

AeroPress®

NEW!

Stainless Steel Filters

Richer coffee is just one press away with our new stainless steel filters. They keep out grounds but allow flavorful oils to pass through for delicious full-bodied coffee.

- Made in the USA. Patent pending.
- Delicious, consistent, grit-free coffee.
- Premium grade 316 stainless steel is much more durable than the lower grade 304 stainless steel in other filters.
- Two sizes: Standard fits AeroPress Clear, Original and Go; XL fits AeroPress XL.
- Easy to use & clean: Just rinse & dry.

Stock #: XLMF12
Cs Weight: TBD
Cs Dimensions: TBD

FREQUENTLY ASKED QUESTIONS:

- ***Can AeroPress Stainless Steel Filters be cleaned in the dishwasher?***
Yes, they are dishwasher safe (on the top rack only).
- ***What is the difference between 316 and 304 stainless steel?***
316 and 304 are two different grades of stainless steel. 316 is a premium grade of stainless steel that is much more durable and corrosion resistant than lower grade 304 stainless steel. AeroPress Stainless Steel Filters are made from 316 stainless steel, unlike other metal filters on the market.
- ***What is the difference between AeroPress Stainless Steel Filters and AeroPress paper micro-filters?***
Both our reusable metal filters and our paper micro-filters keep out coffee grounds for a grit-free cup of coffee. The main difference between them is in the flavor profiles that they give. The reusable filters allow oils and some fine particles to pass through for a somewhat fuller-bodied cup of coffee, whereas the paper micro-filters keep out those oils and fines for a cleaner flavor profile.
- ***Is the metal used in AeroPress Stainless Steel Filters food-safe?***
Yes, the metal used in the AeroPress Stainless Steel Filter is a food-safe, premium grade 316 stainless steel.
- ***Which AeroPress Stainless Steel Filter fits which AeroPress coffee maker?***
The standard AeroPress Stainless Steel Filter is compatible with the AeroPress Clear, Original, and Go. The AeroPress XL Stainless Steel Filter is compatible with the AeroPress XL.
