BEAUTIFUL AND PRACTICAL

Opal glass

Opal glass tableware has many practical advantages, especially for everyday use: It is easy to handle because it is relatively light and at the same time insensitive. Due to its extremely smooth surface, it is particularly hygienic, which is not only advantageous in private households, but also in institutions or the catering trade. Dinova-Saina's opal glass sets combine these practical advantages with attractive designs featuring beautiful basic shapes.

EXCLUSIVE AND HIGH-QUALITY

Bone China

The traditional bone china, also known as „bone porcelain“, is characterized by its particular impact resistance, a high degree of whiteness and the slightly transparent appearance. With their designs, our designers particularly emphasize these characteristic properties of the high-quality and fine material. The exclusive bone china sets are manufactured by our specialists in the highest quality and according to international standards.

TABLEWARE FOR EVERY STYLE

Porcelain

Porcelain has a permanent place in our living and dining culture. It is not uncommon to have different tableware for everyday use and especially for the beautifully decorated table on festive occasions. The variety of our porcelain does justice to the wide range of different living and furnishing styles. Classically elegant, puristic-modern or youthful-playful: Our tableware has a perfect look.
