**It's a matter of
responsibility.**

Berndes[®]

QUALITY MAKES THE DIFFERENCE. SINCE 1921.

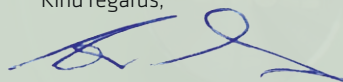

Take responsibility – protect sustainably. That's BERNDES.

At BERNDES, we are proud to look back on over 100 years of company history, filled with innovations and a constant drive for improvement. When Heinrich Berndes founded our company in 1921, he revolutionised the market by introducing the first non-stick cast aluminium cookware. His abundance of ideas and his drive to constantly question his own designs to improve them further inspire us to this day. At BERNDES, some of the values we have embraced for a long time are becoming increasingly important in today's world. The reliability and consistency with which we constantly develop our products provides our customers with a sense of security. You can be sure that by choosing the BERNDES brand you are buying a high-quality, long-lasting product that we are 100 % confident in. In recent years, we have been able to continue to improve our products, particularly in terms of sustainability, and launch a range of products made from 100 % recycled aluminium cans. But we did not stop there. As well as making this important contribution to our environment, our advanced coating even helps to reduce cooking times, further saving energy. At BERNDES, saving energy while maintaining a high level of energy efficiency is important to us at every stage of production, as well as in our customers' homes. Our drive to take responsibility for the quality of our products continues to inspire us to deliver only the best, for which our customers have rewarded us with more than 100 years of trust in our products. Transparency is another important factor in this trust. We are present at every single step of our production and work closely with our suppliers. We are pleased to use resources that are right on our doorstep, such as pan handles made of Sauerland ash wood from a small woodturning workshop near Meschede. We also strive to reduce packaging waste by using less plastic and suggesting reuse options. At BERNDES, we love the environment and want to protect and preserve it, so we will continue to push our sustainability strategy to remain the most sustainable cookware brand in the world. – b.green – b.nature

Kind regards,

Olaf Cordes,
Managing Director

2023 range

Our products

Cooking can be so much more than just putting a hot meal on the table. Cooking is a fun, passionate and exploratory pursuit. Cooking is for everyone, which is why we at BERNDES always strive to give everyone a great cooking experience. Whether you are a cooking beginner, a hobby foodie or even a professional chef, our portfolio has the right product for everyone. We are constantly developing and are proud to offer improvements and even some innovations to our range this year. They are even more sustainable, resource-saving and energy-saving, while maintaining the same high quality standards. BERNDES makes cooking an experience for all the senses and leaves you with a clear environmental conscience.

Our responsibility

For a sustainable approach to our world

Thankfully, more and more people are becoming aware that we need to treat our environment responsibly. Many people make an effort in their daily lives to buy locally, avoid unnecessary car journeys or buy unpackaged food as much as possible and store it in sustainable containers to save on plastic waste. Our products are also an essential part of everyday life, which is why we at BERNDES have been working for years to ensure that our cookware is produced in a sustainable and resource-saving way. We have already achieved this in many areas. Many of our products are made from 100 % recycled aluminium cans. Our completely plastic-free and therefore PTFE-free b.nature coating now maintains its non-stick properties twice as long as before which is four times longer than comparable ceramic coatings. We have even been able to make improvements to handles where there are certain limits to the material composition to ensure safety and heat resistance. In the future, these will also be made of 50 % sustainable materials. We are also taking an increasingly minimalist approach, considering whether each pot really needs its own lid and each pan its own handle. Our tried-and-tested "Vario Click" series and our new "b.perfect" series only require one handle for all pans. Our lids can be used with different models and also help to save energy!

All our lids also fit other commercially available products that are the same size. Yet another BERNDES contribution to sustainability and a good, green conscience.

We've now been honored by the prestigious Kitchen Innovation Award for the second consecutive time for responsible corporate management in resource conservation and the processing of recycled raw materials. In addition, we are underlining our ambitions by participation in the "Ökoprofit" project.

