GABRIELA SERES

About Gabriela Seres

Gabriela Seres designs are a unique blend of fire, light, sand and color. Each piece is meticulously handmade by master glassblowers in the brand's workshop based in Bucharest, Romania. Ranging from glass cups, tea sets, bowls, fruit plates, cake plates - to chandeliers, table lamps and ceiling lamps, the Gabriela Seres glassware develops into a great variety of pieces. Made from a special blend of borosilicate glass, they're handcrafted with passion, talent, dedication and technical perfection.

Nature and music offer the inspiration behind the Gabriela Seres glass objects. Luxe and contemporary, the handcrafted glassware made in the Gabriela Seres workshop shows how delicate and smooth her creation process is. Combining the mastery of the craftsmen with the elegant designs of Gabriela Seres, it almost feels like a harmonious waltz between the passion for glass and the prowess of the artisan.

The story goes back to 1976, when young college graduate Gabriela Seres whimsically met Peter Stefanescu in a glass factory. Peter was a master glassblower trained in classical European hand glass blowing techniques. The equilibrium created by the experienced craftsman and the glass-passionate young woman set the foundation for their very own independent art glass enterprise in 1992.

With help from family members and joint savings, they rented an old house in Bucharest that became their magical glass working studio. Having only three craftsmen working along them, the process was not without struggle. Even so, the years passed and they kept working towards their dream. Delighted customers recommended them by word-of-mouth. In a short time, the old rented house in Bucharest became a great and important busy factory. It didn't take long until they gained European recognition.

Meanwhile, as the glass studio took shape and then transformed into the prestigious factory that it is today, Gabriela Seres, the glass technocrat, worked closely with Italian and French designers. She then discovered her natural flair for designing glass objects d'art. The symphonic process continued her father's passion for design and it inspired her to create the brand that is Gabriela Seres designs.

Each and every one of the Gabriela Seres pieces are meticulously created by master craftsmen in clear and noble glass, in the brand's top-notch workshop in Romania. In the present day, the glassware made by Gabriela Seres is retailed at premium international designer stores, such as Lane Crawford (Hong Kong), William Ashley (Canada), T2 Tea (Australia & UK), Roche Bobois (UK), OMA and INV Home (India). The ethereal designs and patterns that inspired many artists worldwide have also received great global recognition from connoisseurs, as well as art and art deco enthusiasts.

The waltz of fire and light

All Gabriela Seres products are handmade by master craftsmen in our workshop in Bucharest, Romania. Hundreds of thousands of hours of practice and work make possible forming our glass pieces into objects of art.

Unique techniques are used to shape our precious glass into clean elegant designs.

However intricate or elaborate the design, our workshop can always find a way to reach Gabriela's requirements of quality and purity of shapes.

Ø 600 mm

In the “Event Candelabra and Candleholders” section you will find Gabriela’s signature Event Designs that are present in numerous distinguished venues across the globe.

All products with arms come packed with special fitting foam which carefully hugs the glass arms to shield it from unwanted shocks.

Candelabra can be fitted also with different hurricane candle holders that can cover the candles in order to correspond to stricter fire safety regulations.

Every product manufactured in our workshop is made from the highest quality heat resistant glass in the world and can be used safely with any type of candle.

Each product comes packed in 5-ply carton box and special foam.
