

“One of our
main principals is
not to make promises
that we cannot keep and
to keep the
promises we made.

İPEKİŞ MENSUCAT TURK AS

www.ipekis.com.tr

İpekîş Factory, bases of which were laid by Atatürk's own hands on October 1, 1925, is known as the first company of the Turkish Republic pioneering the industry. İpekîş, which was established as a joint stock company at that time, also takes pride in being the first export company in the history of the Republic.

İpekîş Hosiery Inc. continues its production, marketing and sales activities in the wool industry field. İpekîş Hosiery Inc., which started operating in its new factory established on a closed area of 25,000 m² in 2012, continues to add more value on itself with new investments. İpekîş's head office and marketing office is located in Nisantasi district of Istanbul.

Our annual production capacity in our modern facilities consists of 5 million meters of weaving and 9 million meters of dye finishing with polyester viscose, polyester viscose elastane, recycle (sustainable) polyester fabrics and particularly, 100% wool, wool polyester, wool polyester lycra and wool polyamide lycra and wool blended fabrics.

BURSA CEMENT FACTORY Co. Inc.

www.bursacimento.com.tr

Bursa Cement Factory Co.,Inc. (Bursa Cimento Fabrikasi A.S.) was established as an incorporated company on 14 July 1966 in Kestel/Bursa. It is still keeping on the characteristic of being %100 open to the public.

The first production line was put into operation in 1969 with a 230.000 tons/year clinker production capacity and 250.000 tons/year cement grinding capacity. In 1976, by putting into operation the second production line, the clinker production capacity was increased to 480.000 tons/year and cement grinding capacity was 520.000 tons/year. With the addition of the third cement mill, the cement grinding capacity was reached to 1.000.000 tons/year. In 1989, it was decided to increase of the clinker production by evaluating increasing demand, precalcination of the second production line was made and as a result clinker production capacity was reached 840.000 tons/year.

In 1992 by the modernization which was made in cement mills, cement grinding capacity was increased 1.200.000 tons/year and by the Roller Pres Unit which was taken into operation in 1993, total cement grinding capacity of Bursa Cement Factory was increased 1.750.000 tons/year. In 1996, precalcination of the first line was made and clinker production capacity was increased to 1.350.000 tons/year and cement grinding capacity was reached 1.850.000 tons/year. Investments for the fourth cement mill with a capacity 175 t/h and a cement silo with 10.000 tons capacity were completed by 25th May 1999.

Today, 1.400.000 tons clinker production capacity and 2.850.000 tons cement grinding capacity and 31.000 tons cement stock capacity are available