Our path to tomorrow

At BERNDES, we love what we do and have been bringing together the needs of our customers with the latest trends and new opportunities for over 100 years. We believe it is our responsibility to continuously improve the sustainability of our products. Time-tested classics such as our Bonanza pan are of course still part of our range, but they have been continuously improved by our innovations around coating and packaging, for example. That is why our patented b.nature coating now not only retains its non-stick properties for twice as long, but also shortens the frying time to save energy. This means we can guarantee faster and more even heat transfer with the same level of enjoyment.

Moving into the future with innovative know-how

What does it mean to take responsibility now? For us at BERNDES, it means doing the best we can to ensure that our products meet the needs of our time.

A significant and important topic at the moment is that of how to save energy in order to preserve the resources at our disposal and conserve them for a long time. This is nothing new for BERNDES; for a long time now, we have been committed not only to producing stylish, high-quality cookware, but also to ensuring that the production of our products is sustainable from start to finish, saving resources in the process. This is something we owe to our founder Heinrich Berndes, who revolutionised the world of cookware with his innovative idea of non-stick coating. Today, there are many non-stick coatings, but BERNDES has been dedicated to constantly improving its own products for over 100 years. This will not change in 2023; we are setting new standards with our b.nature coating: the non-stick properties last twice as long, or four times longer than comparable ceramic coatings. The material and the processing are patented.

In addition, our b.nature products heat food not only through normal heat conduction, but also through intense radiant heat. In tests, this faster and more even heat transfer resulted in a significant reduction in cooking time – more than 10 %. The b.nature coating is also a quartz coating, which means it is of mineral origin allowing BERNDES to eliminate the use of heavy metals, PFOA and bisphenol A completely. We also do not use plastics such as PFAS or PTFE in our coatings. We believe that's our responsibility.

We are making the future our home

When we are convinced of something, we pursue it resolutely. That is why our innovative b.nature coating is used in many of our new products and satisfies the demands of professional and amateur chefs alike. Used in b.perfect, Alu Recycled or our b.free products in the promotional range, it allows us to avoid using any plastic in the entire manufacturing process. It also encourages us to reduce the use of plastic as much as possible in other production processes and to further increase the proportion of recycled materials across our range. Selecting the right raw materials is also important. Using recyclable raw materials, such as 100 % recycled aluminium, is our top priority. And last but not least, our product packaging: wherever possible, we avoid plastic completely and instead use reusable materials such as cardboard or practical cotton bags – the resulting benefit of the packaging for storage or as stacking protection is of particular importance to us.

We are on the right track with this. After all, BERNDES is a brand that stays true to itself by developing high-quality products and constantly improving them. We are driven to remain sustainable to protect our future. We will achieve this if we continue to follow our visions and, using our innovative know-how, make responsible and sustainable decisions with the resources at our disposal. This is something we believe in strongly at BERNDES. We would also like to share this drive with you, our customers, that we are doing everything we can in an important area of everyday life to protect our environment and therefore our future, and at the same time make it a better place to live.

Our measures for more sustainability

Our high-quality cookware saves energy

Our packaging is increasingly plastic-free and made almost exclusively from recycled FSC cardboard

