Harford Manufacturing
— leads in a new era of life

Professional Kitchenware

Intelligent cookware manufacturer

About Us

Company Introduction

Harford Metalware Ltd is one of the leading manufacturers of high quality impact bonded stainless steel and multi-ply cookware in South China.

The Company, built on a tradition of performance, quality and style, is located in Xinhui Guangdong, conveniently located less than one hour south west of Guangzhou. Harford Metalware operates from a fully integrated a 30,000 square meters site, employs more than 450 employees and produces more than five million pieces of cookware each year. Our international designers and experienced engineers continually develop new products, allowing us to offer a diverse collection of excellent quality cookware. We have a wide client base in the USA, Canada and Europe. If you would like to find out more about the range of products and services we provide, please contact us.

Professional

STAINLESS STEEL COOKWARE MANUFACTURER

01

Quality Mission

"Service to customers and trust from customers" is our tenet of service. "Rooted in honesty and oriented by people, we are serving the society."

Quality Principle

carries out customer-centered service. We take quality, service and credibility as no. 1 regards and serve the society.

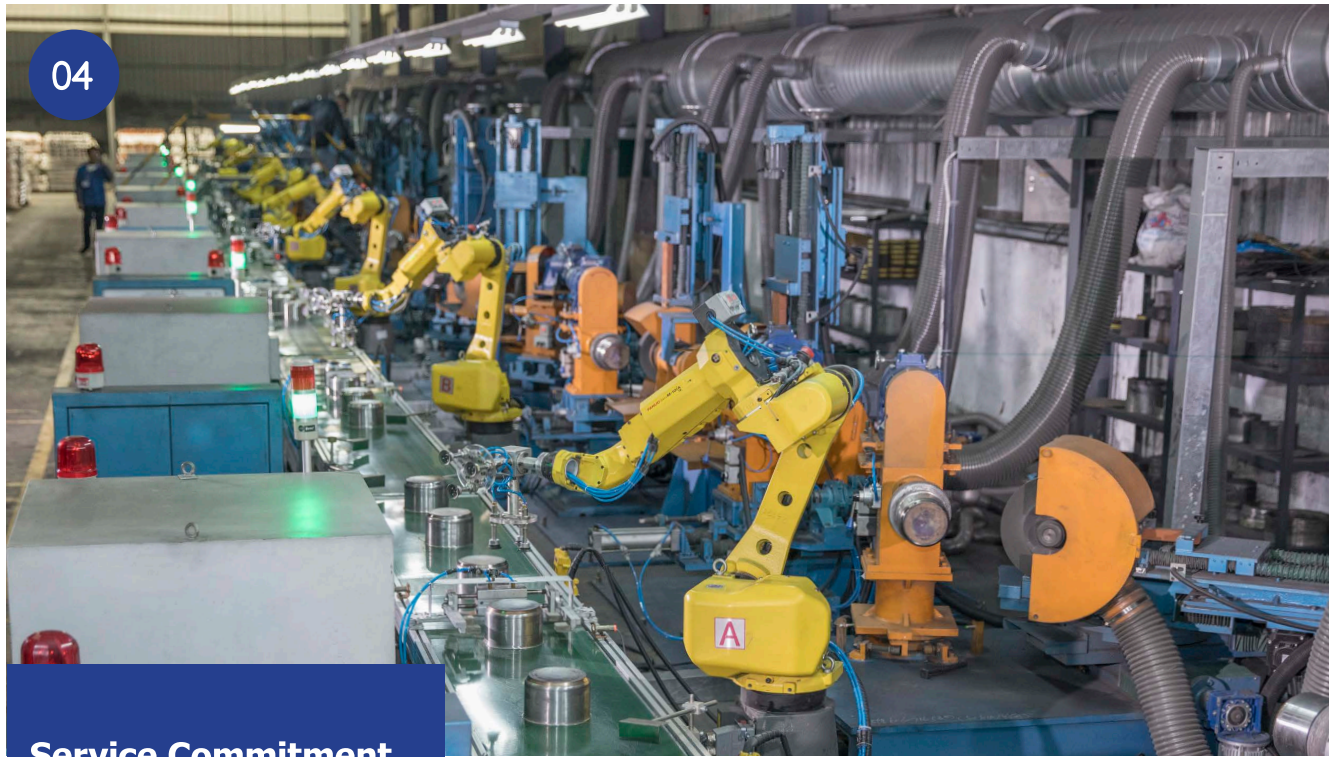

02

03

05

04

Service Commitment

considers quality first, service first and credibility first as its tenet and is eager to cooperate and build strategic partnership with customers to keep pace with times together. we always offer you the best products and service wholeheartedly.

01

LASER CUTTING LINE

Laser cutting can cut different disc diameters at the same time, improving utilization rate of material.

02

AUTOMATIC DEEP DRAWING LINE

Multi-station automatic operations can save manpower and reduce production cost.

03

IMPACT BONDING LINE

Using high temperature and high pressure to make impact bonding bottom of the vessel, allowing aluminium-protector to integrate closely and durably.

04

AUTO POLISHING LINE

Fully automatic polishing robots perform polishing from outside to inside. Polishing quality is consistent, manpower is reduced and so is cost of products.

05

PACKING LINE

Packing operation has installed automatic box sealing equipment and automatic box weighting scale. These reduce work load on workers and improve production efficiency.
