

vda. de julián núñez, s.a.

Since 1957

Julian núñez Matías created the company as an auxiliary for the manufacture of wooden handles of knives and pocket knives.

When he prematurely died, the company was taken over by his sons Amós and Julián.

In 1969 the company was registered in the name of the founder's widow and the youngest of the brothers, Rafael, joined the business

Julian Núñez Matías (1913–1967) is the founder of Viuda de Julián Núñez S.A.

In 1974 the company moved their headquarters to his actual location in the Campollano business park.

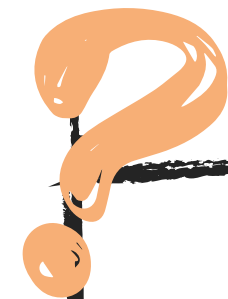

The company has established itself as a leading and reference in the handle manufacturing sector

Milled Handles

Our speciality is to manufacture our clients personalized designs.

Our clients designs are **original, and unique**

HOW CAN WE GET STARTED?

IF YOU ARE INTERESTED IN WORKING WITH US, THE FIRST STEP WOULD BE SENDING US YOUR DESIGN (POSSIBLE IN .DWG OR .DXF) SO WE CAN STUDY HOW CAN WE HELP YOU AND GIVE YOU A QUOTATION.

Materials

We offer a wide range of materials for the manufacture.

You can see all the range in our website www.nunezhandles.com

Mikartas, pakawoods and evergreen are manufacture by ourselves.

This materials are served in panels, except for Juma, stabilized woods and natural woods that are offer in blocks.

