber and feather fillings to be inhaled during sleep, which might cause allergens such as asthma and eczema.
