Vision

To become the preferred choice globally in home goods while also fulfilling our social and environmental responsibilities for a better future.

Mission

To exceed our customers' expectations by offering high-quality, top-notch value-added products, with clear focus on our core values.

Our Purpose

**TO RADICALLY ALTER THE WAY THE WORLD LOOKS AT,
EVALUATES AND EXPERIENCES PLASTICS.**

It is this purpose that drives our constant focus on value optimization, obsession with quality and inspires us to push the limits of spatial, functional and aesthetic design. As a company, we practice our values of innovation, ethics and careful decision-making. You will experience them across all our processes.

Above all, we strive for excellence in all we do and are open to new ideas and a continuous learning curve. These values have made us what we are today and will continue to guide us tomorrow.

About Us

All Time Plastics sits delicately poised between the passion and vision of a family-owned business and the professionalism to deal with billion dollar organizations. Over the years, our global export operations have allowed us to strike a fine balance amongst technology, scale, processes, and controlled protocols. Today, products with the brand All Time are widely available in India. In addition, we offer a holistic spectrum of solutions ranging from product design to manufacturing and packaging innovations to our customers globally. We manufacture around 280 million plastic based space solutions annually, including homeware, kitchenware, bathware, tableware and children's products.

Daman Plant

Silvassa Plant

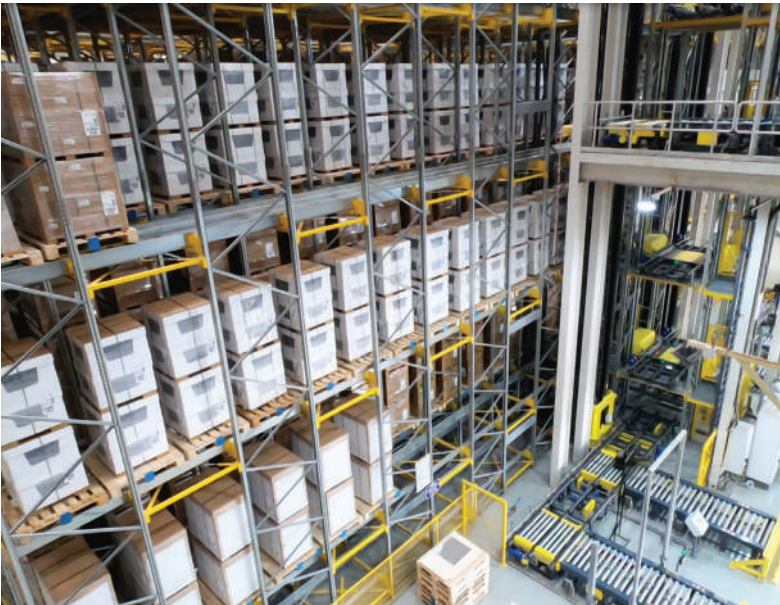

Our Infrastructure

Two world-class manufacturing plants in Daman and Silvassa with over 110 injection moulding machines have a total installed capacity of 25,000 metric tons annually.

State-of-the-art technology in latest manufacturing, analytical and quality control facilities combined with best practices in manufacturing, health, safety and conservation of natural resources.

90 % of machines are All- Electric injection moulding machines

Real-time production monitoring systems

Automated storage and retrieval system

Handling of components is 100% palletized

Automation

Raw material conveyed through silo system

Part removal by 6-axis robot

Our Strengths and Capabilities

Full-fledged product design team with an in-house tool design setup

Test laboratories for raw material and product testing equipment to ensure product safety

Our People

We believe that people are the backbone of any organization. Every individual contributes towards building a unique organizational culture and character. At All Time Plastics, employees are our extended family. We follow extensive monthly, quarterly, half-yearly and yearly training modules to ensure that they grow with us. In addition to rigorous training and a number of employee-welfare initiatives, we ensure equal opportunities for all. We also make special efforts to ensure women employees have every opportunity to grow and prosper. However, child labour is strictly prohibited.

Optimized layout of Packaging lines

- IKEA IWAY

Certifications

- ISO 9001 : 2015
- ISO 14001 : 2015
- ISO 45001 : 2018

Company History and Core Management

Our Founder, Late Shri. Punamchand Shah, started a trading company called Bombay Traders in 1944 with two employees. Over four decades later, his three sons, Kailesh, Bhupesh and Nilesh along with their team of motivated professionals kept his legacy going with All Time Plastics. We pride ourselves on having built a structured ecosystem where every employee in every department is handpicked and mentored by experienced heads.

Our Responsibility to the World at large

As responsible corporate citizens, we follow ethical practices and respect natural resources. We strive to manufacture products that are safe, functional and impact the environment minimally.

Keeping in mind our increasing energy consumption, some initiatives to reduce our carbon footprint include installation of

solar panels, selection of energy efficient capital equipment and use of FSC paper for packaging.
By the end of 2022, 100% of our energy requirement will be from renewable sources.
