Tendedero inventado y patentado por cuncial **Dryer invented and patented by Cuncial** **1960**

Durante estos más de 60 años de andadura hemos conseguido numerosos éxitos. Uno de ellos, quizás el más reseñable, es la invención del TZ.

La creación de este tendedero supuso una revolución tanto dentro como fuera de Cuncial, un hecho que nos enorgullece y que nos permitió seguir creyendo en que la innovación era y es el camino.

Fue el primer tendedero fabricado en serie en España, cuya patente fue declarada, por oficio nº 7967, de utilidad en la edificación por la Dirección General de Arquitectura. De esto hace ya algunos años, pero el TZ sigue siendo el original, único e inimitable.

During these 60 years of existence we have achieved many successes. One of them, perhaps most notable, is the TZ invention.

The creation of this dryer was a revolution both within like outside Cuncial, a fact that makes us proud and allowed us to continue believing that innovation was and is the way.

It was one of the first mass-produced dryer in Spain, whose patent was declared useful in construction by the General Directorate of Architecture through official communication nº 7967. Some years have passed, but the TZ is still the original, unique and inimitable.