Handles will be made of 50% sustainable material in the future

Short journeys: main production and transport in the EU

Reuse of packaging as stacking protection or storage/shipping carton

100% quality by using alloys that are approved for foodstuffs

Money saving with durable energy-saving material

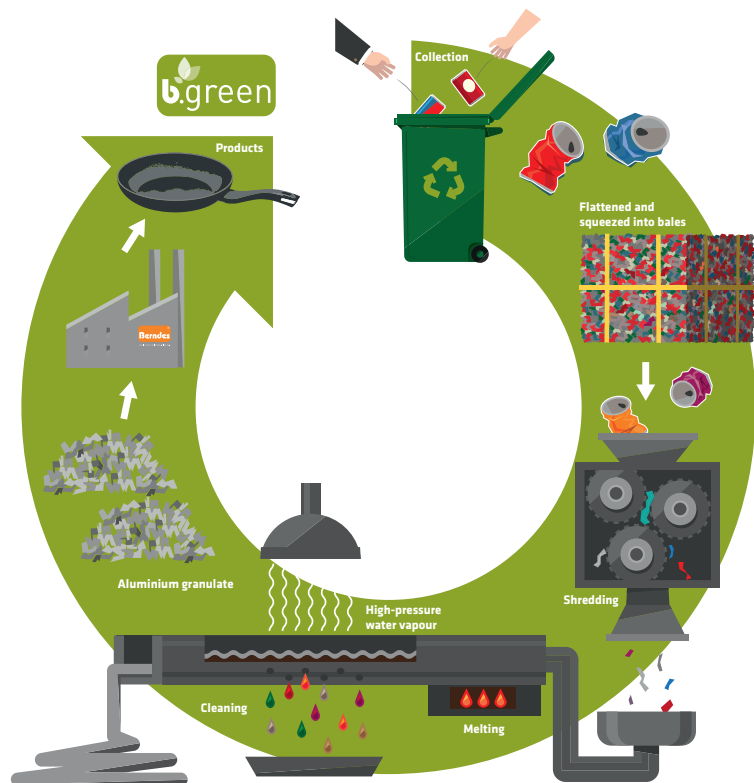

Certified, sustainable material

b.nature – b.green

For a green future

Nowadays, zest for life and pleasure are inextricably linked with sustainability. An increasing number of customers regard nature as an important asset and act accordingly in everything they do, from buying their food to preparing their meals. At BERNDES, we support this commitment with sustainable cookware like those in our b.green product line. All the cookware in this series is made from 100 % recycled aluminium cans. This means that instead of waiting 80-100 years for a can like this to decompose in landfill, we can use, for example, 49 of these cans to make a new 28 cm pan in just 5 minutes. This means that buying a b.green product is a 100 % positive contribution to environmental protection. Resource-saving and sustainable. This is proven by the test coating from the world's leading safety science company UL, for example. Our coatings also emphasise sustainability and offer efficient heat conduction. Any residual energy is stored in the material for a longer time after cooking or frying. This means that energy consumption is reduced from the first use. Out of respect for nature b.green – b.nature.

Classics

Perfectly timeless

When it comes to cookware, it's not only the internal values that matter. Pots, pans and other kitchen utensils also have to look good in the kitchen. This is no problem with the BERNDES Classics range! The range features products that meet the highest quality standards and are also unparalleled in terms of design. Timeless. Functional. Simply perfect.

BONANZA® pan

Stylish indulgence

Since it was launched in 1976, this has been the pan that stands out from the rest: our legendary Bonanza® pan, with a rustic wooden handle that makes the pan look amazing in any kitchen. But this traditional product also has a lot to offer in terms of functionality.

At BERNDES, we have continuously enhanced the Bonanza® series and adapted it to customers' changing requirements. It is now also suitable for induction hobs. Alongside the classic frying pan, there is also a sauté pan, wok, grill pan and saucepan. Amateur and professional chefs can therefore find the right pan for all their needs and for almost any cooking method. All three cooking tools have one thing in common: their unique non-stick coating. This makes cleaning easier and prevents burning. These properties guarantee the best cooking results. For stylish indulgence whenever you feel like it.

True quality workmanship: the BONANZA® wooden handles made from Sauerland ash wood are manufactured in a small wood turnery near Meschede and are particularly robust.

Pro

For that special something

Our PRO products are the perfect choice for all professionals working in commercial or domestic kitchens. Ambitious cooks' hearts beat faster when functionality and the best practical properties are combined with absolute durability. As we at BERNDES only use recycled secondary aluminium for this collection, our PRO products are 100 % sustainable. The extremely high quality of our products will impress anyone who expects that little bit more from their cookware.

