Electric filtering kettle 2in1

FILTERING AND BOILING WATER FROM NOW IN ONE DEVICE

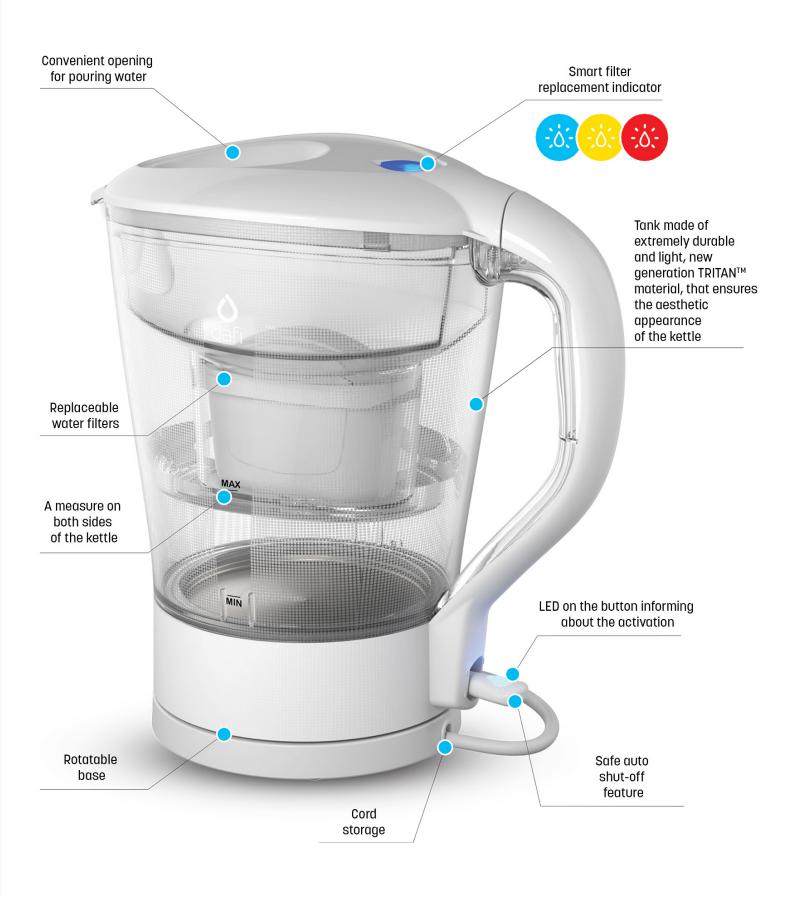

Dafi electric filter kettle allows you to conveniently boil water without having to filter it in a separate vessel. Modern technology combined with timeless design and two **universal colours** (white and black) make that the kettle fits perfectly into the interior of any kitchen.

Dafi UNIMAX filter, which is well known on the Polish market, takes care for the taste and purity of stone-free water, improves the quality of tap water, and primarily reduces the hardness and content of heavy metals, chlorine and other substances that may adversely affect the taste, smell and colour of tap water.

Thanks to Dafi's compact solutions, you will save time, money and space in the kitchen! Enjoy the delicious taste of coffee and tea.

PURE SAVINGS

dafi.info kettle with filter

ELECTRIC FILTER KETTLE

Filtering and boiling water from now in one device

- The first and only filtering kettle on the Polish market made of Tritan®, the extremely durable material
- · Total capacity: 2 l
- · Rotatable base
- · Convenient water filling hole
- · Safe and automatic shutdown function
- · Indicator with SMART LED sensor
- · Cord storage
- 1 filter included

INNOVATIVE QUALITY OF WORKMANSHIP - TRITAN™. The tank of the electric filter kettle is made of a new generation TRITANTM material. This material provides an aesthetic appearance thanks to its excellent transparency, and it is also extremely durable and lightweight. Tritan™ is BPA-free, and it is safe in contact with food. It is also a much better insulator, so the water will stay hot longer after boiling. The transparent housing of the tank and a special measure allow you to control the amount of water that you want to put into the cooking process.

Smart LED indicator that reminds you about the filter replacement. The indicator light glowing blue means that your filter cartridge is in good condition, while the red colour means that the filter needs to be replaced.

A special rotating base that allows the Dafi filter kettle to be placed in any position. It allows for comfortable use of the device by both right and left-handed people.

filter jugs

Tap water can be just as good as store bought.

Take the Dafi filter jug. It will make tap water perfect for drinking and cooking.

Each month, the filter provides up to 200 litres of high-quality water. Thanks to Dafi, you will save time, money and reduce the amount of plastic waste.

PURE JOY

CRYSTAL classic 2 litre.

