Colours:

Quality of products have same importance as it's design.

High standards during production in our company dictate the using of most quality original materials that is available on the market. We have all the certificates from health testing and also from Governments office of control about high quality of our products. With correct using of our products we have many guarantees that our products will be more durable and have a long-term use.

Colors that we use during our production, in addition to excellent visually-attractive look, also has technologically perfect characteristics which enables them great resistance to UV sun radiation, and with that in mind, the products will not fade out if they are exposed to direct sun light, and also they are more resistant to low temperatures and moisture.

As with every product, avoid use of sharp objects so the surface could remain clean and nice.

Picture of products does not represent real measure between products.

All dimensions are in cm.
