Ferro-Carbon Group

FERRO-CARBON ENT. CO., LTD., established in 1989 and certified by ISO 9001, ISO 14000 & ISO 45001, is a professional manufacturer of tiling tools and suction cup products in Taiwan. With more than 30-year producing experiences, we devote ourselves to R&D, creativity and innovation to provide our customers the best service including safer and competitive products. We not only make tools, but also a support to house building workers.

With the unique core technology of suction cups, we have established brand FECA in 2009 for homeware and provide the storage convenience of tool-free hooks and home accessories with strong suction power. There is no damage to walls and its reusable feature is environment-friendly. We have provided the quality service globally to over 40 countries.

With the unique core technology of suction cups, FERRO-CARBON ENT. CO., LTD., established brand FECA in 2009 for homeware and provide internationally the storage convenience of tool-free hooks and home accessories with strong suction power.

FECA stylish suction hooks/ storage holders are tool-free, durable and reusable that assist your daily organization to become easy and convenient everywhere. There is no damage to the wall and its reusable feature is environment-friendly.

FECA is not just the great houseware, but also the way to show your smart taste. FECA creates the new lifestyle with the combination of functions and elegance. It is simple but beautiful design also become an essential fashion trend in the world.

FECA products

FEATURE

MATERIAL

ABS

ABS are all based around the versatility that the thermoplastic can offer its user. ABS main advantage is its recyclability and it can withstand changing temperatures from cold to hot or vice versa multiple times. When using ABS, we can have a wide range of colors and surface texture options to achieve pleasing structures and high-quality surface finish. This is excellent impact for chemical and abrasion resistance. Good corrosion resistance are suitable to be used in daily life.

GO GREEN

To save the earth is everyone's responsibility. FECA focus on following "3R" to do our best.

- Recycle:FECA select ABS and design pretty paper boxes to pack each item. They are easy to recycle.
- Reduce:FECA reduce packing materials to take the responsibility of environmental protection.
- Reuse:FECA products are all reusable and can be attached in various places for multiple functions.

STAINLESS STEEL

The metal must contain at least 11% Chrome to be called "Stainless steel". The product outlook of chrome plated and 200 stainless steel look similar but cheap and easy to get rusty because it oxidizes and contains less Chrome. However, FECA selects 304 stainless steel on products due to excellent corrosion resistance and value. 304 stainless steel can withstand corrosion from most oxidizing acids. That durability makes 304 easy to sanitize and therefore ideal for daily life applications.

RUBBER

FECA select the high quality of synthetic rubber with the core patterned technology to make the unique suction cup strong and durable. It is important to press the suction cup firmly and remove the air underneath completely when using. FECA suction power will not reduce after reusing due to this special rubber pad. It also stands the temperature resistance from 70 C to -10 C .

INSTALLATION

• **APPLICABLE:**

Rough (under 0.4mm) and non-breathable surface

Acrylic / Plastic panel

Laminate

Metal board

Glass

Glazed tiles

Glossy panel

• **NON-APPLICABLE:**
Porous surface

Cement wall

Natural wood

Cracked tiles

Marble

Painted wall

Wallpaper

WARNING

- Do not overload.
- Clean and dry the contact surface to avoid any negative effects of suction function.
- Not suitable for cement wall, marble, granite, wood board, wallpaper, tiles without glazed process, cracked tiles or any porous surface.
- Not suitable for surface which is smaller than the rubber pad, or surface with a roughness over 0.4mm.
- Due to strong suction, it may lead to damage if the product is attached on thin surface for a long period.
- To keep the suction cup in good condition, please release the lock when it is not in use or attached to the contact surface.
- Kindly note that we are unable to exchange or refund if your merchandise is found to be damaged after use.

USER INSTRUCTIONS

1.Clean

Please use the tape to stick out dust and avoid any damage to the appearance of rubber pad before use. Make sure the rubber pad is dust free and clean the surface before attaching the suction cup.

2.Press

Firmly press the suction cup to the contact surface for 2-3 seconds to remove the air underneath.

3.Lock

Push down the lock while pressing on the suction cup.

4.Check

Make sure it is firmly attached to the contact surface before use.

STEPS FOR RELEASE

1. Please release the lock of suction cup first.
2. Please use the finger to peel off the rubber pad slightly and slowly.
3. You can use a plastic card to assist the release if need.
4. Since the suction cup is designed according to the vacuum concept, please release the lock and let the rubber pad form back to normal if not using.
