**red
series**

cooking with
passion

Thanks to their unique aesthetics and their modern design, the red series cookware items give you one more reason to use them daily in your kitchen.

Featuring a premium quality and durable pressed aluminum body that offers excellent thermal conductivity and maximum performance for a uniform cooking effect, they will become your best cooking pal.

The ILAG Basic 2-layer non-stick coating from the renowned Swiss company ILAG in combination with the anti-slip handles in red color that stays cool even after hours of cooking, guarantee a perfect and safe cooking experience.

The flat and silent safety glass lid with a silicone rim ensures direct eye contact with food during the cooking process.

RED Series cookware items are suitable for all types of stoves and are environmentally friendly since they are 100% recyclable.
