The warmth of hand made pottery's texture has been transferred to a glass tumbler.

The name of "Tebineri" came from a technique of pottery making, which means "making up the shape by hand and fingers without using potter's wheel. We transferred the shape made by "tebineri" technique done by craftman with passion to the glass. It became a tumbler with gentle appearance. These tumblers can match to traditional Japanese style pottery or earthenware. It's also good for casual usage because they are strong by the thick walls.

Depicted the texture like wave of water with a glass

We achieved to transfer the gentle shape like hand made blow glass by our original technology. It's assymetric and easy to hold with your hand because some parts are widely dented. As they can suit to various materials or styles, you can enjoy co-ordination.