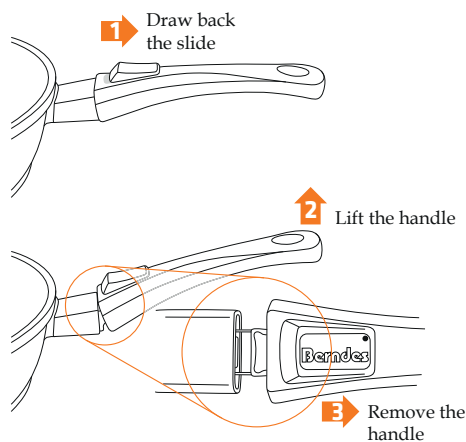

Pro

It clicked for us

The Vario Click series is particularly popular in our PRO cookware. Not only is it capable of providing optimal cooking properties on all hob types, whether it be induction, gas, electric, glass ceramic or halogen, the removable handle also means that the pan can be quickly slid into the oven to give the dish a finishing touch. The pan body is completely ovenproof even at high temperatures and can be easily reattached with a “click” once the baking process is complete. Burnt fingers? – not here! The Vario Click series offers a high degree of sustainability throughout the entire manufacturing process. The removable handle is also important here, as it can be used for different products in the series and, together with the now handle-less pan, can also be easily stored away to save space. Another highlight of this series is the special b.pure PRO non-stick coating. The three-layer coating has always been extremely resistant, but we at BERNDES have now strengthened it even further, as you can feel from the rougher surface. In addition, our b.pure Pro coating is manufactured without any harmful substances and is CO₂ neutral. Manufactured in a resource-saving and safe way, this coating can even withstand metal kitchen utensils and achieves a perfect cooking result – a real improvement for pure enjoyment!

Tricion Resist

Hot in seconds and visually stunning!

Perfect heat distribution, extremely durable material, excellent handling – our developers at BERNDES have created the Tricion Resist frying pan to meet all of these requirements. A unique 3-layer construction of stainless steel, aluminium and stainless steel means that the cookware heats up extremely quickly and the heat is distributed evenly. It is easy and safe to use thanks to the heat-insulated stainless steel handle. Another special feature is the non-stick coating with a specially developed 3D stainless steel protective grid that does not show scratch marks, even when using metal kitchen utensils. The Tricion Resist features an Easy Oil Flow system to ensure that oil is optimally distributed over the base of the pan. Fried potatoes, breaded schnitzel and tender steaks all turn out perfectly and win over everyone who tries them with their intense flavour.

And, best of all, our Tricion Resist is suitable for all types of hobs and can even be used in the oven. So it's not just a standard pan. For everyone. For every day. At a fair price.

b.double round cookware set, 3-piece (PU 1)

035100 0021957959

An all-round cookware: Braising, frying, baking bread or just cooking.

Cooking pot
Ø 24 cm H 9.8 cm 4.1 litres

Serving pan
Ø 24 cm H 6.1 cm 2.5 litres

Combined as roasting dish
Ø 24 cm
H 15.5 cm 6.6 litres

Material	Extremely durable, high-quality cast aluminium
Bottom	Solid, approx. 6-mm-thick special, induction-compatible bottom for rapid heating and optimal energy efficiency
Coating	100 % PFOA-free, 3-coat, reinforced, non-stick surface for low-fat cooking and easy cleaning
Handles	Moulded, fully oven-safe ; intuitive handle system for easy attachment of both parts
Lid	Glass lid with silicone seal to prevent rattling and protect the cookware's edges
Heat sources	Gas, electric, glass ceramics, halogen, induction
Oven	Use in oven up to 260 °C / 140 °C (with glass lid)

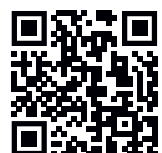

Geniales Set for minimalists

Plenty of space in the smallest kitchen – with this genius set for minimalists! A creamy soup today, tomorrow a juicy roast, the day after tomorrow a delicious fragrant stew – the b.double round provides countless options for treating yourself, your family or friends to tasty dishes. And all in a trendy design! The set provides unparalleled versatility for those looking for something special. They can be used for roasting, boiling, braising or even baking. And the best thing is that the multi-functional all-rounders are suitable for the oven! This means you can fry dishes on the hob and then easily continue to cook them in the oven. That's what modern cooking is all about!

