

Tranquillo

We are sustainable.

Fascinated by colours & patterns, we create individual products for you & your home.

A person is seen from the back, wearing a dark blue t-shirt, a straw hat with a dark band, and a dark green canvas backpack with brown leather straps. They are standing in a vibrant, busy outdoor market with many colorful stalls and people in the background. The scene is brightly lit, suggesting a sunny day.

INSPIRED BY THE WORLD

Our interest in different cultures and longing to travel the whole world is shared by our employees and our customers alike. Inspired by the colours, patterns, impressions and rituals of other countries, our products bring the wide world home.

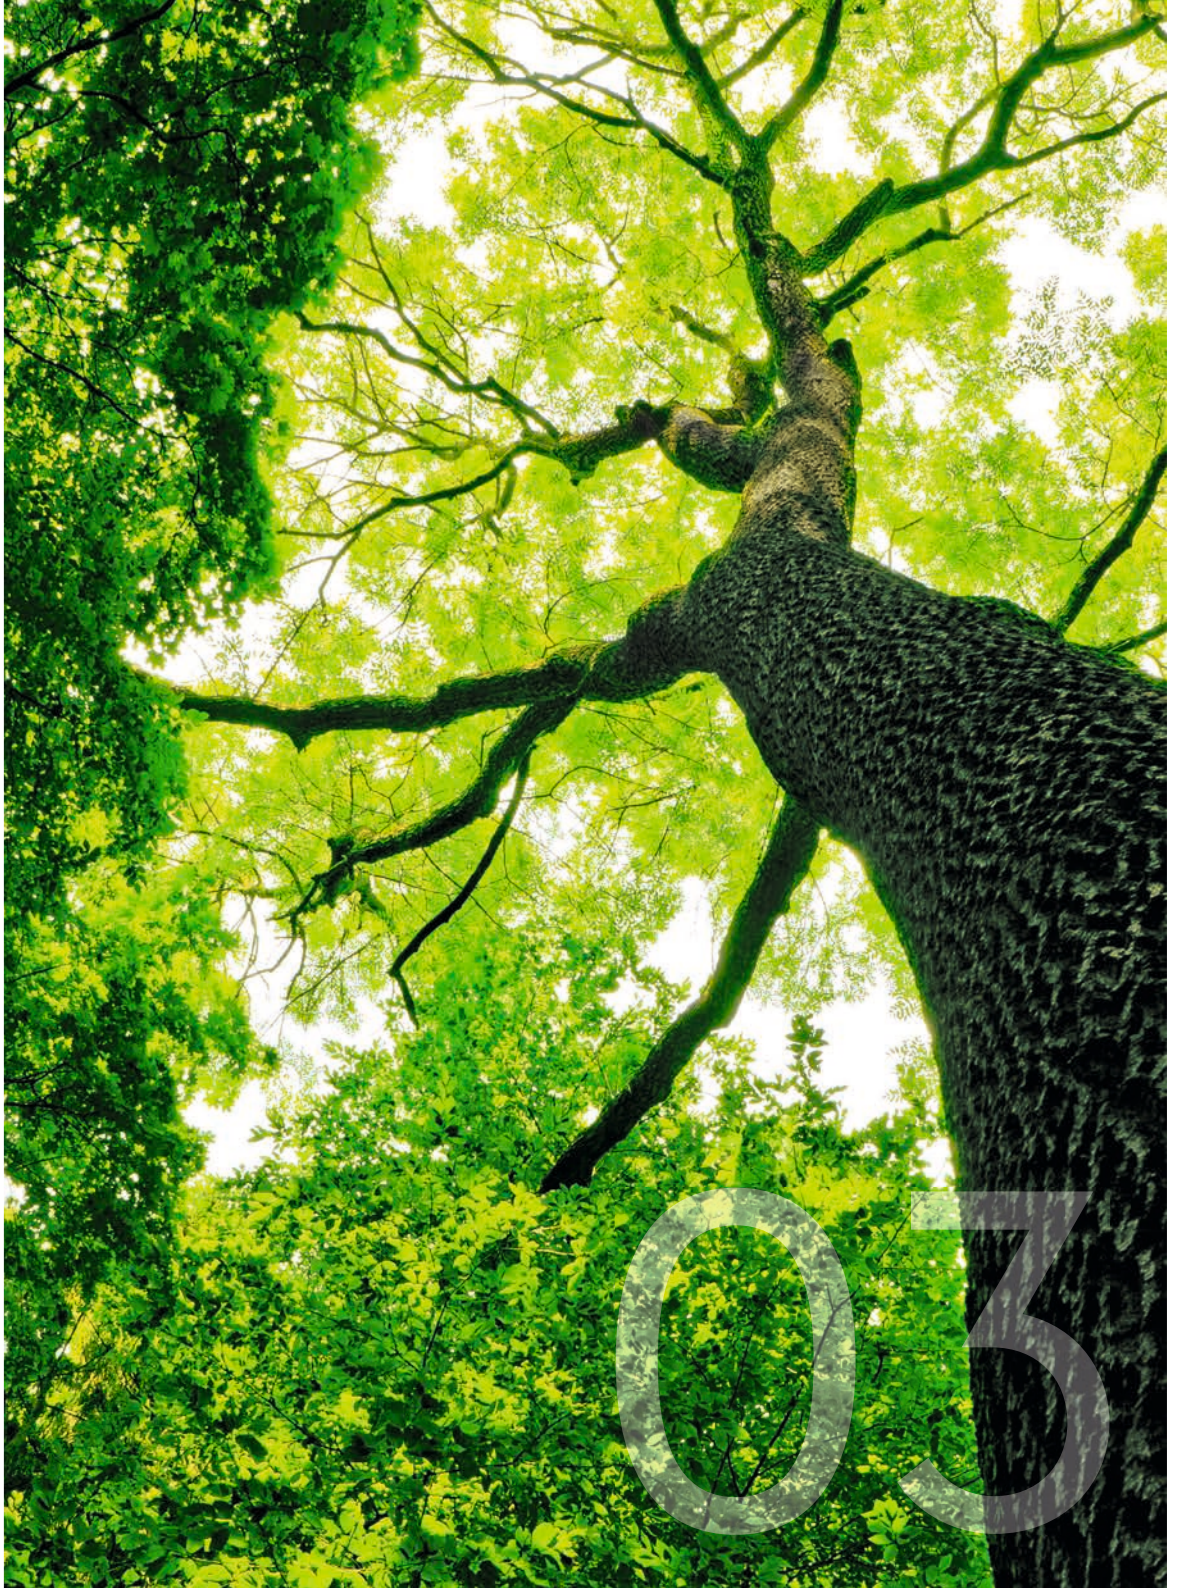

AUTHENTIC PRODUCTS & SUPPLY CHAIN

Behind every product is a unique story and in particular the people who have designed it with passion. We love what we do and communicate transparently.

RESPONSIBILITY FOR PEOPLE & NATURE

Thanks to the close exchange with our suppliers all over the world and the insights we get from our work far away from the tourist areas, we are very aware of our responsibility regarding our fellow human beings and our environment. We treat the resources of our planet as carefully as possible and ensure fair working conditions for all involved.

PERSONAL & WARM TOGETHERNESS

We are cheerful, open-minded and tolerant. Important to us are flat hierarchies and an uncomplicated work relationships, treating each other as equals on all levels.

TRANQUILLO IN THE WORLD

We have various stores in Germany and our own on-line store, where you can find almost exclusively our own fashion and home collections. We also supply other retailers in various countries with our products.

FROM SECONDHAND TO FAIR FASHION

In the past, Tranquillo was a small store in Dresden's Neustadt where you could find cheerful things from all over the world, colorful fleece jackets and long velvet dresses. In addition to special fashion, you could always find all kinds of little things in our assortment to give to your loved ones.

Christian Amthor and Michael Kremer have been running Tranquillo together since 2003.

