NATURAL MATERIALS HOMEWARE COLLECTION

Manufacturer & exporter
of natural material homeware

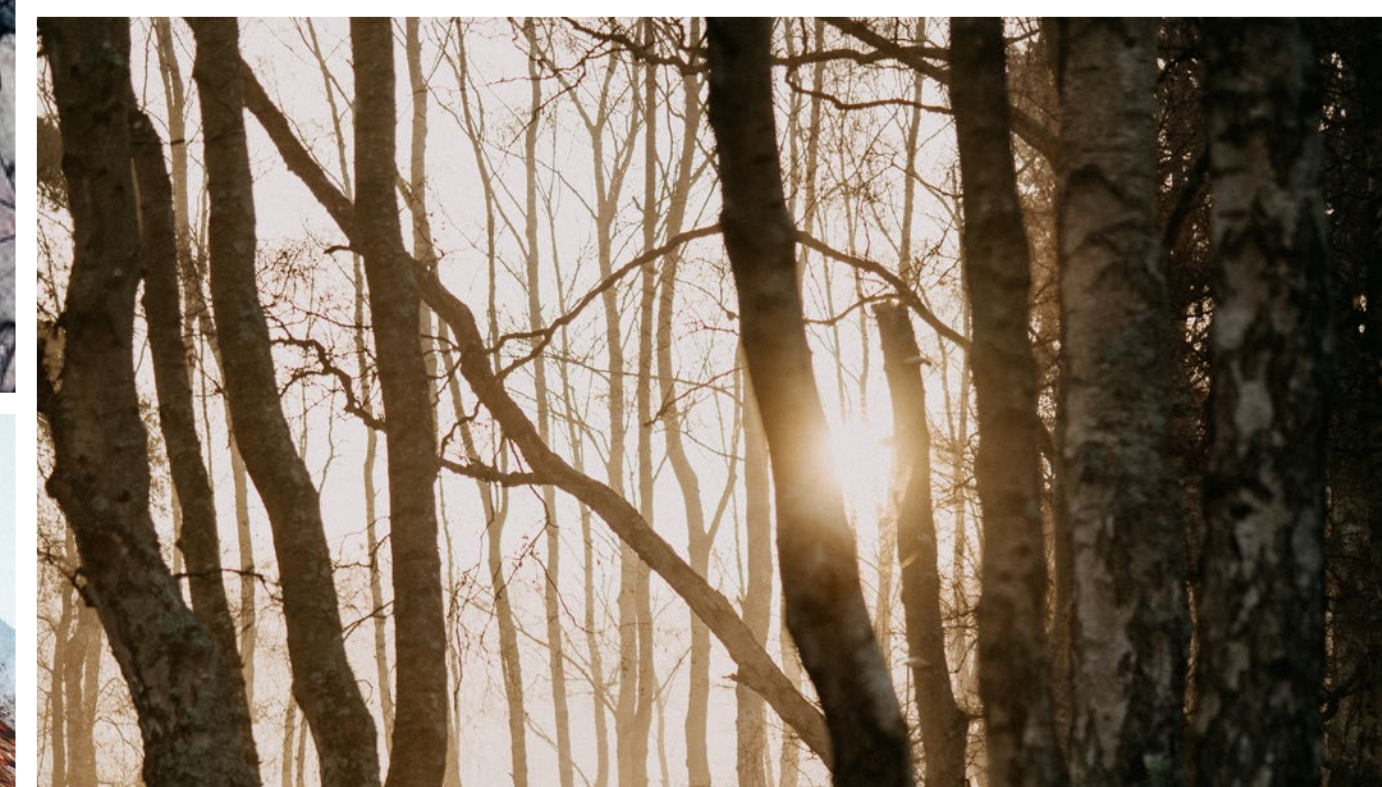

The background image is a photograph of various woven baskets and planters. In the foreground, there are several large, cylindrical woven baskets on stands. One basket on the left holds a snake plant. Another basket on the right is on a wooden stand. In the background, more baskets are stacked, and a white towel is draped over one of them. The setting appears to be a modern outdoor space with a grey tiled floor and a white wall. The image is framed by a semi-circular border at the top and bottom.

Introduction

A big focus on comfort will certainly not lose relevance in the next few years 2021/2022. With more time spending at home, we're aiming to have a comfortable, cozy atmosphere for rest, work, entertainment, and daily activities.

Here in the **Comfort Home** collection, we create new homewares from natural materials with basic, earthy colors and simple lines & patterns. They're all about adding comfort into the living space while staying aesthetic at the same time.

The Inspiration

Warm, earthy tones & natural materials, inspired by the colors of the Fall and the Winter, we intent to resemble the distinctive colors of the two seasons in our products.

Going Banana

Looks like Water Hyacinth, but **BETTER!**

In Vietnam, the banana industry produces large amounts of organic waste, with only about 20% of the plant being used (the fruit & the leaves) while the rest (banana trunk) is discarded after harvest. We don't want to waste such promising natural fiber!

After sometimes researching and advancing our technique, we officially include Banana fiber as one of our natural materials for our products.

Characteristic:

- Appearance: Pale to honey yellow, quite shiny
- Biodegradable!
- Good modulus of elasticity, tensile strength, and stiffness
- Low density and strong moisture absorption quality
- Contain pathogenesis proteins, which possess antimicrobial properties