The b.double round is also perfect for baking bread.

Handles	Welded-on handles in linear design, stays cool during cooking
Lid	Glass lid made of break-resistant safety glass with stainless steel rim and stainless steel knob
Heat sources	Gas, electric, glass ceramics, halogen, induction
Oven	Use in the oven up to 240 °C / 220 °C (with lid)

Edition 100

100 years of expertise make a real difference!

The BERNDES Edition 100 series is all about reliability, skill and sustainability. We launched this cast aluminium cookware to mark our 100th anniversary in 2021. Chefs can enjoy a first-class non-stick coating and be confident that no harmful substances have been used in the manufacturing process, allowing the creation of delicious culinary delights to take centre stage. The series is particularly impressive on induction hobs because of its thick, stable base. A true heavyweight in the very best sense.

Allrounder

Masterful all-rounders

Families with children, single households or couples with dogs... in everyday life, you often have to get things done quickly in the kitchen. However, this doesn't mean that meals can't also be healthy and nutritious. Is that possible? It is! With the ALLROUNDER series, here at BERNDES we have created cookware that meets all these requirements – and much more! Our ALLROUNDERS are not only flexible and incredibly versatile but they also offer excellent value for money. For everyone who likes quick, healthy food without compromising on safety and quality.

A black frying pan with a detachable handle is shown on a dark surface. The handle is black and has the brand name 'Bernard' on it. To the right of the pan is a wooden cutting board with three red tomatoes. The background is a dark, textured surface.

b.perfect

Sustainable sales arguments

Our new product, b.perfect, is a completely new approach. We are totally convinced that this new sales concept works. It fits perfectly into our sustainable focus for the future and offers you as a customer the chance to support us in this approach. But what exactly is it all about? Consumers buy pans and handles separately. This makes no difference in terms of price, but provides scope for promotions. The sales approach really shines in terms of sustainability: one handle, many possibilities. When purchasing a second pan, there is no longer any need to buy an additional handle. This saves 50 % of resources and material, and the consumer also saves on the cost of the second handle.

You'll be delighted in the kitchen when you realise how enormously practical it can be to have just ONE detachable handle. Not only does this save an incredible amount of space in the cupboard, but it also means that every pan can be used in the oven.

The same principle also applies to the lid – it is sold separately from the pot, but can also be used on other models of the same size. Don't forget that any lid helps to save energy as well as preserving important flavours.

You can find our PoS concept for b.perfect on page 78.

Balance® Induction Enduro

High-quality coating

We have improved our top innovation Enduro: b.pure is our new coating which has been specially designed for Enduro and which ensures that nothing can burn! The coating is revolutionary in its abrasion resistance, non-stick properties and durability. And that's not all! b.pure also meets the highest sustainability standards because of the significantly extended lifespan of the coating and therefore of the product, totally in keeping with the original meaning of sustainability, which is "long-lasting effectiveness". PFOA or BPA? No! Some more plus points are the pleasant feel and the unique surface design. Even with daily use, the coating stays on top form and retains its excellent properties. Even metal kitchen utensils won't damage it. A totally modern coating.

b.pure

True to its name: the series scores with unrivaled toughness and extreme durability.

