INDUSTRIAS

Industrias Betik S.A. dates back to the year 1940, and its main activity is sawing, processing and manipulation of wood. In 1957 began the manufacture and distribution of a product line; the toothpicks, depressors and ice-cream stick.

Since its foundation, it has maintained a series of unaltered values:

- **Quality policy:** continuous improvement-oriented and to the pursuit of excellence in every action undertaken, BETIK has been certified by the ISO 9001/2002.
- **The respect for the environment** and for a sus-

tainable and efficient production, commits us to have our products certified FSC (forest stewards-hip council).

- **Ongoing training,** experience and integration of our staff in the improvement of our processes, accredits us as a company with a high degree of professionalism, resulting in the improvement and efficiency of our processes.
- **Diversity of materials:** adapting our range to the market requirements, bearing always in mind our quality and environmental policies, we find sustainable solutions that fit the needs of our customers.

BIODEGRADABILITY

Biodegradability is the ability of organic substances and materials to decompose into simpler substances by (enzymatic) activity of micro-organisms.

A total transformation is obtained after completion of the biological process, where initial organic substances become simple inorganic molecules: water, carbon dioxide and methane.

By mimicking these natural processes, the organic wastes from human activities can also be eliminated by biodegradation.

COMPOSTABILITY

Compostability is the ability of an organic material to become compost throughout the composting process.

Composting is an aerobic biological process (which takes place in the presence of oxygen) under human control. It leads to the production of a mixture of organic matter.

Compost is an excellent fertiliser, as it contains many organic substances and microorganisms useful for the soil. The contribution of organic substance improves the structure and the bioavailability of nutrients.

Compostable packaging must comply with the EN 13432 standard, as do all compostable articles of Betik.

RECYCLING

Recycling is a process aiming conversion of waste into new products or raw materials for further use.

Recycling makes a successful contribution to environmental sustainability. It reduces consumption of new raw materials, energy, water (through landfill sites); air pollution (through incineration); plus greenhouse gas emissions.

Recycling is a key component in the reduction of modern waste and it is the third component of the 3Rs (**"Reduce, Reuse and Recycle"**).

SUGAR

cane

Sugar cane, harvested directly from the plant, makes possible the creation of ecological and practical packaging which withstand high temperatures and are oven and microwave safe. They are a recurring product both for everyday use, as well as for the transport of foodstuffs.

Their design and aesthetics are characterised by being elegant and neutral, always considering the environmental responsibility, as they are both compostable as well as biodegradable.

COOKPLAY

Cookplay is a Basque Country based brand that is working for an honourable idea; to create the new generation of tableware, designing new forms with sustainable materials.

Their aim as designers is to look to our users with the intention to generate an emotional connection around the table through their organic and sensual designs, influenced by the most essential forms of nature.

Cookplay presents a range of dishes, cups, bowls with lid and cutlery, with a new and creative design aware of the sustainable use of biodegradable materials with a genuine willingness to contribute in lessening the use of plastic and helping our planet heal with 100% ecological products designed to answer the current needs of tableware for events, meetings, picnics, celebrations and takeaway.

PLA

PLA, also known as polylactic acid, comes from natural and renewable raw materials, such as maize, and belongs to the polyesters as a synthetic polymer. The starch (glucose) is extracted from plants and is converted to dextrose through the addition of enzymes.

It is a sustainable solution, compostable at industrial level, only suitable for cold drinks.

STRAWS

In the quest for environmentally friendly solutions and alternatives to plastic, Betik is committed to paper straws (single-use) and bamboo straws, which, in addition, are reusable, thus collaborating with waste reduction.

A photograph of three disposable coffee cups on a wooden surface. On the left is a white cup with a green lid and a green leaf graphic. In the center is a black cup with a black lid. On the right is a brown cup with a white base. Coffee beans are scattered on the wooden surface in front of the cups. A white vertical bar is on the left side of the image.

PAPER

cup &

Variety and quality, of all sizes, with personalised and representative prints of our brand. We adapt to the needs of every customer, even offering cold drink cups, 100% compostable cups, and PLASTIC FREE.

As a novelty, we have developed a range of paper lids, which allow direct intake through them, and in turn give the possibility of inserting one of our paper or bamboo straws.

EAN 8410999010690

A top-down photograph of two ice cream tubs on a wooden surface. The tub in the foreground is a light brown kraft paper cup, and the one in the background is a white ceramic cup. Both contain a scoop of vanilla ice cream topped with chocolate sauce and crushed cookies. A white plastic spoon is in the foreground tub, and a white plastic spoon lies on the wood to the right. The surface is covered with a light dusting of cookie crumbs.

ICE-CREAM

Parlour

Our tubs with double layer, interior and exterior, are ideal to carry or to freeze.

We have two ranges, white and kraft, which respond to all needs and tastes. You can take your ice cream wherever you need it, covering it with a transparent, dome-shaped, or flat lid. In addition, we have paper and wooden spoons (the latter wrapped or unwrapped).

TAKE *away*

Take away, a term we have heard many times before. In the past, plastic packaging was used, so we have developed a wide range of paper and cardboard packaging, which allows consumers to continue to use it, but in a responsible and environmentally friendly way.

GENERAL CONDITIONS OF SALE

ORDERS

Orders placed by any of the available means will be subject to our available supplies. We cannot accept responsibility for delays due to reasons beyond the control of our organisation.

The minimum order must be for The sum of 250 euros carriage on delivery, or for a minimum of 450 euros carriage paid. The cost of carriage will depend on the final destination of the goods in each case.

DELIVERIES

We supply our products in mainland Spain within 48-96 hours (working days) of receiving the order, with the exception of personalised products. The delivery times are non-contractual. For deliveries to the Balearics, the Canaries and outside Spain, the delivery time will be longer and Betik reserves the right to apply additional rates and customs charges where appropriate.

If there is a problem with your delivery, please contact the Betik Sales Dept. by calling +34 943 780 001 or sending an email to pedidos@betik.es in order to guarantee that your payments and deliveries are correctly processed.

VARIATION IN THE PRODUCTS

Betik cannot guarantee that the images featuring in its catalogues, pricelist and/or Website exactly represent its products, particularly due to differences in size, colour or changes made to meet the customer's specifications. We reserve the right to make all changes we believe necessary to the products. The product characteristics can be changed with no need for prior notice.

INVOICING

Invoicing will be weekly, and the invoices will be sent either electronically or, failing this, by ordinary mail. Any discrepancies in the invoice will be settled by means of an amended invoice. Any problems with the invoice must

be communicated to our Sales Dept. either by calling +34 943 780 001 or by sending an email to pedidos@betik.es

CATALOGUE PRODUCT RETURNS

Returns of products from our catalogue must be made within 30 calendar days from the date indicated on the delivery note and with the manufacturer's original packaging intact. The goods must not have been manipulated or used by the customer. NO returns will be accepted in the event of failure to observe the said conditions (the maximum deadline for returns is 30 days, with the original packaging intact).

For refunds, you should contact our Sales Dept. by calling +34 943 780 001 or by sending an email to pedidos@betik.es, giving the following information:

- Customer code and/or name.
- Number and date of the delivery note.
- Reference and description of the product.
- Amount to be refunded.
- Reason for the return.

A technical study will be made of all returns prior to approval. The courier service will collect the goods once it has received the note indicating the amounts and products to be collected. The goods to be returned must be in perfect condition for their resale and neither the product, nor the packaging, must have been used or manipulated.

We can supply personalised products which we will only manage for your particular case. These products are subject to a wider range of delivery conditions than usual, meaning that no return will be accepted unless there is some kind of fault in the goods delivered.