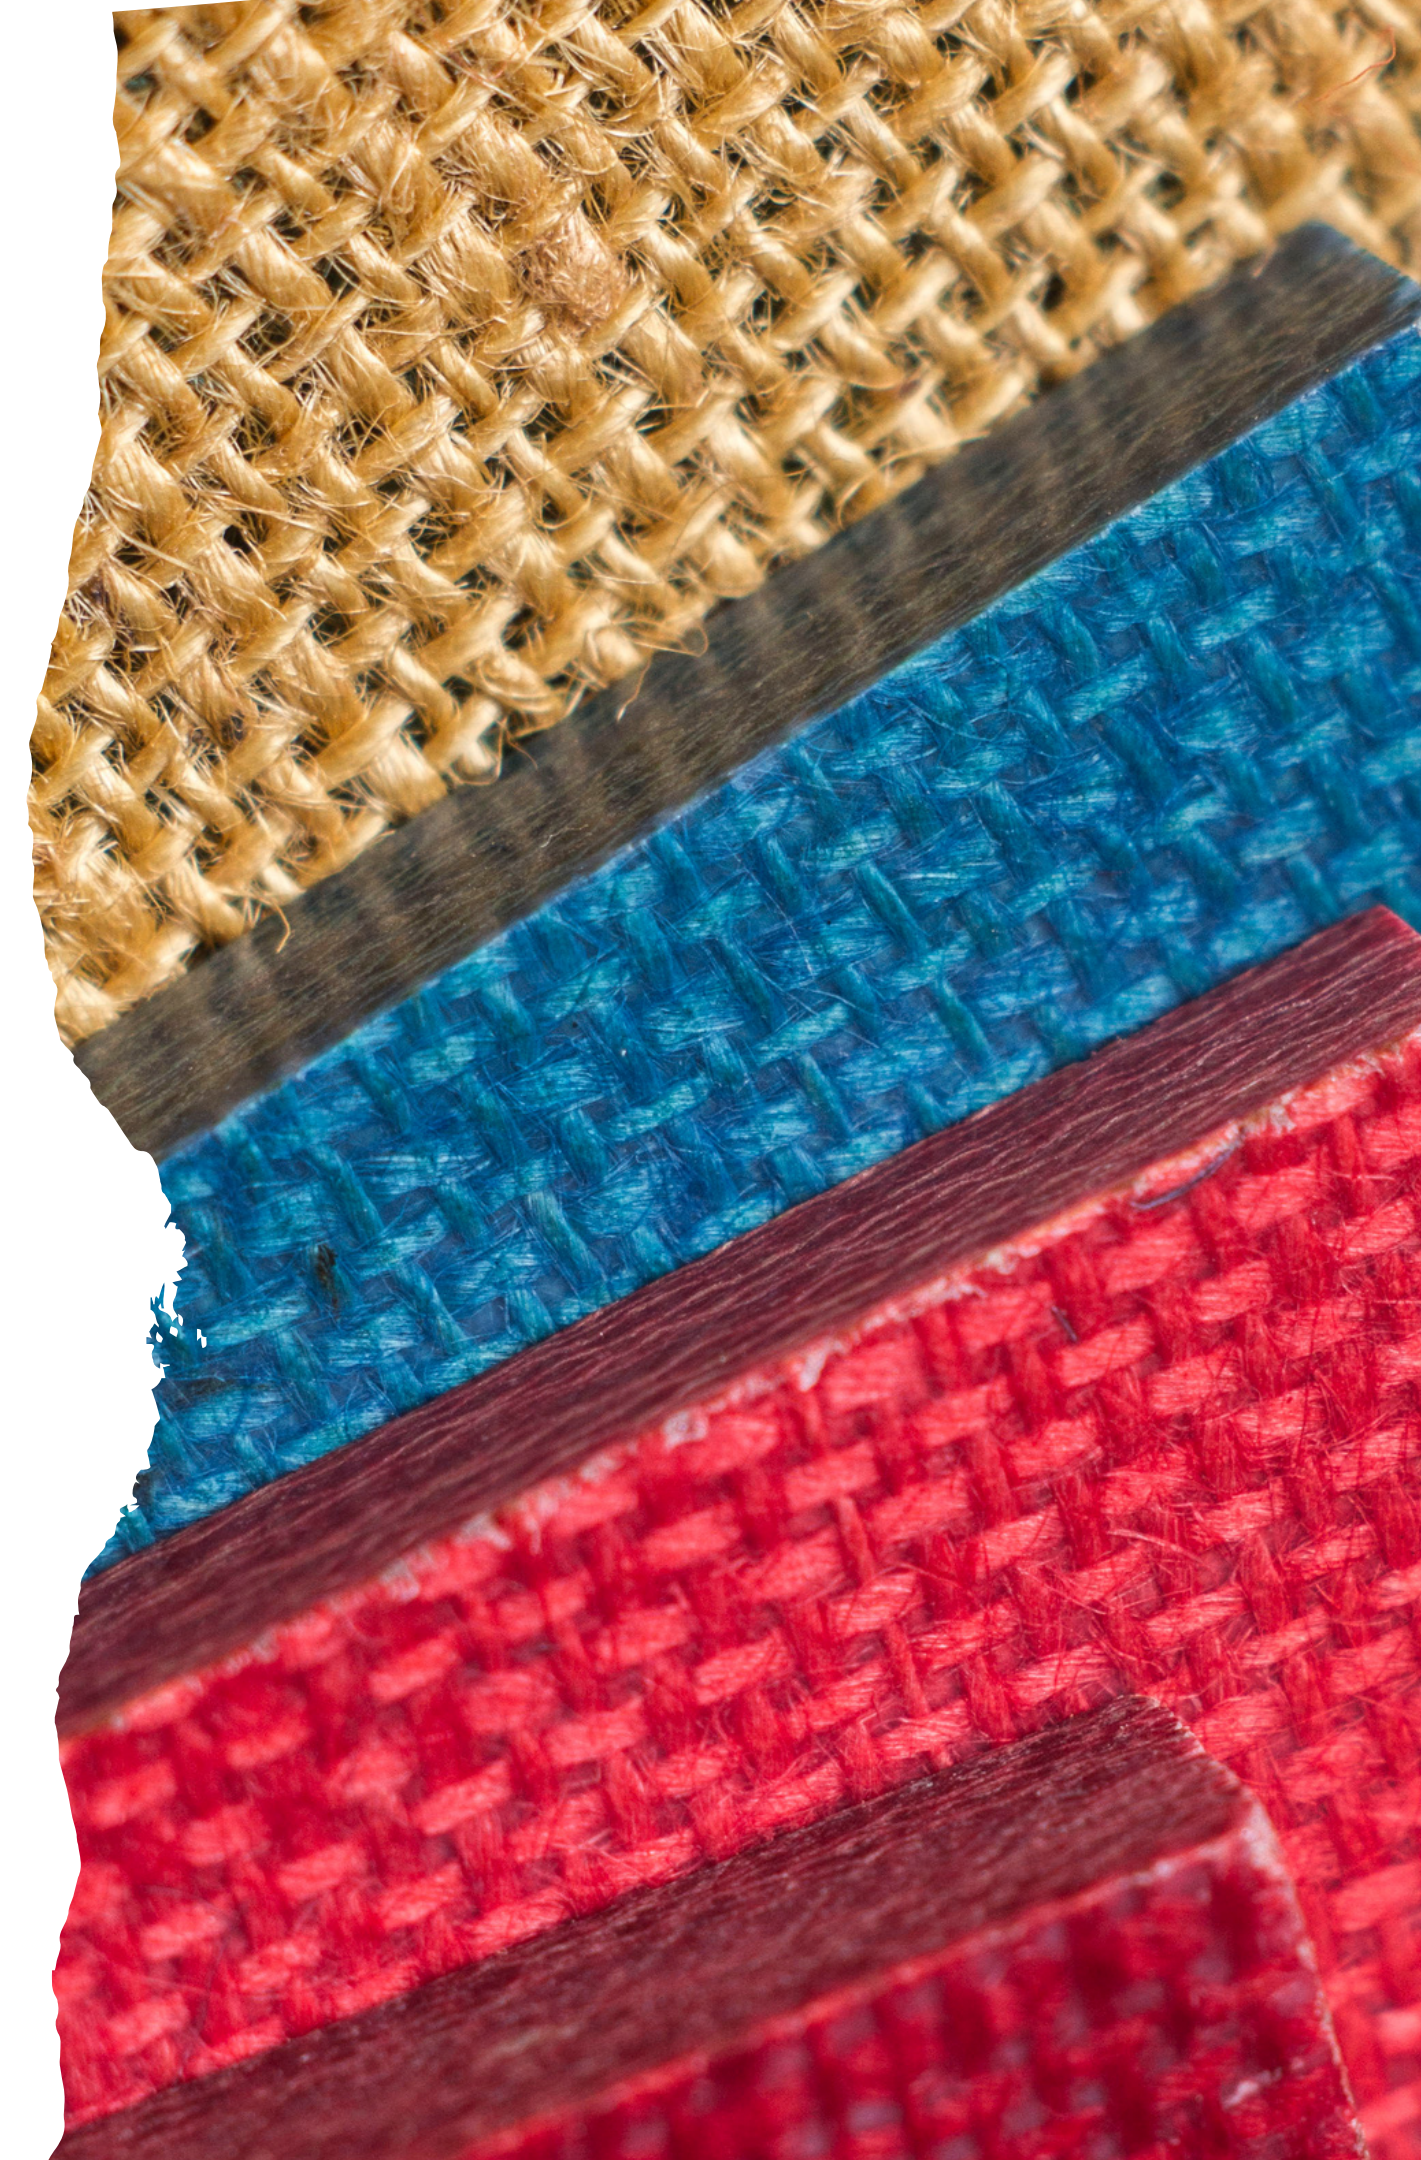

HOW CAN I GET A QUOTATION?

IF YOU WANT TO KNOW OUR PRICES, PLEASE TELL US WHICH REFERENCES ARE YOU INTERESTED, THE THICKNESS YOU WOULD LIKE AND QUANTITY, SO WE CAN MAKE YOU A PERSONALIZE QUOTATION.

IN CASE OF BLOCKS, PLEASE LET US KNOW DIMENSIONS AS WELL

Molded Handles

The molded handles are mass-produced pieces via the injection molding technique. To this end, hardwood veneers and thermosetting resins are used.

We present our two main brands for molded handles:

A close-up photograph of a DUROFOL® molded handle. The handle is made of a light-colored wood veneer with a dark, possibly black, thermosetting resin core. It has a smooth, rounded, and slightly curved shape. The background is white.

DUROFOL® molded handles are more dishwasher resistant and comply with the UNE-EN 10/2011 regulations and 2016/1416 and 2017/752 amendments, as suitable for food contact handles.

A close-up photograph of an EVERGREEN® molded handle. The handle is made of a dark reddish-brown wood veneer with a dark, possibly black, thermosetting resin core. It has a smooth, rounded, and slightly curved shape. The background is white.

The new technology applied to **EVERGREEN®** has resulted in exceptional handles with a performance as regards resistance and life cycles, 400 cycles in industrial dishwashers, much higher than other existing products on the market.

Please don't hesitate in contact us for
any kind of requirements