Sustainable 3-layer premium non-stick coating with high scratch-resistance
b.pure

Ergonomic handle for comfortable handling, now with double screw connection

Starter

The Beginner series

Got your own apartment for the first time, on a small budget, but unwilling to compromise on the quality of your cookware? No problem with BERNDES. We believe that good doesn't have to mean expensive! That's why we have developed our Starter range, which has excellent cooking properties at an affordable price, making it just the thing to get you started in your own kitchen. With BERNDES, no one has to forego quality and sustainability. Our new starter series b.clever, for example, is also made of 100% recycled aluminium cans and also features our improved, all-natural and purely mineral b.nature coating, which fulfils all desires. Environmental protection for everyone – it's very important to us!

Specials

For those special moments

Special moments of pleasure sometimes require special cooking equipment that can master all challenges. We have developed the BERNDES Specials for these moments. Perfect for making wafer-thin crêpes in a crêpe pan or succulent Sunday roasts that simmer for hours in the right roasting pan while diffusing heavenly aromas – anything is possible.

Specials

b.iron

As hard as iron

A new addition to our BERNDES Specials is the b.iron series. Cast iron pots and pans were used by our grandmothers and, if well looked after, our grandchildren can do the same. Of course, our b.iron series is also largely made of recycled material, which is essential for BERNDES' claim to sustainability. Cast iron also stores heat for a long time and releases it evenly, which can save a lot of energy when cooking. Our b.iron products are perfect for braising. Once browned, a delicious roast can cook in its own juices for a long time, because the aroma points on the inside of the lid allow the water vapour to condense and drip evenly back into the pot. However, it's not just juicy roasts or crispy fried food that can be cooked in the pan, our b.iron pots can also be used to bake breads. Crispy on the outside and soft on the inside – perfect. Moreover, with b.iron you don't need to use your kitchen cooker at home, these products can also withstand the heat of a campfire for very special moments of enjoyment – that's what BERNDES Specials are all about.

True Multi-Talents

Transformer

BERNDES frying pans are real all-rounders! They are perfect for browning and braising food on the hob as well as for cooking dishes in the oven. Practical details, such as those offered by the BERNDES Universal Roaster, also allow them to be used as a gratin dish or heat-retaining warmer. If the heat-resistant glass lid is not needed, it doubles as a serving dish or can be used for gratins. The frying pans can be used with all common types of hob and are also ovenproof.

b.double is also suitable for use as a roasting pan, its special feature: the top and bottom are made in one piece, the handles fit perfectly. This means the roasting pan closes very tightly. Thanks to this, you can also braise for a long time at low temperatures.

It's all about the edge!

You're never too old! Crêpes are always delicious, regardless of whether they are filled with chocolate spread or jam, sprinkled with cinnamon and sugar or served with savoury toppings! And with the crêpe pan from BERNDES, they will always be a guaranteed success! The high-quality non-stick coating means that the wafer-thin pancakes are ready to flip in no time. The pan is also perfect for fried eggs or scrambled eggs because the back edge of the pan is slightly higher than the front. This guarantees success!

You can always find the right fit with us!

Our range includes a large selection of matching glass lids for our BERNDES cookware. When you are preparing a festive roast, for example, you need a lot of space inside your cookware. Our domed glass lid, available in various diameters, is the perfect choice for this. Our special glass lid, also available in various sizes, is heat-resistant, shatterproof and extremely elegant. The glass lids with silicone rims make the perfect partners for our ceramic-coated products. They fit snugly, do not rattle and prevent smells from escaping. This means that the cookware and its contents can easily be stored in the fridge without other foods absorbing the smell of the dish.

