AURA collection

Modern cuisine has changed our way of using & handling tableware, our travels & visual references have introduced us to new ways of dining. From the traditional Western dining, where vessels are placed on the table; to the East, where vessels are held in the hand while eating, we have adapted a more “tactile” & “visual” approach to the way we dine. Aura for “Chefs”

AURA a quality dining with modern curves design.

The concept is based on vessels which are related in "feel" but do not comply with the traditional "dining set". The pieces should be used to create a sense of progression in the dining, from course to course. They are the background & reference points of what we are eating. The idea is to create a changing "tablescape" consisting of heights & volumes, inspired by cross culture of shapes & vessels, both historic & modern.

The Aura shapes are created for the presentation of food, the vessels are combined to enhance & encourage our dining experience. The shapes were created to eliminate the superfluous decoration of food and to allow chefs to use the pieces as frames for their presentation. The design details, size of the wings, sizes, heights & depths of each piece are purposely made to focus the eye on the food.