The best jug for both filtering and serving fresh water

The Crystal jug combines aesthetics with functionality. It can filter a litre of water at one time. The LED indicator informs about the need to replace the filter. We recommend the Mg+ filter for the glass jug, which covers more than 20% of the daily magnesium requirement of an adult, on average.

- · Total capacity: 2 l
- Filtered water capacity: 11
- · Made of high quality glass
- · Non-slip base ensures stability
- Inlet with a hinged flap protects against dust and dirt
- 1 filter included

Top quality glass

The Dafi Crystal filter jug is made of borosilicate glass, characterized by high resistance specified in the ISO 3585 standard. The jug is environmentally friendly.

The LED indicator is equipped with a sensor, thanks to which the diode flashes with appropriate colour each time the jug is filled. If the LED is blue, the filter is in good condition. Red colour indicates that the Dafi filter needs to be replaced with a new one.

Easy filling

A special inlet with a hinged flap opens automatically when water is poured into the jug. This allows you to fill it without having to open the lid and protects against contamination.

tap water filters

Dafi filters soften tap water and remove mechanical impurities, some heavy metals and chlorine. Jug filter system Dafi includes three types of filters, differing in shape and efficiency.

Classic filter provides up to 150 litres of filtered water.

Unimax filter is characterized by greater efficiency and is especially recommended for families and people who use filtered water in the kitchen.

DAFI unimax

The Unimax filter is a universal filter that fits jugs from various manufacturers. Thanks to this, people who have filter jugs from other manufacturers, can buy our filters and enjoy clean water in the kitchen.

Unimax filters are suitable for filtering larger amounts of water, so they are recommended for people who cook a lot and often. Thanks to these filters you can easily and quickly purify the water in the jug for the preparation of soup and other dishes. The filter should be replaced every

only removes harmful substances

improves the taste and smell of tap water

Standard

Standard filters contain a properly selected and systematically controlled filtering mixture consisting of activated carbon and ion exchange resin. Thanks to this, standard filters reduce water hardness (causing the formation of scale deposits), the content of heavy metals, chlorine compounds and other undesirable substances that may have a negative impact on taste and smell of tap water.

5 levels of filtration – guarantee of effectiveness

The top cover of the filter catches mechanical pollution. With appropriate design, it ensures proper circulation of filtered water.

The filtering mesh retains suspensions or sediments in the water, e.g. foam, grease, rust.

The ion-exchange resin removes some heavy metals from the water and captures the compounds responsible for scale. Thanks to this, the water is softened and there is no cloudy sediment in

Activated carbon reduces chlorine and organic compounds located in the water tap. It removes the unpleasant smell from it and improves its taste.

Microporous bottom cover structure carries out repeated mechanical filtration and ensures the highest purity of water.

AGD+

AGD+ filters are recommended for households with very hard water. Thanks to the increased content of ion-exchange resin, they effectively protect household appliances against the excessive wear caused by scale deposited on the heaters. Filtered water is suitable for a coffee machine, iron and air humidifier. Filters do not demineralize water and fit most jugs from other manufacturers.

Hard water reduces intensity of the taste of food and drinks and extends the cooking time of meat and vegetables.

Compared to the Standard filter, AGD+ filter contains more ion exchange resin to protect household appliances against limescale.