Domed glass lid

Material Domed, heatproof Pyrex® glass lid; black plastic knob is **heat-resistant to 200 °C**

Suitability Ideal for energy-saving, full-view cooking

Special glass lid with stainless steel rim

Material Break- and heat-resistant safety glass; premium stainless steel rim and knob are **heat-resistant to 220 °C**

Suitability Ideal for energy-saving, full-view cooking

Glass lid with silicone rim

Material Break- and heat-resistant safety glass; silicone rim **protects delicate cookware edges**

Suitability Creates an excellent seal with BERNDES cookware. Ideal for energy-saving, full-view cooking or storing in the fridge

BesserKochen

For experimenting in the kitchen

We need your feedback so that we can work on becoming even better every day. You, as our customers and end consumers, support us with every comment, but also with every critique, to question ourselves and to further optimise our products. It's never been easier to get in touch with us; why not take a look at our Facebook or Instagram profiles? We regularly showcase new kitchen ideas, tips and trends there. From delicious, freshly-baked bread and hearty stews to seasonal recipes, the magazine is full of colourful and interesting ideas. It also features examples that demonstrate which BERNDES products are suitable for which type of cooking. For anyone who prefers to hold something printed in their hands, we publish our in-house magazine "BesserKochen" (Better Cooking). This is published regularly and contains interesting articles about cooking and experiences. With everything from great recipes to fresh ideas for seasonal and regional dishes, BesserKochen provides both inspiration and entertainment, as well as motivation to experiment in the kitchen. The only thing you'll need to go with it is great cookware and a great feeling – and of course, you can be sure to find that from us too!

Product Presentation

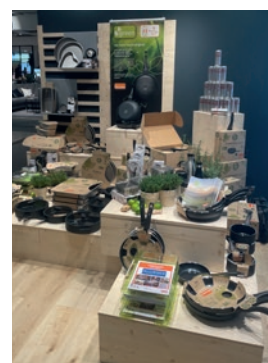

Good pitches at the POS

With our display concepts for BERNDES products in the field of trade, we provide you with some best-selling pitches. We would be happy to work with you to develop an individual strategy on how you can increase your sales sustainably with a carefully-considered product display. The key elements are communication as equals and our core values of quality and sustainability. We have developed a shop system that can be adapted to different sales areas, whether spacious or cramped, flooded with light or darker, by using flexible fixtures and fittings. The system helps create an atmosphere, sense of navigation and space to present our product range in an appealing and authentic way. This means that our products look great in the kitchen and at the POS!

BERNDES' Home

Where cooking is a way of life

We don't eat just to get full and we don't cook just to put a meal on the table. Cooking and eating are ways of life that are shaped by a combination of taking pleasure in good food and having an awareness of healthy eating. Socialising, enjoying creating unusual dishes and exploring new flavours are all important. The kitchen has changed from a purpose-built place to a living space and has become a place for great conversations and time with family and friends. This is exactly what we at BERNDES want to support, because we are a brand you can approach. This means that our employees are always ready to listen to you, our customers. After all, sharing ideas with you makes it possible for us to continue to produce the high-quality cooking tools that you need to enjoy this special way of life. BERNDES cookware is therefore essential in any household that values high-quality, durable cookware that is green and good value for money. Our brand has a global reputation and offers the right tool for every kitchen situation. From grill pans and saucepans to woks and crêpe pans, from slotted spoons and meat tweezers to spatulas, BERNDES has a wide range of cookware to suit your needs. You can find an overview of the whole range here: <https://go.berndes.com/katalog>

Our passion for you

At BERNDES, we develop our products for and with our customers with a great deal of dedication and passion and a love of innovation. BERNDES represents quality, sustainability and durability. Once you've bought a product from us, you will enjoy it and cherish it forever. We strive to ensure that our customers are satisfied and are happy to recommend BERNDES cookware to others. And if they're not, we're always open to hearing their criticisms and suggestions. That's the only way we can continue to perform at a top level. We use our passion where we need it: in the continuous development and optimisation of existing and new products, but also when it comes to consistency, which is intended to provide a sense of familiarity and comfort at all times. Nowadays, BERNDES is synonymous with innovative, high-quality and sustainable cookware that promises a great deal of cooking pleasure, both in the home and in the professional kitchen. We thank all our customers for their years of loyalty and the motivation to make every day a little bit better and more sustainable. Together with us!
