BIG in miniature

# DRIVEN BY 140 YEARS OF FAMILY TRADITION

The eye for detail and love for designing something unique is deeply rooted in our family DNA.

Founder Yves Wynant's grandfather's father started his own car company at the end of the 1890's, producing tailor-made trucks. In 1938, Emiel and Etienne Wynant designed and developed a miniature race car for their (grand)son, Noel.

Since then, the love for creating unique items and the passion for cars have remained within the family. Meta[l]morphose sprouted from there. It started as a hobby for Yves, who at the age of 16 started to iconify old-timers to their purest form.

This eventually led to self-designing miniature metal objects for Meta[l]morphose.

As a tribute to this piece of family history, Meta[l]morphose introduces a relaunched interpretation of the original 84 years old concept car made for Noel.

We welcome you to join our story!

**[l]** meta[l]morphose®  
BIG in miniature

A small statement with a big message:

Meta[l]morphose creates a mini world with the things you love from the big world.  
Ready to show your personality and take it everywhere with you?

## Meet the driving forces behind the meta[l]morphose® brand:

"The main goal and inspiration for our brand? Creating and designing happy objects that inspire you to dream. Even if it's just for a split second."

- Yves  
Concept Designer

"Improving and re-inventing our daily operation is my everyday challenge. What I love the most is to make sure that everybody in the team is aligned to create our lovely miniature collection."

- Tong  
Production & Operation Manager

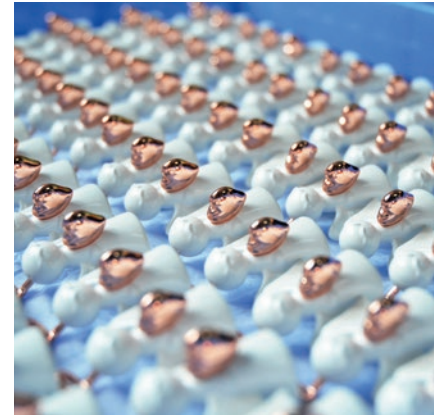

"Drawing astronauts and unicorns, who wouldn't love that? 3D design is both exciting and challenging because we don't make things 'flat'. The ideas need to be makeable in real life, which requires close cooperation with the manufacturing and assembly team."

- Jelle  
Product Designer

## Happily designed in Belgium Proudly created in China

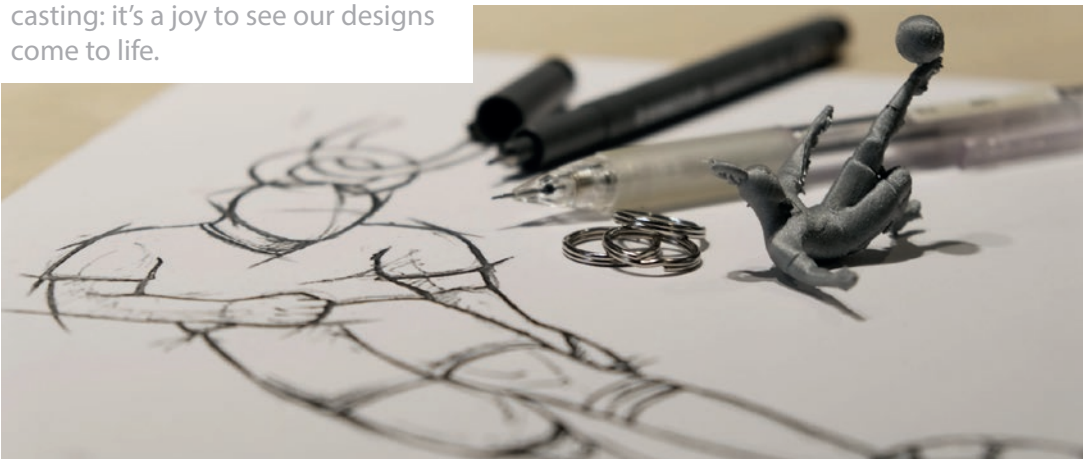

"Our in-house assembly line guarantees that every single product has its own quality control and is handled with the greatest care."

From sketches on paper, to 3D printing, molding and finally die casting: it's a joy to see our designs come to life.

## *What makes Meta[|]morphose products so unique?*

Aside from the outspoken designs and true-to-life miniatures, everything is carefully manufactured with durable high-quality materials. The 3D keychains, bag charms, bookmarks and pins are made from solid metal, assuring a perfectly balanced weight. From the first sketches and product designs to 3D printing: almost a hundred steps are taken before a product is born. The result is a unique collectable of unrivalled quality.

Why Don't Teach You at Harvard Business School

notes with your boss. What does he think you are doing? What do others think you are doing? The 'givens', you will be less shocked by.

Don't Go One-By-One With

If you win the battle you're probably going to lose the war. The more right you are, the more damage you'll do in the long run.

We had a situation several years ago when we got into a heated exchange with our boss. Our boss was a very unfortunate situation, and he was asked to resign.

This was a very unfortunate situation, and he was asked to resign. This was a very unfortunate situation, and he was asked to resign.

Getting Ahead

WE'VE JUST BOUGHT THIS COMPANY AND WE'D LIKE YOU TO RUN IT ...?

You can't stop your company from making stupid acquisitions or getting involved in businesses they shouldn't be in. But you can try to avoid becoming part of a team that's going to 'continue its success' or turn it around. For, more often than not, you will find yourself in a no-win situation.

A company is usually bought for one of two reasons: either because it is successful - which means the buyer feels it slightly better - or because it is unsuccessful and the buyer feels he can turn it around.

There are always hidden reasons to why a company is unsuccessful, problems and what can be done to fix them. Usually, knowledge is rare. Usually, management and what can be done to fix them. Usually, management and what can be done to fix them.

IT MAY SEEM LIKE A LATERAL MOVE BUT ...?

Various of this exist up and down the corporate structure. The lateral shift, particularly if you suspect the skills involved are not a business you know nothing about, you must know the business even if they aren't very good at it.

WE'VE READ THIS NEW POSITION ESPECIALLY FOR YOU ...?

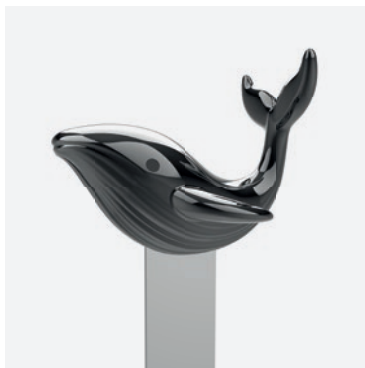

The job doesn't make much sense to you, and you aren't really sure you'll work in practice the way it sounds in theory, but the pay is good. Watch out.
