A New Brand of Plastic Forte

# areca

*Green living*

At Areca, we seek a balance between design, functionality and sustainability. For this reason, our products are manufactured with 100% recycled and recyclable raw materials, which also give the product a long shelf life. Both the colour palette and the designs and finishes of our collections are inspired by elements of nature. Our goal is to create long-lasting, sustainable products adapted to the latest trends.
