

A Life surrounded by Bronze

NATURAL BRONZE DÉCOR CREATIONS
HAND MADE IN SPAIN

Mrs. Blanca Villuendas Virtus, Paco and David Rivero

The Company was created by **Virtus** Family in 1945. Later **Mrs. Blanca Villuendas Virtus** launched the Bronze Designs Worldwide. She had the vision to produce the Bronze Products under a more commercial way and reached all the possible fields of the market. At this stage, she decided to develop the production with more artisans, and enlarge the manufacturing capacity.

In the beginning **Mrs. Virtus** developed the Domestic market in Spain, and later with the New Generations of the Family, the Company started developing the International markets, and now the Third Generation is creating the **BRAND VIRTUS** Worldwide.

Now the Bronze of **VIRTUS** is sold in more that 50 countries, and appreciated by many different customers worldwide, valuating our pieces as a delicate creation to complete their homes.

The Image of our Company: "LOUIS XV" Model a Fantastic Table Clock with Pendulum movement

From our "ATMOSPHERES" Catalogue, Madrid's Royal Palace Decoration

At the beginning she based the models on her own artistic taste, being the main "Muse" for **Mrs. Virtus**, the **Louis XV and XVI Styles**. As you will see, most of our models follow the main "key" characteristics of these époques.

If the Louis XIV Style was designed with the glorification of the Sun King in mind, and all made in massive, masculine, square forms, the **Louis XV Style** is completely the opposite. Designed for the comfort and glorification of beautiful women, it has a romantic, sensuous and feminine look: a flowing abstraction of unbroken curves, combined with extensive rococo decoration.

This Style is one of the favourites among designers and homeowners alike when decorating traditional homes, due to its delicate shapes and practical sizes, showing a natural elegance and grace.

With a large influence of the new discoveries of the City of Pompey, the new Style (**Louis XVI**) was less ornate: straight lines and simplicity were the guiding principles of this period, being typical motifs: lyres (as a classic Roman music instrument), columns, urns.

Nice Composition of "MINERVA" She was considered to be Virgin Goddess of Warriors, Poetry, Medicine, Wisdom, Commerce, Crafts, and the Inventor of MUSIC

Based in our long-term experience in the production of High-Quality Bronze Pieces, combined with new manufacturing techniques, and the “invaluable” touch of our Artist: **Blanca Villuendas Virtus**, we are proud to offer you a selection of unique creations, which will be top-sellers at your establishments.

VIRTUS has moved these models from hundred of years ago, to be present now in our lives, at a preferential place in the Decoration of Distinguished Homes.

Lets bring together the **AGE of BRONZE** to the modern times. **VIRTUS** as an expert of the manufacturing of this metal, will give you all necessary tools to success: Refined Selection of Designs, Careful Manufacturing, Elegant Presentation of the Products, and continuous promotion of the Collection and Brand.

Some countries in the Mediterranean area took the Bronze as part of their cultures. A good example is Spain, even using this new metal for many of its coins.

With the time, Spanish Artisans became expert on the manipulation and production of Bronze.

Nowadays there is one factory that still works with this heritage:
