MPDrink® owns a wide range of glass and utensils of materials that stands out for their durability and resistance. They are completely adjusted to a positive environmental policy, where the concepts Sterilizable, Reusable and Recyclable have become the dominant link for creating products.

We invest in models with ergonomic design and in current coloring, which will enhance each product, adapting it according to the markets and “flavors”.

Since 2007, our product range has continued to grow and with the aim of consolidating the trust of our customers, MPDrink® became a registered trademark in 2009.

Looking to the future, and at the forefront of ecological and resistant raw materials, the range MPDrink® is considered one of the largest in the world with more than 900 articles.

MPDrink® products are sold to more than 40 countries, our determination is to reach new markets, making it possible the dream of selling our products, all over the planet.

Welcome to the MPDrink® World.

Challenges to face

The ban on sales of beverages in glass and glass bottles, on terraces and pools, created a void in several businesses. It is estimated that, more than 45% of loss in revenue is associated with this prohibition.

The businesses that, until then, had commercialized beverages at their outdoor leisure spaces, were inhibited from doing so, in the same terms. Using glass became impossible and the "solution" of disposable plastic proved to be expensive, less elegant and less environmental friendly.

HOW DO YOU
GAIN
WITH US??

Sustainability

BECAUSE WE'RE DIFFERENT

With a work policy focused on protecting the environment and sustainability, we seek to have a least possible impact on nature.

The MPDrink® philosophy has in its genesis, the preservation of nature and the environment. In this way, all the materials are free of substances harmful to the health, and for their production, we spend less than half of the energy used in production of ceramics and glass.

Our bet is in the reuse of products, since they are resistant and durable and can be sterilized and used through out the years.

Our products will add value to your business.

Our proposal

LIVING IN THE DIGITAL ERA

Social networks have become one of the main showcases and information can be spread across the planet by a simple "click". The greatest guide to recommendations, are the experiences of people who photograph for free, publish, spread, comment and share their lives, publicizing experiences, places, flavors, pleasures, moments.

*"Who doesn't want to take a picture like the one we just liked?
Who doesn't want to visit that beautiful place or live that experience too?"*

Returning to provide your customers with an experience of elegance and glamor, combined with safety and comfort, may promote your business, enabling a considerable financial return.

CREATE VALUE FOR YOUR BUSINESS

Today, all social networks allows us to do a complete management, with booking channels, sharing photos, reviews, comments and classifications.
The social network of your hotel, is fully utilized?
