WELCOME TO USHA HANDICRAFT

OUR STORY

Usha Handicraft was established in 1997 as a social business company to create jobs i.e. income for erstwhile unskilled women belonging to landless and marginal i.e. Poor households.

Usha Handicraft is socially committed leather goods manufacturer and exporter from Bangladesh renowned in producing finest leather products. We have a team of skilled craftsmen and craftswomen for leather manufacturing, who are considered as masters in their respective fields. With the use of modern machines and tools, we have been able to do leather manufacturing on complete bulk orders of the entire range of leather products as per international quality standards and deliver the consignment within the stipulated time period.

MISSION

To manufacture and export a variety of high-quality leather goods and jute handicrafts that our buyers can confidently offer to their customers while employing poor and powerless women in our business and empowering them to achieve economic independence.

VISION

To deliver the joy of creativity through our fine craftsmanship along with a positive impact to society.

Message from Executive Director

As the executive director of the company, I am delighted that Usha handicraft has successfully completed our 25th year in the business. Since our inception, we are committed to producing products with great quality, and employed hundreds of women workers in our factory and help them to gain economic independence and contribute to their family economy.

At our 25th birth anniversary, we are promising to work with more enthusiasm and produce leather and jute-made crafts with outstanding quality and design.

I thank you all for the support from both national and international clients and partners. Because of all your support we were able to export to countries like Austria, Denmark, Germany, Italy, Netherlands, and Switzerland, and hoping to expand our export market to a few more markets.

Samira Ahsan

Executive Director | Usha Handicraft