functional filters magnesium

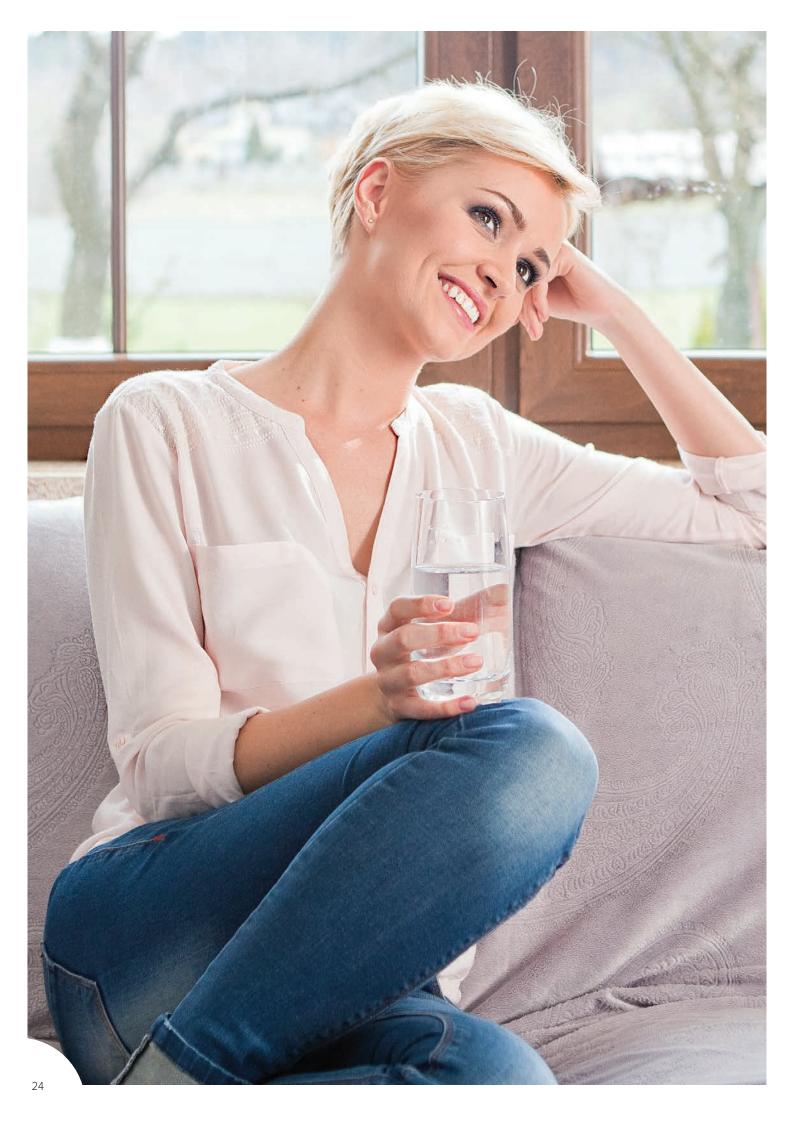

Magnesium Mg+ filters ensure effective water purification and enrich it with magnesium, which is the basis of a healthy diet and well-being.

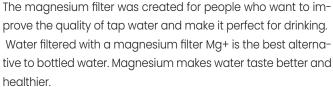

magnesium

The magnesium Mg+ filter purifies the water and enriches it with life-giving magnesium. It covers over 20% of the daily requirement of an adult for this element. In addition, it basically functions as all other Dafi filters - it reduces the content of heavy metals, removes most of the substances that adversely affect the taste and smell of water.

Magnesium is essential for the proper functioning of the body. By including water containing this element in the diet, you can be sure that you have an easy and pleasant source of well-absorbed magnesium. With consideration to many factors, including deficiency of magnesium, which is found quite often, enriching the diet with this precious mineral is highly recommended. With proper magnesium supplementation, you will prevent fatigue, depression, muscle cramps and cardiovascular diseases.

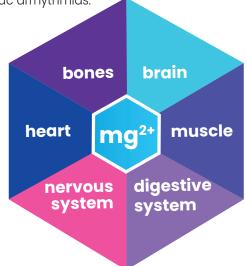

mineralizes water

improves the taste and smell of tap water

Magnesium - the element of life

Magnesium should be included as an essential element in your diet. This mineral reduces stress, lowers your blood pressure, increases your ability to concentrate, The magnesium filter was created for people who want to prevent atherosclerosis and cardiac arrhythmias.

functional filters

ALKALINE WATER

The pH+ alkaline filter is recommended for people who want to improve the quality of tap water and quench their thirst with mineralized water, that has alkaline-forming properties. Water filtered with a pH+ alkaline filter is the best alternative to bottled water. The minerals contained in it, such as calcium, sodium and magnesium ions, make the water tasty and healthy.

CLEANSES AND ALKALIZE WATER

Innovative pH+ alkaline filter that increases the pH of the water. In addition, it removes the taste and smell of chlorine.

maintains the proper pH of the body

slows down the aging process

reduces acidification of the body

The pH+ alkaline filter is a simple and easily accessible way to obtain clean and tasty alkaline drinking water.

pH+ filters

Properties of pH+ alkaline filters

ALKALIZES	The modern diet contains many products that contribute to the acidification of the body, including meat, bread, coffee, alcohol, pasteurized juices, carbonated drinks, fish and seafood, eggs and sweets. Products that regulate pH are mainly fresh fruit, vegetables and non-carbonated alkaline water. So it is not surprising that maintaining the proper pH in the body with means of a typical diet is difficult. The body tries to eliminate the acids produced at time of digestive processes along with sweat, urine and exhaled air. Consuming the recommended amount of water (1.5 - 2 litres per day) in the form of filtered, alkaline water, supports restoration of the body's pH to normal levels.
CLEANSES	Activated carbon contained in pH+ alkaline filters improves the taste and smell of filtered water and removes the chlorine scent.
MINERALIZES	The pH+ alkaline filter does not demineralize tap water, thus it leaves valuable magnesium, calcium and potassium ions in it.
IMPROVES THE TASTE	The pH+ filter purifies the water from substances such as chlorine and pollutants from the water supply system. It improves its taste, so that you can enjoy pure water every time you feel thirsty.

tap water filter bottles

Enjoy the taste of filtered water, wherever you are!

