

# Foreword

.....

More than 1/3 of the domestic waste produced in cities is packaging waste, and the volume of packaging waste accounts for about 50% of solid waste.

The world consumes an average of 1 million plastic bags every minute, and about 8 million tons of plastic waste enter the ocean every year, all of which add up to 420 circles around the earth. Every year, more than 100,000 marine animals die from being entangled in plastic bags or eating plastic by mistake.

Protecting the environment has become the common mission of the times for all mankind.

# About us...

**It is urgent to replace plastic with paper!**

Jiurong Packaging has 26,000 square meters of international standardized production base, the world's advanced environmental protection food packaging production equipment and 1000 dust-free purification workshop, with sophisticated equipment and technology to promote production capacity, the concept of energy saving and emission reduction and circular economy, into every link of packaging products.

Founded in 2006, Jiurong Packaging, adhering to the green development concept of health, low carbon and environmental protection, has always focused on the design, development and manufacture of environmental protection food packaging, driving the comprehensive solution of environmental protection packaging with innovation, and leading the public to embrace green and healthy life.

Jiurong looks forward to the development trend of the food packaging industry, continuously improves product quality and service capabilities, and has passed ISO9001 Quality Management Systems certification, BSCI Business Social Compliance Initiative certification, BRC the Food Safety Management Systems standard certification and FSC Forest Stewardship Council certification, FSSC22000 Food Safety System certification. As well as HACCP Hazard Analysis and Critical Control Points certification, to achieve the integration with international industry standards, products are exported to all parts of the world, and become a long-term strategic partner of the world's catering giants.

Break the shackles of traditional packaging and pursue a sustainable future. Jiurong Packaging has been on the road and has never stopped moving forward.

**02 Global leading brand of food packaging 03**

## New Choice of Environmental Protection Food Packaging

Jiurong adheres to the orientation of recyclability, easy recycling and degradability, which not only increases the attractiveness of packaging, but also constantly adapts to the needs of green and sustainable development of the market, weeding through the old to bring forth the new, providing intimate one-stop food packaging solutions for the catering industry and those who need environmentally friendly food packaging, and bringing more new choices for environmentally friendly food packaging.

Over the years, Jiurong's product have been accompanied by all aspects of people's daily life: from degradable paper straws in breakfast drinks to kraft paper packing boxes for takeout, from disposable environmentally friendly paper cups to paper holders for birthday cakes, every day of our life is healthier, safer and more environmentally friendly because of Jiurong packaging.

## Our approach to environmental protection-from nature, back to nature

In terms of raw material selection, Jiurong follows the principle of "originating from nature and returning to nature", using degradable plant-based raw materials such as corn, sugarcane and wood, which fundamentally guarantees food safety, reduces environmental load and achieves win-win economic and environmental benefits.
