

MAGUS is a Taiwanese company founded since 1980s, and has been specialized in the manufacturing of storage and closet organizers especially made of bamboo and fabric.

Our design value comes from the idea of a combination of bamboo and fabric.

Due to the awareness of environment, Bamboo has been chosen as the main material of MAGUS furniture collection for more than 20 years. After the bamboo furniture start to gain stable order, our designers want to provide new image of our product. They started to research different material and found a fabric that is remade from the plastic bottle, The founder of MAGUS thinks that since we are already using bamboo to create our product, how about adding eco fabric as another material to make it more interesting but still being good to the environment.

That is the time our design values start and the style become more clear. Many customers regard our style as modern-scandi or zen. However, we would not limit our design possibilities.