The first water filtering bottle made in Poland.

Designed for people who appreciate regular hydration of the body, play sports and live in harmony with healthy lifestyle.

Thanks to the favourable dimensions and ergonomic design, you can always have it with you without worrying about the need to buy water in disposable packaging.

The Dafi Soft filter bottle is a handy source of clean water. Long walk, jogging at morning, time at the fitness club - wherever you go, take a bottle of Dafi with you. Take a sip of activity today!

The Soft Filtering Bottle will quench your thirst for tasty water, wherever you are. All you have to do is find a tap and fill your bottle with water. Save money and time!

Retains essential minerals (including calcium and

magnesium)

SOFT FILTERING BOTTLE

The bottle is equipped with a carbon filter that removes substances from tap water that may negatively affect its taste and smell (e.g. chlorine and organic compounds). The filter leaves an unchanged amount of naturally occurring minerals in it.

- Solid filtering bottle is handy and ergonomic.
- No harmful Bisphenol A and S.
- **Use of Tritan®** makes the Solid filtering bottle light, safe for health, it does not absorb odours, is durable and resistant to damage.
- You may wash the bottle tank in the dishwasher.
- The Solid filtering bottle uses a standard Dafi bottle filter with efficiency of 150 litres.
- **Replaceable filter every month**, made of coconut shells, which removes unpleasant taste and smell of chlorine from tap water. It leaves the amount of naturally occurring minerals (mainly calcium and magnesium) unchanged, thanks to which the water retains elements valuable for health.

WATER BOTTLES

WATER BOTTLE Dafi 0,6 I

The handy Dafi water bottle is indispensable at school, work, university, and at time of physical activity. It will allow you to safely transport and store water in a backpack, bag or handbag. Just filter the water in a Dafi jug, pour into a convenient water bottle and go! The water bottle is equipped with a sports mouthpiece, thanks to which drinking water is comfortable and easy, even while moving. It has been profiled in such a way that it can be comfortably held with one hand.

WATER BOTTLE Flexi 250 ml.

A handy and lightweight softflask solution with a comfortable silicone mouthpiece. The hydration bladder is ideal for both athletes and runners, lovers of hiking in the nature as well as children at time of breaks or playing in the fresh air.

EASY TO USE SILICONE MOUTHPIECE

-squeeze it with your teeth and drink

- The water bottle does not leak, thanks to the mouthpiece, which prevents dripping.
- The Flexi hydration bladder folds up small and weighs little. The filled water bottle is compact in size, and it becomes an almost unnoticeable piece of equipment when it is emptied. You can easily fold it up to a small size.
- Fits in waistcoats, running belts and school backpacks.
- Free from bisphenol A (BPA free).
- Made of safe TPU material the bottle does not absorb odours, does not affect the taste of water, and is completely safe for health.
 The materials used are resistant to damage, significantly extending the durability of the water bladder.
- Dishwasher safe.
- With the Flexi water bottle you will no longer be disturbed by the sound of splashing water. The Dafi Flexi bottle can store liquids at a temperature of 0 to 40° Celsius.

flow comfort tap water filtering system now Dafi water straight from the tap

How does Flow Comfort work?

The system consists of a filter and a tap. The water microfiltration technology is based on several stages of water quality improvement, all of this enclosed in one filter cartridge. Water flows through layers of polypropylene non-woven fabric, a bed of high-quality ion-exchange resin and a carbon block. This water filter equipped with the head allows you to adjust the level of carbonate hardness reduction.

FLOW COMFORT SYSTEM

BENEFITS:

Protection of kitchen utensils against stone deposition.

Quick and unlimited access to tasty, filtered water, straight from the tap.

ONE CLICK SYSTEM - Very easy to change the filter without tools

Water ideal for cooking and eating without overcooking.

Guarantees of a proven brand with over 30 years of experience.

EASY ACCESS

Bleed and replacement lock buttons dependent on water hardness. Is done with the help of filter are located on the front of the device.

FILTER HEAD

Allows you to choose the level of filtration,

EASY ASSEMBLY

Connecting the filter to the installation of quick connectors and LDPE pipes.

WATER SOFTENING ADJUSTMENT

The patented mechanism allows for simple adjusting the degree of water softening.

SPACE SAVING

The water inlet and outlet are on one side, which allows the filter to be mounted, for example, on the side wall of the cabinet.
