Materials

PAPER

We use all kinds of paper: handmade, mill made, recycled cotton etc.

LEATHER

We use a traditional, organic tanning process for our leathers. Watch: <https://leather/hslH>

KATRAN

Katran is a biodegradable material made out of fabric waste. Watch: <https://katran/httpM>

Materials

MUSA

Musa is a bio leather developed from banana fibre and sheep wool. Watch: <https://musa/dGka>

CIRCULEATHER

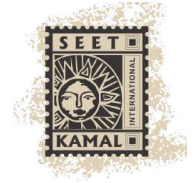

A recycled leather made using pre consumer tannery waste.

OTHERS

Our scope of work includes cork, bamboo, felt, textile, canvas etc.

ETP

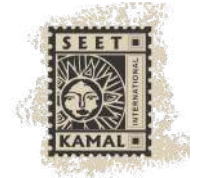

We are Zero Water Discharge Company, all the water we use in our production process is treated in our Water Treatment Plant and reused. We have also built an underground water storage facility of around 500,000 Its which collects all the rain water that falls on our factory sheds and roof in these tanks, later used in our manufacturing processes. All other excess rain water goes in our Water Harvesting facility.