If Christian and Micha have set their minds on something, the goal is fixed - the way, on the other hand, can be designed in a colorful style - just like Tranquillo.

COLOURFUL FASHION

It's a long way from fabric to an outfit. We are involved from the very beginning and develop our fashion according to high quality standards. The focus is on sustainability and fair production standards. We use organic quality fabrics. Our many years of experience in the fair fashion industry have shown that garments produced in a resource-friendly way can make positive change.

„Our vision is to help shape a sustainably growing fashion industry and create long-lasting products that are not only good for you, but also for the environment.“

THE FAIR SHOP

INDIVIDUAL FEEL-GOOD OASES

The diverse home range includes everything to create an oasis of well-being in your home. Our product designers select the highlights with a careful eye and surprise you with great accessories for all areas of life.

THE FUTURE IS SUSTAINABLE

We have been part of a sustainable production since 2002. This includes not only the materials, but also the conscious use of resources in the logistical area. We place value on sustainable consumption and avoid overproduction. In the area of packaging and shipping, we do not use plastic and have optimised our warehouse processes so that we can recycle our own packaging using modern machines.

09

OUR MANU- FACTURERS

Together, we follow our goals in the direction of sustainability. We initiate concrete improvements in working conditions on site, which have an impact on the quality of our products. In the material composition of our products, we pay attention to the best mix of sustainable production and a long durability of the garments.

NATURAL

For our fashion we use natural materials like organic cotton, EcoVero viscose & Tencel. Organic cotton is a renewable resource whose use has many advantages. Growing organic cotton uses less water. There is no use of chemical fertilisers or pesticides. The natural material is durable, breathable and long-lasting.

OUR CERTIFICATIONS

This enables us to show you that our certified production begins with the manufacturers throughout our chain, ending with us in Germany.
